# Our Company

Snatch Mining Industries (Pty) Ltd was established on August 19, 2024, following the acquisition and replacement of Pendusa Holding, liquidated due to the impact of COVID-19. Snatch Mining Industries now proudly owns Pendusa's licenses, intellectual property, and company systems. As the sole license holder, we are responsible for the manufacturing, sales, distribution, and implementation of patented mining products. Additionally, we manage all vendor relationships within relevant mining groups. Our head office is located in Brits, North West.

# OUR MISSION and Vision

## Mission Statement

Our mission is to create sustainable wealth for our stakeholders by leveraging the patents and licenses we hold on innovative, value-added mining products. We prioritize five key stakeholders in the following order:

1. Our Employees – The foundation of our success.
2. Our Customers – Ensuring efficiency and productivity in mining operations.
3. Our Local Communities – Supporting development and economic growth.
4. Our Government – Adhering to regulations and fostering industry advancements.
5. Our Shareholders – Driving long-term growth and profitability.

## Vision Statement

Our vision is to become an industry leader capable of meeting any demand for our products. We aim to establish a robust manufacturing, implementation, and logistics infrastructure to supply not only the SnatchWise Scraping System but also all our patented solutions.

We are committed to adding value to all our stakeholders, ensuring innovation, efficiency, and long-term success in the mining sector.

Adamant to add value to all our stakeholders:

Our People – Our Client – Our Government – Our Local Community – and Our selves.

# Our Products & Services

## Products

- **SnatchWise Scraping System** – Enables scrapers to navigate 90° corners while maintaining a full load, improving efficiency in confined mining spaces.
- **Yena Lo Drill Jig** – Eliminates human errors in conventional drilling, ensuring precision and consistency.
- **Wimba Blasting Barricade** – A revolutionary blasting barricade designed for practical and effective daily advancement.

## Services

- **Semi-Mechanised Contract Mining** – By integrating our proprietary products and mining business strategies, we optimize operations, reducing production costs by up to 20%.
- **Miner Labour Solutions** – Offering miner labour hire, specialized training, auditing systems, and a structured curriculum to enhance workforce competency.

# Previous Projects

## Projects

- Past Mining Achievements of Our Mining Division
- SnatchWise Scraping System – Invented by us, now a stock item at Sibanye and approved at Anglo. (Proof of concept and production trial completed.)
- Monorail Jig Rollout – Successfully implemented across two shafts at Lanxess, achieving 25,000 tons per shaft.
- Lanxess Chrome Mines – Maintained a
- 25,000-ton contract for two years, serving as a trial, demonstration, skills transfer initiative, and maintenance plan, while establishing new standards and norms for the Drill Jig.
- Glencore Mine, Rustenburg – Executed two 15,000-ton contracts utilizing the Drill Jig.
- Sibanye K6, Rustenburg – Managed a 15,000-ton contract.
- Cooke 1# & 2#, Randfontein – Conducted pillar extraction at a stoping width of 0.86m with integrated roof bolting.
- Sibanye Kloof 1# – Provided Super Miner consulting by demonstrating a mining triage system for training, auditing, and reporting, utilizing a proven managerial framework at the miner level.

# The Problem

With conventional drilling, the RDO stands directly beneath the rock drill, placing them at risk of falling rocks. Maintaining proper drilling discipline to meet the mine standard of 70 to 90 degrees is essential.

## **Safety Risks for the RDO**

- Conventional drilling places the RDO directly beneath the rock drill, exposing them to falling rocks and increasing the risk of injuries.

## **Poor Drilling Discipline**

- Maintaining the mine standard drilling angle of 70 to 90 degrees is challenging, leading to poor face shape and reduced advance rates.

## **Operator Fatigue and Inefficiency**

- Manual drilling causes significant strain on the RDO, leading to fatigue, decreased accuracy, and slower production.

## **Impact on Productivity and Costs**

- Inefficient drilling increases downtime, support requirements, and operational costs, reducing overall productivity and profitability.

# The Solution

## Distance Control Roof Bolter

Enhancing Safety, Eliminating Human Error,  
and Maximizing Drilling Efficiency.

- **Distance Control Roof Bolter**
  - A remote-controlled Air Leg and Rock Drill eliminate direct operator exposure to falling rocks.
- **Improved Drilling Accuracy**
  - An independent Air Leg maintains the correct angle, reducing human error and ensuring proper drilling discipline.
- **Optimized Drilling**
  - These bolters enhance the drilling of support in typical mining applications.
- **Increased Safety**
  - Remote drilling removes operators from the danger zone, allowing them to operate mainly in a supported area.
- **Improved Efficiency**
  - Faster, more effective drilling is achieved with less physical effort required from both the operator and assistant.
- **Better Drilling Angles**
  - Achieving optimal drilling angles ensures proper support installation.
- **Reduced Physical Strain**
  - Operating remote bolters is less physically demanding, increasing safety for operators.

# HOW it works

- **Remote Control Operation**
  - Operated remotely, keeping the R.D.O safe from hazardous areas while controlling drilling functions.
- **Air and Water Supply**
  - 3-meter hoses deliver air and water to the Rock Drill, Air Leg, and Stinger, ensuring smooth operation.
- **Precise Control with Victoria and Ball Valves**
  - Air and water flow is regulated by Victoria and Ball Valves for optimal performance.
- **Water Conservation with Ball Valve**
  - The ball valve on the water line saves water when not in use, reducing waste.
- **R.D.O Appreciation**
  - The R.D.O benefits from enhanced safety, ease of use, and improved productivity.
  -
