Making Fleet, Asset & Driver Management Simple

We Offer Supported Solutions

Comprehensive fleet and driver compliance management system including daily walkaround checks, maintenance inspections, scheduling, licence checking, grey fleet and tachograph analysis

Our Services

FLEET & DRIVER MANAGEMENT

Quickly and effeciently manage all aspects of your fleet including your drivers, making day-to-day operations easy while maintaining all of your compliance obligations. DVSA Earned Recognition approved.

TACHOGRAPH ANALYSIS

Our tachograph analysis and drivers hours module has been developed in collaboration with experienced transport managers and the DVSA ensuring a simple, easy-to-use system that meets compliance requirements.

DRIVER LICENCE CHECKING

Easily check your drivers licences for points and expiries and manage risk through our automated checking system. Including email alerts and reports. All information is supplied directly by the DVLA.

GREY FLEET CHECKS

Check your employees company cars for valid road tax, MOT status and critically business insurance cover. Our service also covers spouses and checks MOT and RFL status on a weekly basis.

Online Driver Assessment and Development

Statistically, driving is the most dangerous work activity that most people undertake. The European Transport Safety Council estimate that business drivers account for 40% of road deaths across Europe. Compared to all other work activities, it contributes to far more work-related accidental deaths and serious injuries. Occupational road risk is the term used to describe the dangers associated with driving as part of a job.

Key Features

DEFECT TRACKING AND RECTIFICATION

Accurate and easy tracking of reported defects through to rectification. Forward details to your workshop or 3rd party suppliers, helping to reduce vehicle downtime.

EASY TO USE APP FOR IOS AND ANDROID

Easy to use daily walk around checks app with real-time reporting. Carry out inspections, maintenance and daily walk around checks for all assets, vehicles, plant machinery and equipment.

CUSTOMISABLE CHECKLISTS

Create unique customised checklists for your fleet & assets. DVSA and FORS specific checklists are pre-loaded as default lists that you can also adapt to your business needs.

ACCIDENT REPORTING

Report accidents and incidents that may occur, recording vital information including 3rd party details, GPS location and photographic evidence. Email alerts are generated when an incident is reported and users can upload documents and additional notes via the CMS.

WORKSHOP MANAGEMENT

Schedule and manage workshop activities including inspections, services, preventative maintenance and repairs. Get a complete overview of upcoming work using the comprehensive calendar and planner. Track costs for all assets and users.

INSTANT NOTIFICATIONS

Get instant alerts and email notifications that can be set up to inform you of reports with safety fails, in-service/VOR reports and accidents/incidents, along with upcoming scheduled maintenance and other workshop activities.

SECURE END TO END AUDIT TRAIL

All your data is securely protected and cannot be manipulated, creating an end-to-end audit trail that can protect your business and employees.

EMPLOYEE RECORD MANAGEMENT

Keep up to date with licence and driver CPC details. Upload copies of important documents including course certificates and qualifications.

PAPERLESS SYSTEM

Eliminate paperwork and get instant access to historical reports. You can merge and export reports filterable by a variety of criteria including by vehicle, driver and depot.

REAL-TIME REPORTING

Get real-time detailed reporting for all daily walk around checks, inspections, maintenance work, tacho analysis, driver checks and grey fleet minimising time out of service. All reports are GPS located and timestamped.

COMPREHENSIVE PLANNER

Gain complete visibility of your fleet maintenance activities. Schedule events and tasks, track reports and inspections with filters for analysing specific data.

IMPROVED EFFICIENCY

Instantly advise workshop and maintenance teams and 3rd parties of any work required to rectify issues, so vehicles and assets spend the minimum amount of time out of service.
