

DAVID WATERS

David is the Principal Partner of Waters Worldwide, and a Senior Consultant with the PowerStart Group. He specializes in business growth development, operations planning and deployment, transportation and logistics, and supply chain problem solving.

Dave has extensive international project experience, and particularly enjoys the details of effective project planning and management.

Dave enthusiastically engages in "Project Rescue" initiatives, especially when related to operations and supply chain issues.

Corporate and Operational Consulting

Supply Chain

David will work with your team to optimize supply chains by analyzing processes, identifying inefficiencies, recommending strategic improvements, and implementing advanced technologies. He will help you streamline operations, reduce costs, enhance inventory management, and leverage technology to boost overall efficiency, ensuring a seamless and cost-effective flow of goods from origin to destination.

Operations Planning & Deployment

David will work with you to enhance efficiency by analyzing and improving workflows, optimizing resource allocation, and implementing strategic plans. He will suggest how to improve coordination between departments, refine scheduling processes, and employ technology to streamline operations. He will bring an agile approach to meet organizational goals, minimize disruptions, and maximize productivity in a dynamic business environment.

Project Planning and Management

Dave will work with you and your team to enhance project success by developing comprehensive strategies, defining clear objectives, creating detailed plans and realistic timelines, and establishing effective communication channels. He will facilitate team collaboration, monitor progress, and mitigate risks. He will work with you to achieve and meet stakeholder expectations.

"Challenged" Project Rescue

Dave will conduct a thorough analysis of your "challenged" or troubled project, identifying root causes such as delays, budget overruns, or team issues. He will provide strategic solutions, implement corrective measures, mitigate risks, and provide leadership guidance to rescue the project. He will develop an action plan to ensure timely and successful project completion.

Monthly follow-up: David will follow-up with you each month by Zoom for a one-hour progress meeting (at no additional charge to you) to determine how you're doing working against the resulting "Go Forward" Plan, and the other project work. He will provide ongoing guidance as necessary to support your progress for a period of eleven (11) months.

Annual follow-up: In the twelfth month after your "Go Forward" Plan is produced, Dave will follow-up by Zoom (or on-site). This review will last anywhere from an hour to a full day. This will be the final review of your progress against the "Go Forward" Plan and the other project work, including adjustments that may be needed. Dave will provide guidance as necessary to support your ongoing progress.
