

Online Driver and E-Driver Training

Our driver risk assessment system is a 'skills and knowledge' system which means it adopts the tried and trusted approach of assessing drivers 'in vehicle' but places the process online. Our modular web-based driver training helps reduce accidents and improve driver safety, and our grey fleet management system enables companies to manage their grey fleet drivers with ease.

Customers of Fleet Support Centre enjoy the benefits of:

- A system that can be easily branded with your company logo adding a more personal feel
- The ability to set up divisions / teams and allocate logins with ease
- Manual or automatic allocation of online driver training based on risk results
- The ability to fully tailor the system to your preferences
- Full dashboard reporting and a back-end management system
- A system regarded by many as the most accurate on the market for assessing driver risk

We offer systems for the following vehicle types:

- Cars/small vans
- Light commercial vehicles (LCVs 3.5t to 7.5t)
- HGVs
- Bus/coach (PCVs)
- Minibuses
- Motorbike (Profiling Only)

Driver Profiling

Fleet Support Centre offers online driver profiling system that is a skills and knowledge assessment, which uses the tried and trusted methods of risk assessing drivers in-vehicle, but places the process online.

Using a combination of high definition video footage and still images, drivers complete a 4 stage risk assessment, covering the core driving disciplines of:

- **Attitude**
- **Knowledge**
- **Concentration and Observation**
- **Hazard Perception**

These are the 4 key areas an ADI (Approved Driving Instructor) would be observing if they were assessing a driver 'in vehicle'.

Each section contains 12 questions, and after each question the driver is told whether they answered correctly, and given the right answer and a full explanation. This is useful so that drivers are not only being assessed, but are being trained during the process as well.

At the end of the assessment, drivers are immediately given an overall risk rating of High, Medium or Low risk. They also receive a High, Medium or Low risk for each of the 4 sections so that they, and their fleet manager, can see where their strengths and weaknesses lie.

The assessment can be carried out on PCs, laptops, tablets and mobile phones enabling you to risk assess all of your drivers, irrespective of whether they have access to a computer.

Online Driver Training

Driver improvement, and the reduction of accidents, is produced through regular training. Thanks to Fleet Support Centre's online driver training modules, this can be achieved all year round with minimal disruption to drivers' time.

Regular web-based driver training not only educates drivers, it also changes their attitudes and creates a culture of safe driving.

Using high definition video content filmed from within the vehicle, from the roadside and using drone footage (showing vehicle positioning) E-Training World's portfolio of driver training modules are highly effective and engaging.

Our wide range of E-Modules include:

- 
- Adverse weather
 - Concentration & observation
 - Drugs and Alcohol
 - Eco driving
 - Hazard perception
 - Minibus
 - Mobile phones and other distractions
 - Parking and manoeuvring
 - Road rage
 - Speed awareness
 - UK road signs and markings
 - Vehicle safety checks
 - Avoiding rear end collisions
 - Car parks and parking
 - Driver attitude
 - Cyclist awareness
 - Motorways and dual carriageway discipline
 - Driving in rural areas
 - Driving in cities
 - Preventing bridge strikes

System Benefits

- Award winning market leading system
- Multiple vehicle types – tailored system for each
- Accurate risk ratings
- A system that ‘your average’ driver relates to
- A hugely popular knowledge and skills based system – drivers understand it and buy-in / acceptance levels are very high
- Editable content options throughout – to tailor it to your requirements
- The ability to develop bespoke e-learning modules
- Assessment plus immediate training
- Accident reduction
- Health and safety benefits
- Duty of care and corporate responsibility
- Saves money on in-vehicle driver training
- Cost-effective
- Large database of questions
- Can be used pre-employment
- System available for Eire
