

Fleet Supply Your Way

Changing your fleet can come with many challenges, often the task is consolidated to gain a suggested bulk discount or to fit around a specific supply type. This can then increase the total cost impact to your business which impacts cash flow and puts strain on other business decisions.

At Trio we believe that not only is every fleet different, but so is every vehicle and the role it plays in supporting your business.

Acquire

Price of your vehicle is impacted by one key area, commitment. The longer you commit, the lower the cost. This decision often pushes businesses to over commit leaving limited flexibility for business needs.

We offer customers commitment options from 1 Month to 5 years using rent/lease/purchase and all funding types. Through one relationship, you can tailor commitment by individual vehicle allowing a business to balance cost and commitment to flex for future needs.

Supply options from 1 Month to 5 years - Use a mix of rent/lease/funding to balance your commitment

Manage

Using our fleet and asset management portal through Fleet Support Centre you can take control of your vehicles. From daily checks to damage and accident recording your portal will give you a view of use and cost by vehicle driver or supplier. By focusing on the challenges, you ensure your time is invested in tasks that save money and reduce risk for your business and staff.

Portal Dashboard with bespoke audits and inspections. Clear data insight from costs through to compliance and maintenance

Improve

Using our online driver assessment and training portal, you can evaluate your drivers applying a risk score that can benchmark drivers within your business and also across the wider portal users. The risk score will automatically align training modules to your drivers to work on the areas of risk and train your drivers on how to improve. This increases engagement and supports reducing costs.

Driver Assessment portal with aligned training modules to increase knowledge, engagement and reduce risk

Trio's team understand that working together in a true partnership is the best way to support its clients. Through understanding business goals and aspirations, Trio can work alongside clients to ensure that maximum value is obtained through our experience and the data insight from the customers systems and services.
