

LONE STAR TURBO

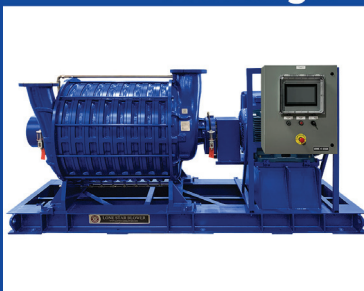

We Manufacture the Most Advanced Line of Centrifugal Blowers & Compressors in the World

GB Single Stage Geared

Air, Gas, Pressure, Vacuum
Power: 100 hp - 6,000 hp
Flow: 1,250 cfm - 90,000 scfm
Pressure: 2 - 35 psi
 API 617/672

MC Multistage Centrifugal

Air, Gas, Pressure, Vacuum
Power: 20 hp - 3,500 hp
Flow: 300 cfm - 45,000 scfm
Pressure: 2 - 25 psi

DT High Speed Turbo

Air, Pressure
Power: 10 hp - 1,000 hp
Flow: 150 cfm - 30,000 scfm
Pressure: 2 - 20 psi

CS Control Systems

SLOC™
 Local Control Panels
sMAC™
 Process and Sequencing
 Master Control

For businesses seeking reliable and comprehensive blower and compressor solutions, Lone Star Turbo is the trusted partner that delivers exceptional quality and customer satisfaction through responsive service, unwavering integrity, and a commitment to environmental responsibility.

Factory Capabilities

- Test Stand - to 15MW any Voltage or HZ
- Performance Testing - ASME PTC 10/13, ISO 5389, API
- Overspeed Testing
- Dynamic Balancing
- Hydro Pressure Testing
- Positive Material Identification
- Vibration Analysis
- Sound Testing
- ASME Section 9 Welding
- Sand Blasting
- Oven Baked Special Coatings
- Magnetic Particle / Liquid Penetrant
- Ultrasound
- Training Classes - Hands On and Classroom

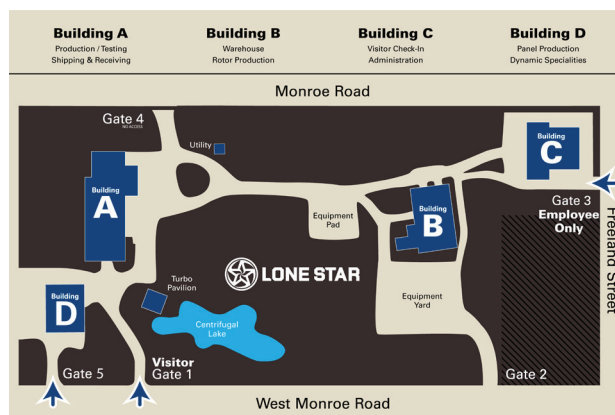

Field Services

- Preventative Maintenance
- Operator and Maintenance Training
- Troubleshoot and Root Cause Analysis
- Start-up and Installation
- On-Site Repair
- Control System Services
- Software Upgrades
- Vibration Analysis
- Laser Alignment

Training Classes

Lone Star offers in depth and hands on training classes for operators and maintenance staff that want to understand the equipment and how it is affected by the process.

Lone Star Products and Services are supported from our factory in Houston, Texas USA
