

Modifying Lists

Introduction

To create effective PowerPoint presentations, it's important to make your slides **easy for the audience to read**. One of the most common ways of doing this is to format the text as a **bulleted or numbered list**. In this lesson, you will learn how to **modify** existing bullets, change the **bullet style**, switch to a **numbered list**, **remove bullets and numbers**, and select **symbols** as bullets.

Modifying lists

Video: Modifying Lists in PowerPoint 2010

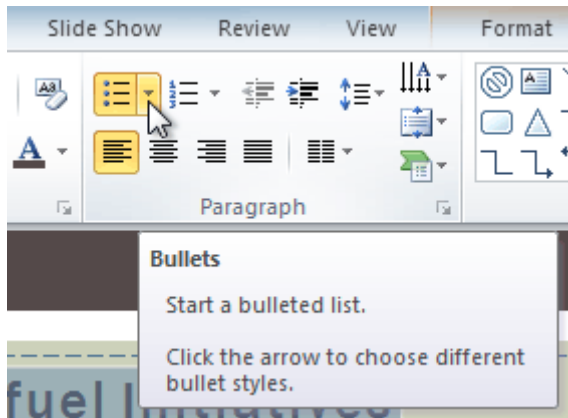

By default, when you type text into a placeholder, a **bullet** will be placed at the beginning of each paragraph. This is called a **bulleted list**. If you want, you can modify a list by choosing a different bullet style or by switching to a **numbered list**.

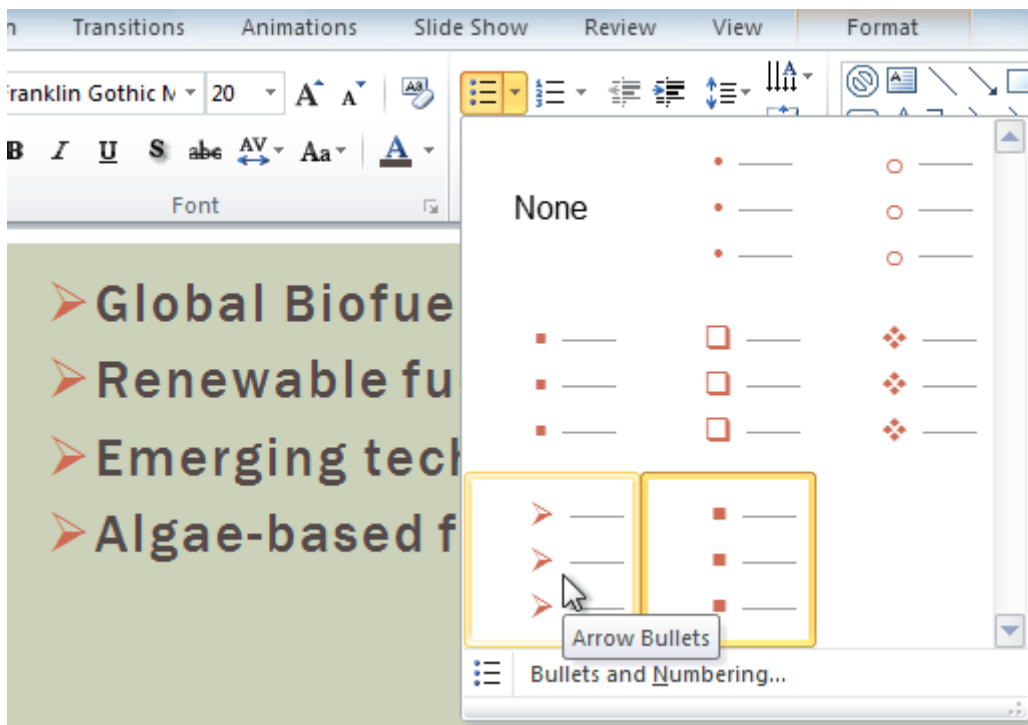

Optional: You can download this [example](#) for extra practice.

To modify the bullet style:

1. Select all text in an existing list.
2. On the **Home** tab, click the **Bullets** drop-down arrow. A menu of bullet options will appear.

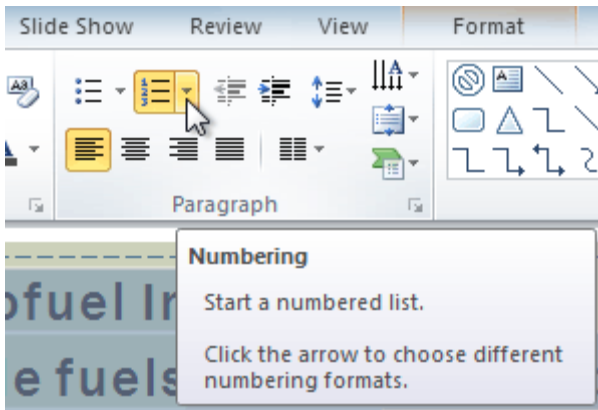

3. Hover over each menu option to display a live preview of the bullet on the slide.

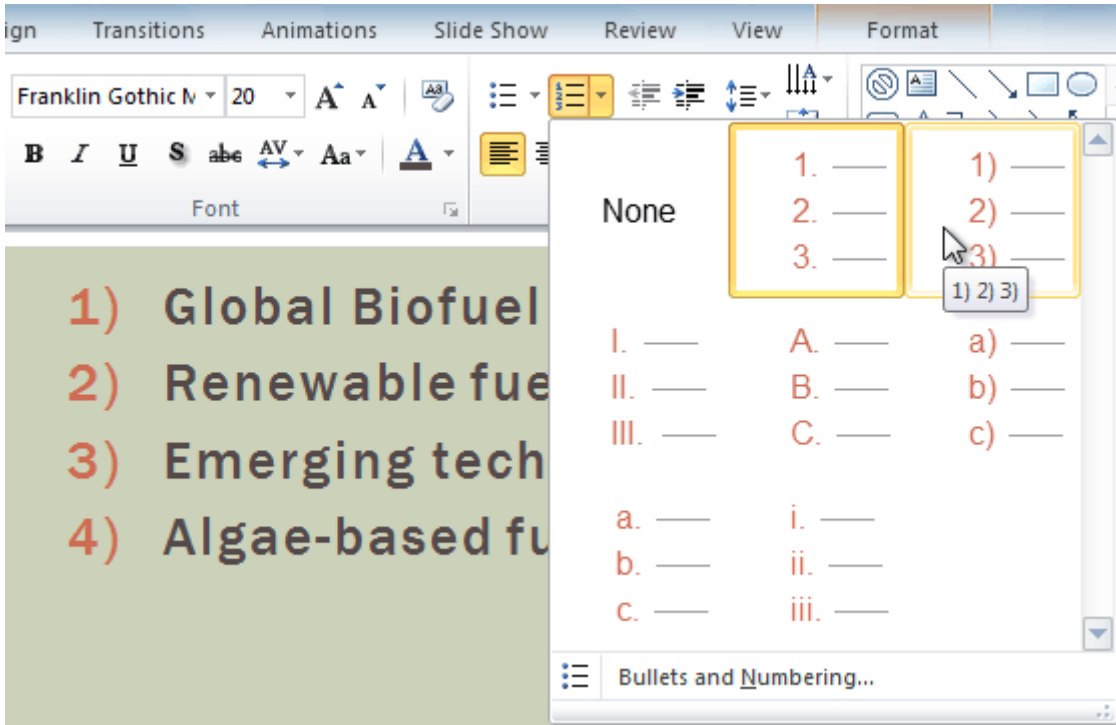

4. Select the desired **bullet option**.

To modify a numbered list:

1. Select all text in an existing list.
2. On the **Home** tab, click the **Numbering** drop-down arrow. A menu of numbering options will appear.

3. Hover over each **menu option** to display a live preview of the list on the slide.

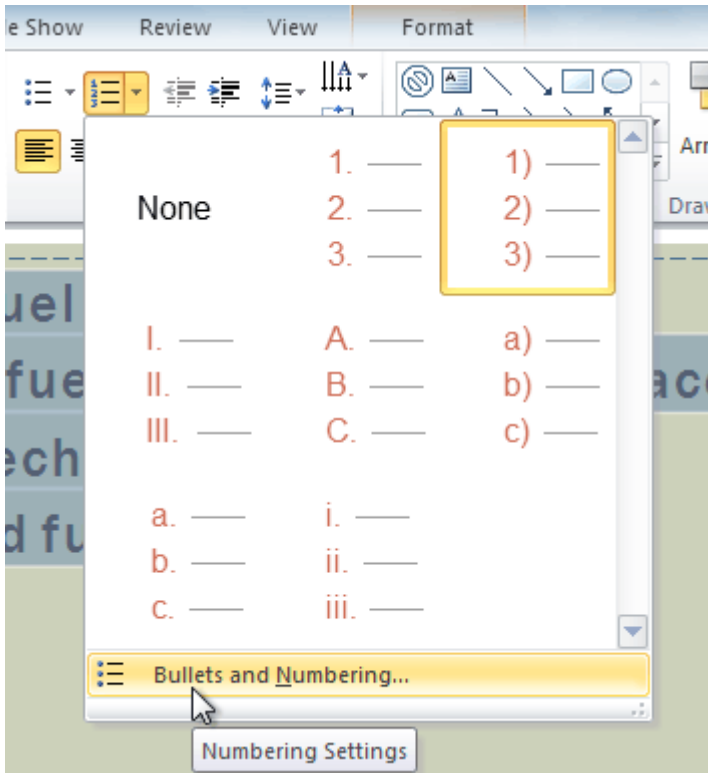

4. Select the desired **numbering option**.

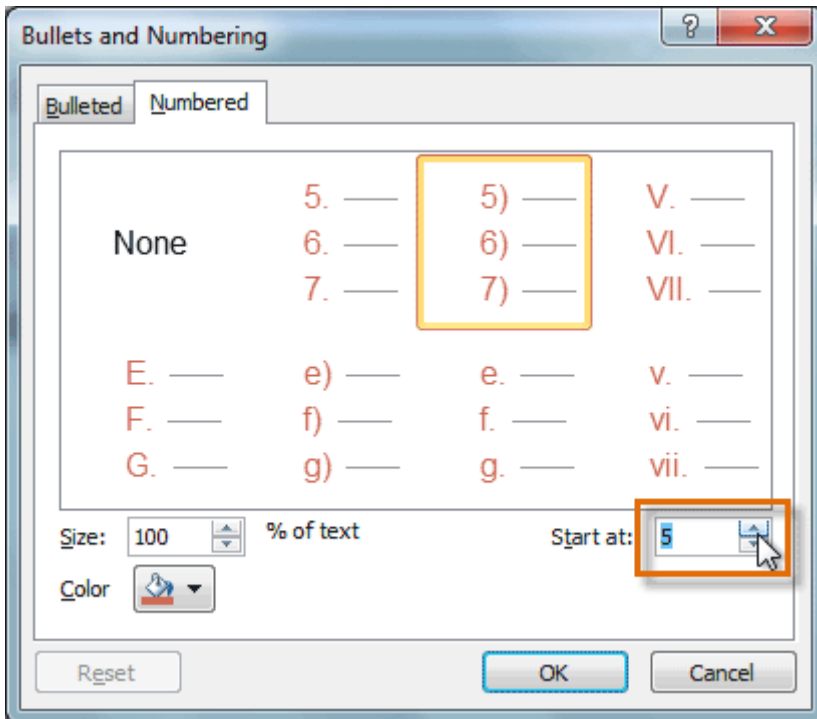

To change the starting number:

By default, numbered lists count from the number one. However, sometimes you may want to start counting from a different number, like if the list is a continuation from a previous slide.

1. Select an existing numbered list.
2. On the **Home** tab, click the **Bullets** drop-down arrow.
3. From the drop-down menu, select **Bullets and Numbering**. A dialog box will appear.

4. In the **Start At** field, enter the desired starting number.

5. The list will update the numbering to begin with the new number.

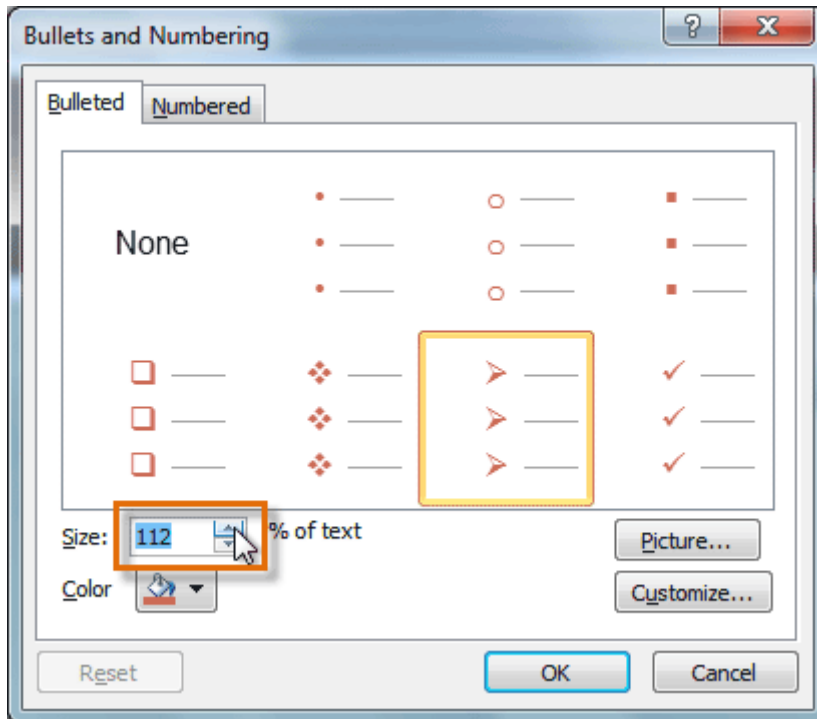

- 5) Global Biofuel Initiatives
- 6) Renewable fuels for aircraft and
- 7) Emerging technologies
- 8) Algae-based fuels

Modifying the list's appearance

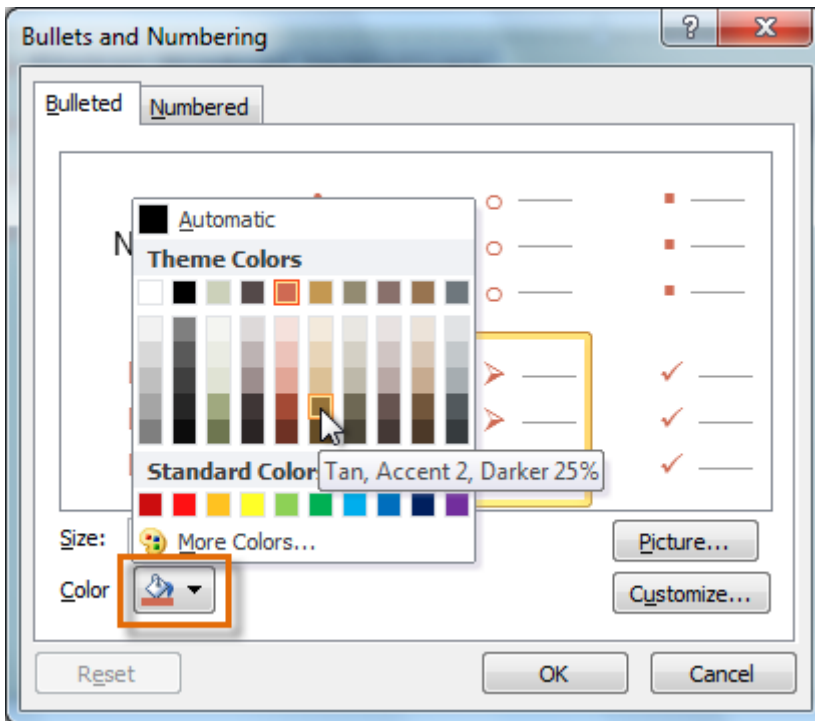

Whether you're using a bulleted or numbered list, you may want to change the appearance by adjusting the size and color of the bullets or numbers. This can make your list stand out better, and it can also help it match the appearance of your presentation.

To modify the size and color:

1. Select an existing bulleted list.
2. On the **Home** tab, click the **Bullets** drop-down arrow.
3. From the drop-down menu, select **Bullets and Numbering**. A dialog box will appear.
4. Set the bullet size using the **Size** field.

5. Click the **Color** drop-down box, and select a color.

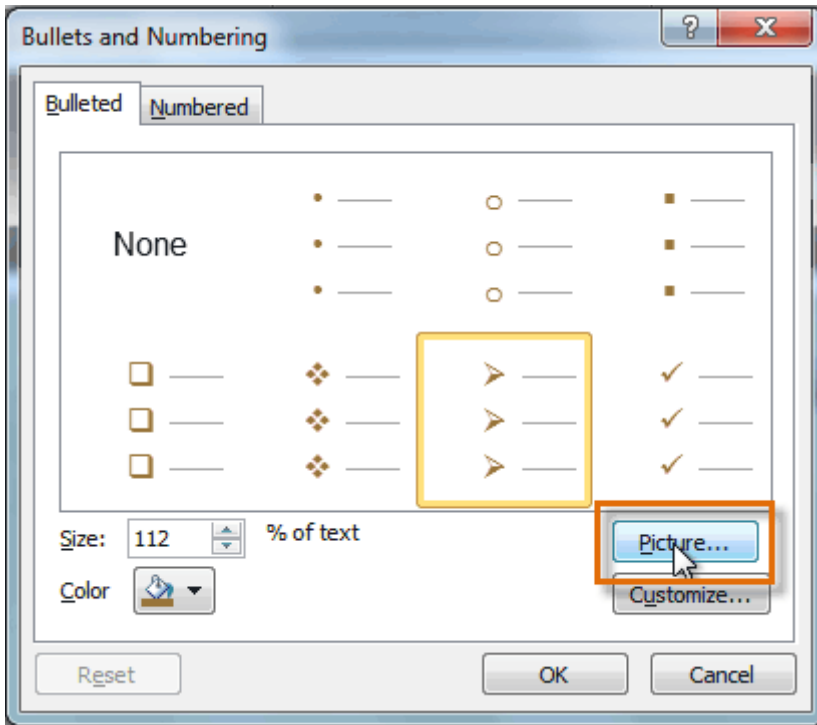

6. Click **OK**. The list will update to show the new size and color.

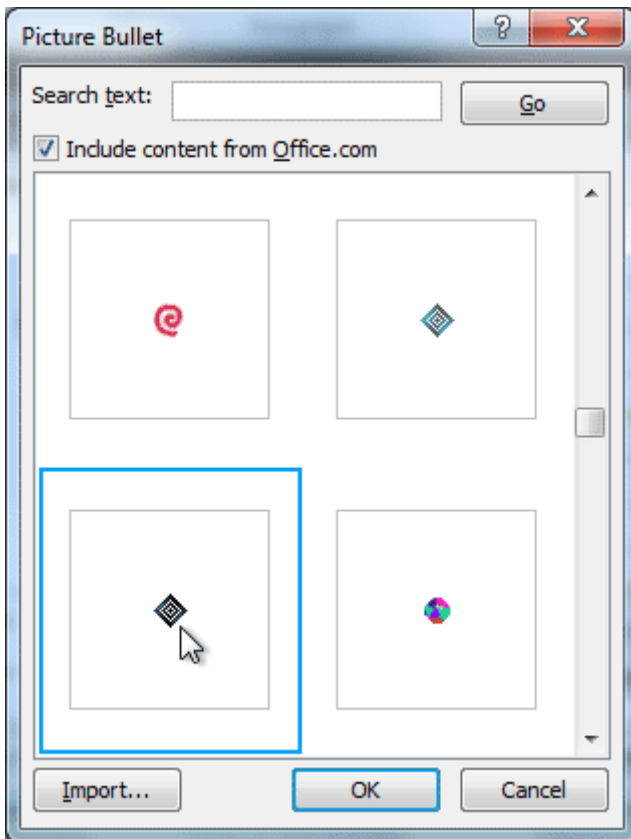

Customizing bullets

To use a picture as a bullet:

1. Select an existing bulleted list.
2. On the **Home** tab, click the **Bullets** drop-down arrow.
3. From the drop-down menu, select **Bullets and Numbering**. A dialog box will appear.
4. Click **Picture** on the Bulleted tab. The **Picture Bullet** dialog box will appear.

5. Select the desired picture, and click **OK**.

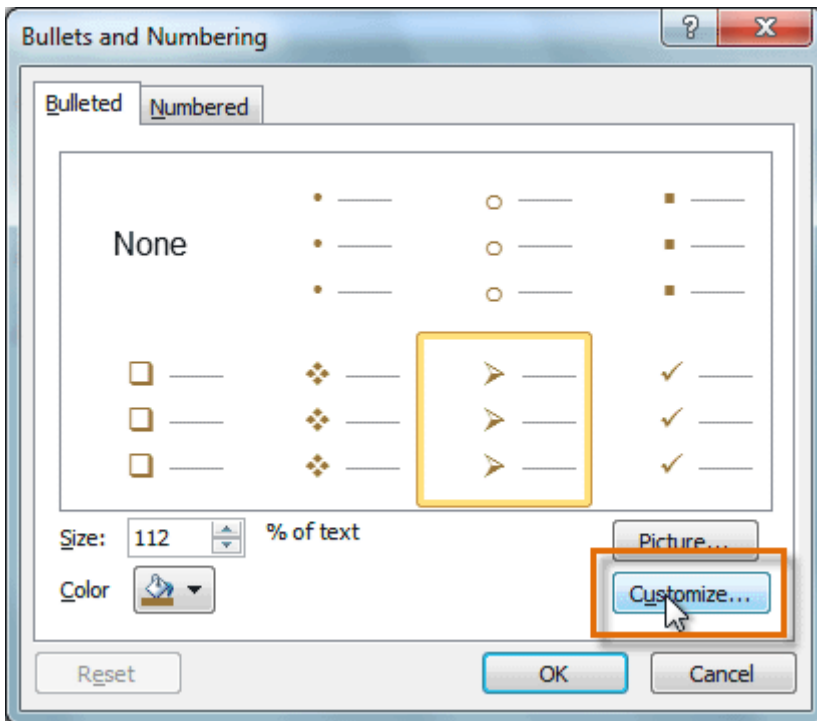

6. The list will update to show the new bullets.

- ◆ Global Biofuel Initiatives
- ◆ Renewable fuels for aircraft ar
- ◆ Emerging technologies
- ◆ Algae-based fuels

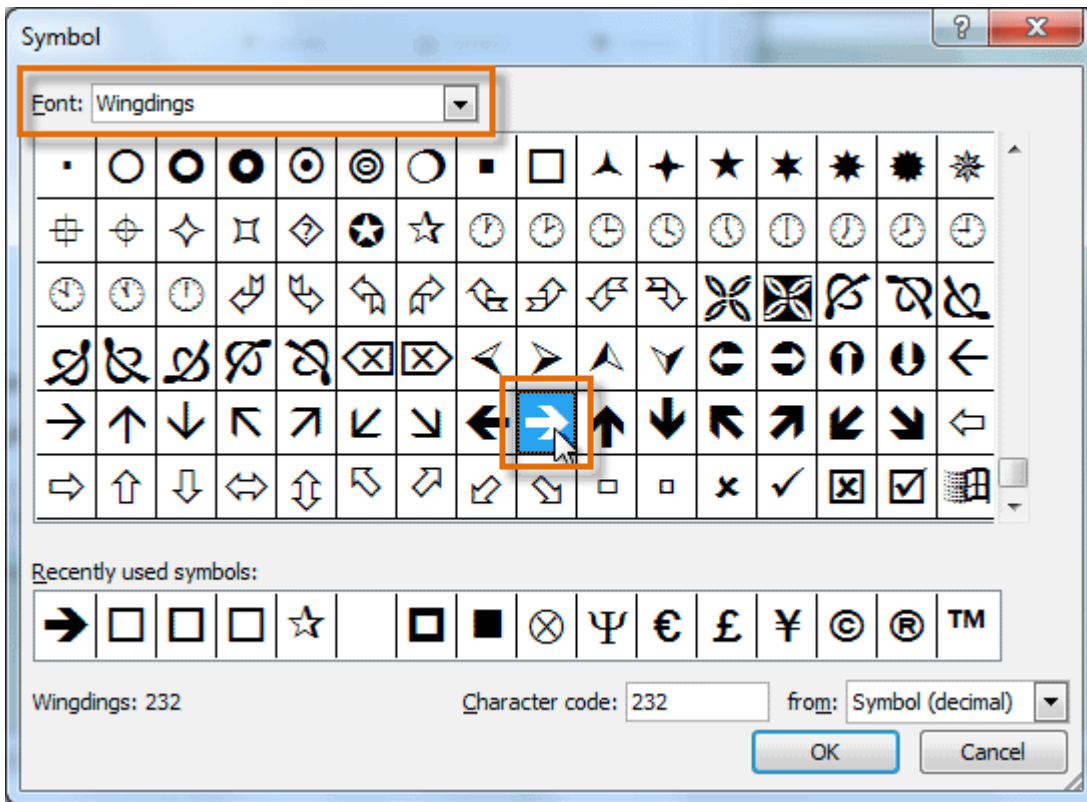

You can also click **Import** to use one of your own pictures as a bullet.

To use a symbol as a bullet:

1. Select an existing bulleted list.
2. On the **Home** tab, click the **Bullets** drop-down arrow.
3. From the drop-down menu, select **Bullets and Numbering**. A dialog box will appear.
4. Click **Customize** on the Bulleted tab. The **Symbol** dialog box will appear.

5. Click the **Font** drop-down box, and select a font. The **Wingdings** and **Symbol** fonts are good choices because they have a large number of useful symbols.
6. Select the desired symbol.

7. Click **OK**. The symbol will now appear as the selected bullet option in the Bullets and Numbering dialog box.
8. Click **OK** again to apply the symbol to the list in the document.

Challenge!

1. Open an **existing PowerPoint presentation**. If you want, you can use this [example](#).
2. Change a bulleted list to a **numbered list**. If you are using the example, use the list on slide 4.
3. Change the **color** of the numbered list.
4. Change another list to a different **bullet style**. If you are using the example, use the list on slide 3.
5. Change the bullet **color**.
6. Change the bullet to a **symbol**.
