

After Care

Take off the bandage 2 to 4 hours after getting tattooed (if saran wrap).
Remove plastic film 5 days after getting tattooed (if second skin).
Wash your tattoo delicately with lukewarm water and unscented soap.
Rinse with cold water and dry with a disposable paper towel.
Apply a thin layer of unscented hydrating cream.
Repeat the process 2 to 3 times a day until the tattoo is healed (approximately 2 weeks).
Do not scratch, pick at the scabs or dead skin!
Do not expose your tattoo to direct sunlight.
No beaches, pools, baths or saunas for at least 15 days (only showers).
Always keep your tattoo hydrated to help the healing process.
Once your tattoo is healed, always use sunscreen to avoid premature aging of the tattoo and your skin.

Touch-ups

Atelier 1974 guarantees all of our tattoos and we invite you to come back to the shop to show us your healed tattoo after two weeks. Some tattoos might need touch-ups in some areas (the artist will tell you) If you need touch-ups, you can book an appointment directly with the artist. All touch-ups are guaranteed for three months after the initial tattoo appointment.

For any questions, contact us or your artist.

Happy healing!
