

GoatThroat fluid friendly pumps are the safest, most reliable, and easiest way to accurately transfer any liquid.

Custom configured pumps, fittings and accessories are fluid specific, meet compatibility standards, and are designed as complete turnkey solutions to fit your exact transfer application.

Fits any size container, safely pumping any kind of liquid.

- Functional design quickly installs on all containers and pails (from 2.5 to 55 gallon).
- Ergonomic, high-efficiency, low-pressure hand pump (<4 psig) controls delivery flow, and drains containers dry (RCRA).
- One-touch tap delivers controlled amounts of liquids from drops to gallons, and gives exact quantities or precision applications.
- Air-tight seals, gaskets and fittings eliminates drips, vapors, & VOC emissions for additional safety.
- Rugged durable design 100% tested for quality assurance and built for a lifetime of reliable service.
- Made in USA with premium grade long-lasting materials.
- Available options include fittings, adapters, hoses, grounding systems, remote discharge taps, pneumatic options, etc....

**GoatThroat has a fluid friendly safety pump model for every liquid.*
4 compatible materials to choose from:**

NITRILE
Models GT100, SCP100
Most Oils

EPDM
Models GT200, SCP200
Caustics, soaps,
acetates

VITON
Models GT300, SCP300
Acids, solvents, herbicides,
biodiesel, oils with additives

SANTOPRENE
Model GT200, SCP200-S
Alcohols, Acetone, MEK

GT models are food grade. SCP models are NFPA30 approved. All fit 2.5-55 gallon containers, pump up to 4 (gpm), have an auto pressure release at 6 (psig) and are available with a complete line of fluid compatible fittings and accessories.

**(refer to Compatibility Guide for pump material selection)*

- GoatThroat provides expert advise configuring & pricing solutions that's right for you.

GoatThroat Fluid Friendly Pumps

Configurable • Convenient • Spillproof • Safe

Here's why GoatThroat fluid friendly pumps are simply the best choice for transferring liquids:

Maximizes plant safety and increases worker productivity.

- All components are fluid specific and meet compatibility standards.
- Custom configured components are guaranteed to fit your exact transfer application.
- Delivers fluid in a steady stream without pulsing or shear
- Sealed air-tight system eradicates VOC's evaporation and toxic fumes
- Finger-touch spout eliminates leaked fluids and messy clean-up
- Hi-efficiency pump pressurizes in a few quick strokes reducing repetitive motion injuries
- Short stroke handle has a narrow range of motion for ease of use
- Internal pressure relief valve prevents over pumping
- Barrels remain upright for safety and never need tipping
- Remote tap operation prevents frequent container movement
- Reduces workplace injuries by eliminating heavy lifting of containers

Built with quality components for a long lifetime of reliable spill-proof service.

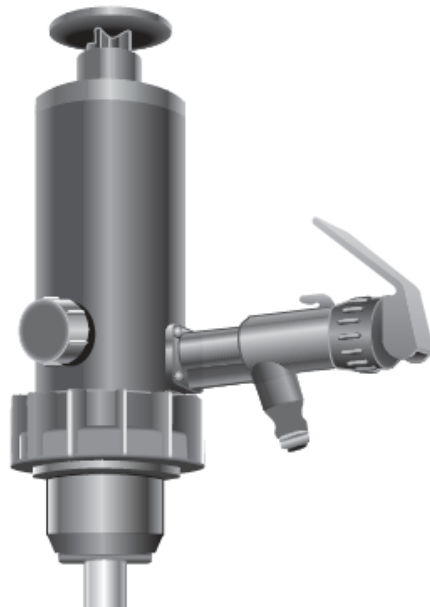

Custom configured compatible pump solutions to fit your exact transfer application.

PUMP MATERIALS:

Nitrile
EPDM
Viton
Santoprene
Kalrez

ACCESORIES & OPTIONS

- Adapters
- Fittings
- Hoses
- Grounding
- Remote Taps
- Pressurized
- What else?

Tested to 10,000 cycles
Flow rate of up to 4.5 gallons per minute

Use as hand pump or upgrade to pneumatic
Internal pressure release at 6-10 psi
Every pump is ground able
finger tip control
ROHS compliant

Saves money and most valued for their low cost of ownership.

- 10-year life expectancy and tested to over 10,000 cycles
- Empties containers dry to the last drop, reduces waste, and makes containers RCRA ready
- Dispenses exactly the right amount of fluid quantity for perfect portion control
- Labor saving remote tap conveniently transfers fluid up to 10 feet without moving drums
- Air-tight system reduces inventory loss from evaporation and contamination
- Spill-proof design prevents messy spills and expensive clean up costs
