

Dear friends and family,

Greetings!

As 2023 comes to an end, we want to share the news of Alpha Montessori School with you. We are amazed and excited by the changes we see in the children and teachers this year. Our long time vision for the school is coming to fruition as the depth of true Montessori education has taken hold and everyone has become deeply engaged in quietly learning with joy, focus and growth in all ways.

The garden has become a learning center for children of all ages. The younger children (ages 3-6) enjoy having garden as an indoor/outdoor part of their classroom. They water plants, wash leaves and pick dead leaves to make compost. They watch butterflies and enjoy watching flowers and growing vegetables. This is a perfect place for them to play with clay and do practical life activities. The elementary children study parts of the plant and classification with living plants in a more natural setting.

The nutrition program is thriving, providing one hot meal each day for children, teachers, and staff. They all participate in the preparation, serving, and clean up and look forward to it everyday. The meals constitute variety of seasonal vegetables, fruits, nuts, and healthy grains. The meals are carefully designed to meet nutritional needs and

everyone appreciates it. Along with consuming the nutrition, the children are also getting education about its nutritional value. After the meals, the children take pride in washing dishes.

The elementary children are learning two languages, math, geography, history and culture as a part of their curriculum. All of this is learned through hands-on activities. Our graduates still visit us often and are very happy to give us a helping hand. They are all doing well in their lives!

One of the coolest things happening in the school is the exponential growth of the teachers' education. Their education has been at the heart of our school. In the past year, under the guidance of our elementary head teacher, Ms. Anita, the teachers have been learning English. This is changing the environment in wonderful ways. The teachers are gaining a deeper understanding of all the subjects and have learned to openly express their feelings, something unheard of in India. The attached pictures of their hand written cards show their expressions and passion. The school is becoming a working experimental laboratory for children, teachers, and staff. Each one is engaged in a study according to their age, interest and capability.

We thank you for your support of Alpha School. Your warm wishes carry us through and brighten our days. We wish you sweet holidays, imbued with thoughtful caring and love.

Warmest Regards, great thanks, and abiding Love,

Amita and David

Dear Anita mam,

Thank you so much,  
Whenever you come we always  
get to learn a lot of new  
things. Which brings great  
progress to me and along with  
this children also. You are a  
Scientist who always makes  
new discoveries for the  
development of children. Which  
changes the way I look at children.

I pray to God that you always  
remain healthy and may your  
blessings be upon us.

Thank you so much.

Sumitra maurya.

Happy journey mam.

Thank you dear ma'am

When you come to the  
school time to time which  
change my personal and profession  
at life. I dear my opticals in  
this training session of math's  
program and reiving english  
program. So again thank you  
so much with full of gratitude.

Deepa

Keep  
Smiling

Happy Journey 22/10/2022  
mam

Thamku mam

You are god gift mam. mam  
You are a very peace full. You  
are our strength. When you  
came you bring lot thinks - I  
learn a lot of new Thinks. So  
Thanks coming mam. Your smile  
beautiful mam. I will waiting  
for your next session mam. Thank  
mam

Dear,  
Anita Mam.

Thank you for inspiring me. You are  
very kind, compassionate and courage-  
ous woman.

You believe in me that gives me, the  
strength to work.

In this training session, I experien-  
ced detachment. That is wonderful.

You ignite the path of discovery,  
happiness and creativity by work.

Things are very simple with these  
elements.

I will never forget your support

and kindness.

Again I would like to say  
"Thank-You" with full of  
gratitude.

Neelam Bartwal.
