CIVILS & PLANT

The background of the image shows a construction site for a wind farm. Two large white wind turbines are visible on either side of the frame. In the center, a yellow tracked excavator is positioned on a gravel base. Two workers in orange high-visibility clothing and white hard hats are standing on the site. A white geotextile fabric is being laid out on the ground in the foreground. The sky is overcast with grey clouds.

WHY OUR CUSTOMERS CHOOSE US?

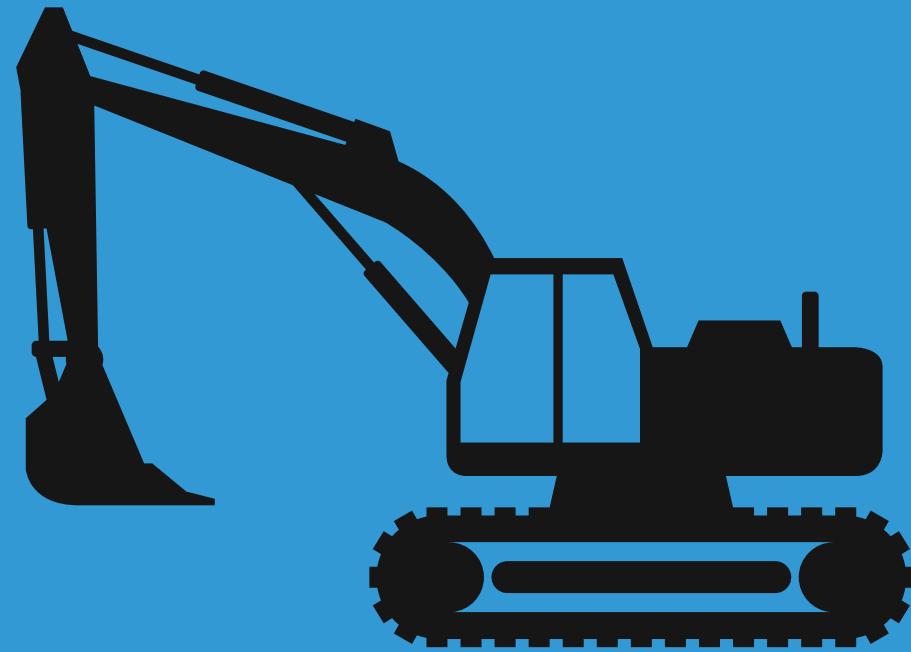

With a simplified approach and utilising our experience and knowledge our teams respond swiftly to changing and challenging environments.

Deliver contracts ourselves with our in house multi-skilled teams and variety of plant enables use to be agile to our customers needs. From project management to skilled operators on sites we can cover all bases for our customers.

Operating within highly sensitive environments, from live water treatment works to airside within some of the most prominent UK commercial airports. Our teams build trust and foster a culture of safety that aligns with project stakeholders.

ABOUT OUR COMPANY

◆ Over £1m of plant resource within the group

◆ Circa 50 direct employees within the group

WHAT WE DO

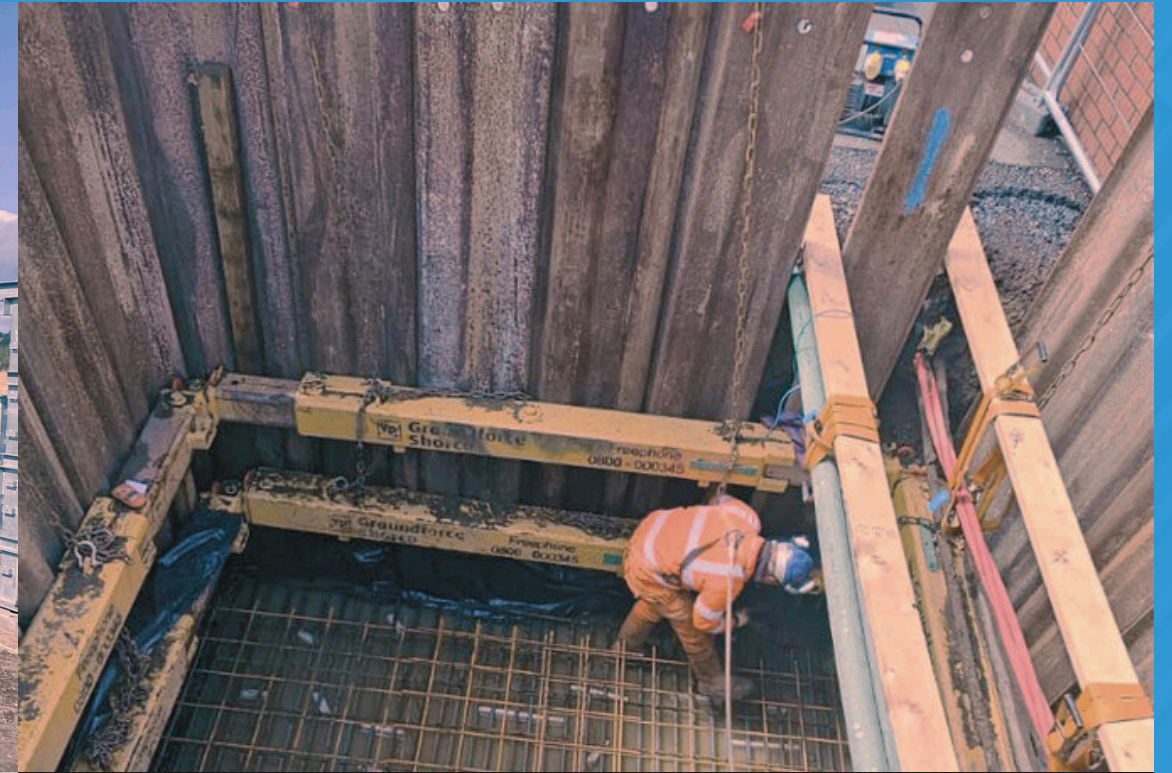

Water

Operating UK wide our teams undertake civil engineering works in waste water and clean water sites for our valued customers. From reinforced concrete structures to pipelines and drainage our teams are capable of working in challenging environments within live treatment works across the UK.

Energy

From solar farms to grid connection projects and battery storage sites. We undertake works from bulk earthworks to reinforced concrete structures and brickwork buildings. While working closely with our customers we aim to deliver on time and budget a high quality projects across the UK.

Coal Authority and Infrastructure

Our teams diverse skills from drainage projects and bulk earthworks are utilised by our clients in infrastructure projects. Furthermore, across the UK several mines and adits require stabilisation or capping. Our teams work in challenging conditions to complete a variety of works for the coal authority

VISION AND VALUES

To be a company where people and community are at the heart of achieving success for our customers.

High Performance

We strive to deliver quality and value in a safe manner for our customers

Invest

We invest in our people and communities to support growth and make a difference

Leadership

To provide strong leadership that empowers our people.

Legacy

We aim to leave a positive impact on our environment and people through our projects.

ACCREDITATIONS

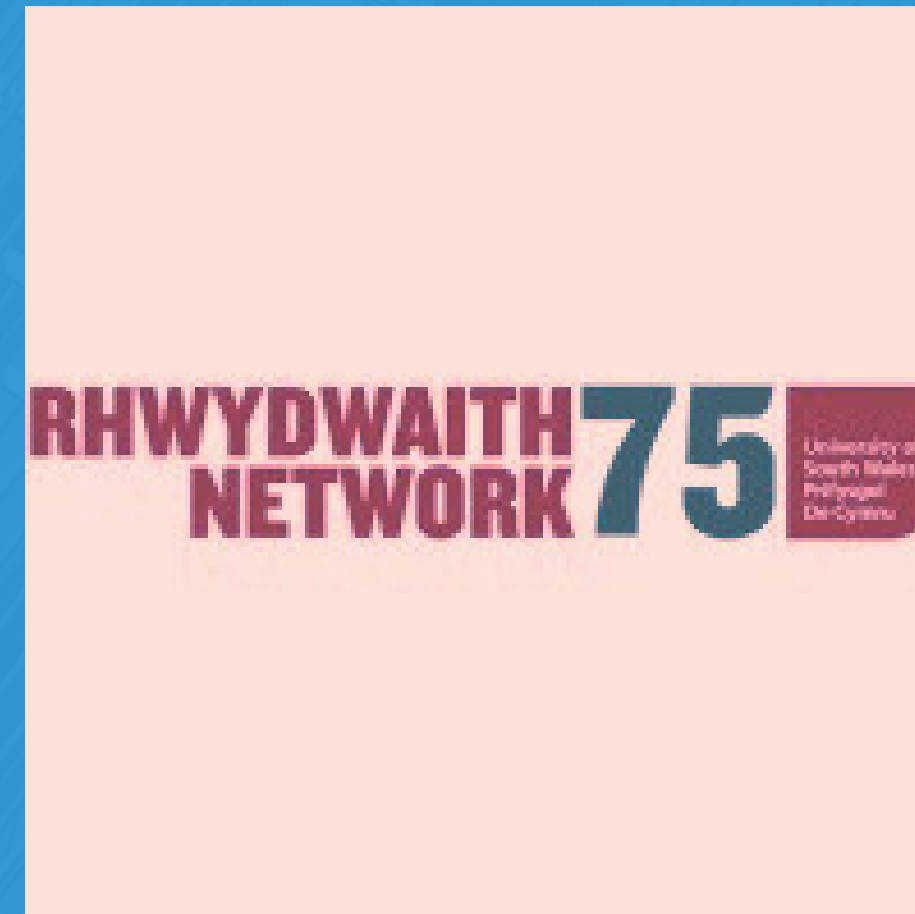

We always strive to meet the highest industry standards when it comes to health and safety, quality and environment.

We hold a full range of industry required certifications and memberships including those for our management system, certified to ISO 9001, 14001 and 45001.

FUTURE TALENT

Our aim is to invest in our people and our communities. We feel it is our responsibility to provide opportunities for future talent to commence their careers within our industry and therefore we have partnered with the Network 75 scheme and University of South Wales to enable this to happen.
