Our Company

Snatch Mining Industries (Pty) Ltd was established on August 19, 2024, following the acquisition and replacement of Pendusa Holding, liquidated due to the impact of COVID-19. Snatch Mining Industries now proudly owns Pendusa's licenses, intellectual property, and company systems. As the sole license holder, we are responsible for the manufacturing, sales, distribution, and implementation of patented mining products. Additionally, we manage all vendor relationships within relevant mining groups. Our head office is located in Brits, North West.

OUR MISSION and Vision

Mission Statement

Our mission is to create sustainable wealth for our stakeholders by leveraging the patents and licenses we hold on innovative, value-added mining products. We prioritize five key stakeholders in the following order:

1. Our Employees – The foundation of our success.
2. Our Customers – Ensuring efficiency and productivity in mining operations.
3. Our Local Communities – Supporting development and economic growth.
4. Our Government – Adhering to regulations and fostering industry advancements.
5. Our Shareholders – Driving long-term growth and profitability.

Vision Statement

Our vision is to become an industry leader capable of meeting any demand for our products. We aim to establish a robust manufacturing, implementation, and logistics infrastructure to supply not only the SnatchWise Scraping System but also all our patented solutions.

We are committed to adding value to all our stakeholders, ensuring innovation, efficiency, and long-term success in the mining sector.

Adamant to add value to all our stakeholders:

Our People – Our Client – Our Government – Our Local Community – and Our selves.

Our Products & Services

Products

- **SnatchWise Scraping System** – Enables scrapers to navigate 90° corners while maintaining a full load, improving efficiency in confined mining spaces.
- **Yena Lo Drill Jig** – Eliminates human errors in conventional drilling, ensuring precision and consistency.
- **Wimba Blasting Barricade** – A revolutionary blasting barricade designed for practical and effective daily advancement.

Services

- **Semi-Mechanised Contract Mining** – By integrating our proprietary products and mining business strategies, we optimize operations, reducing production costs by up to 20%.
- **Miner Labour Solutions** – Offering miner labour hire, specialized training, auditing systems, and a structured curriculum to enhance workforce competency.

Previous Projects

Projects

- Past Mining Achievements of Our Mining Division
- SnatchWise Scraping System – Invented by us, now a stock item at Sibanye and approved at Anglo. (Proof of concept and production trial completed.)
- Monorail Jig Rollout – Successfully implemented across two shafts at Lanxess, achieving 25,000 tons per shaft.
- Lanxess Chrome Mines – Maintained a
- 25,000-ton contract for two years, serving as a trial, demonstration, skills transfer initiative, and maintenance plan, while establishing new standards and norms for the Drill Jig.
- Glencore Mine, Rustenburg – Executed two 15,000-ton contracts utilizing the Drill Jig.
- Sibanye K6, Rustenburg – Managed a 15,000-ton contract.
- Cooke 1# & 2#, Randfontein – Conducted pillar extraction at a stoping width of 0.86m with integrated roof bolting.
- Sibanye Kloof 1# – Provided Super Miner consulting by demonstrating a mining triage system for training, auditing, and reporting, utilizing a proven managerial framework at the miner level.

The Problem

“If you keep doing the same thing over and over and expect a different outcome.
So lets change the way we do things.”

- **Inconsistent Advance Rates**
 - Unpredictable drilling progress impacting overall productivity.
- **Challenges in FOG Control**
 - Difficulty drilling into the hanging wall, increasing the risk of fall-of-ground (FOG).
- **RDO Fatigue**
 - Excessive physical strain on Rock Drill Operators, leading to decreased performance and safety risks.
- **Low RDO Efficiency**
 - Suboptimal drilling rates affecting overall output.
- **Low Revenue per Worker**
 - Reduced profitability due to inefficiencies in the drilling process.

The Solution

The Yena Lo Drill Jig +

Revolutionize Your Semi-Mechanized Mining Operations: Enhance Safety, Boost Efficiency, and Cut Costs with the Yena Lo System.

- The Drill Jig ensures each hole is drilled parallel, resulting in optimal advance rates.
- The Rock Drill Operator (RDO) can drill with precision, preventing penetration into the hanging wall and minimizing fall-of-ground (FOG) risks.

Additional Benefits:

- No assistant required for collaring.
- The RDO operates within a supported area for added safety.
- Can be remotely operated during drilling.
- One blast can fix the face shape.
- The pneumatic cylinder enables faster and safer extraction of the jumper.
- The air leg pushes and pulls in line with the drilling direction, reducing drilling time.

HOW it works

- A 60mm x 3m or 1.5m rail is suspended from the hanging wall using eyebolts.
- The hanger assembly is connected to the rail, allowing the boom to move left and right.
- A cradle is attached to the hanger assembly, onto which the boom is mounted.
- The rock drill and jumper are then connected to the boom.
- A stabilizing arm is secured to prevent the air leg from pushing the boom back.

Parts List

1. 3m rail made from Shed 60 pipe.
2. Hanger assembly.
3. Stabilizing arm.
4. Cradle assembly.
5. Boom with collar guide bush.

HOW it works

Specifications:

Assembled Dimensions:

- Length: 2.6m (Development), 1.6m (Stoping)
- Height: 0.6m – 3.5m

Mass:

- Boom: 35kg
- Cradle: 25kg
- Mono Rail: 7kg

Drilling Time:

- 1.5m hole: 2 minutes
- 2.6m hole: 3 minutes 20 seconds

Operating Air Pressure:

- 3 – 7 bar

HOW it solves the problem

Panel	Stopin	Development	Board & Pillar	Boar & Pillar
Length (m)	25	1.8	6	10
Width (m)	1.2	2.1	2	2
Jumper Size (m)	1.8	2.5	3	3
Average Advance	1.45	2.05	2.65	2.65
Jig Operator (RDO)	1 x gully + 2 x face	1 x	1 x	2 x
Average Time (hours)	2	2	3	2.5
Square m per blast (m2)	36.25	3.69	15.9	26.5
