

2025 PREMIUM SEED CORN

VT Double Pro® RIB Complete® Corn Blend Hybrids

All VT Double Pro® RIB Complete® Corn Blend Hybrids feature:

- Roundup Ready® 2 Technology
- Roundup Ready® flexibility and protection from above ground insects, including Corn Ear Worm, Fall Army Worm, European and SW Corn Borer
- Refuge-In-Bag (RIB) makes refuges simple and convenient
- **All hybrids come treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-319RR VT2PRO RIB

- RM 101-102 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield

SX-553RR VT2PRO RIB

- RM 107 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil.
- Works well with not-till, minimum-till, and conventional situations.
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

SX-609RR VT2PRO RIB

- RM 109-110 day
- **Roundup Ready® 2 Technology**
- Protection from above ground insects
- Outstanding yields with very good test weight and kernel depth
- Excellent early vigor works in no-till and minimum-till
- Excellent roots with very good stalks
- Medium height plant with very good fall intactness
- Super disease package with good GLS and NCLB tolerance

Roundup Ready® Corn 2

SX-320RR

- RM 101-102 day
- **Roundup Ready® 2 Technology**
- Same genetics as SX-319RR VT2PRO above but without the insect protection

SX-610RR

- RM 109-110 day
- **Roundup Ready® 2 Technology**
- Same genetics as SX-609RR VT2PRO above but without the insect protection

2025 PREMIUM SEED CORN

PowerCore® Enlist® Refuge Advance® Corn Hybrids

PowerCore® Enlist® Refuge Advance® Corn Hybrids feature:

- Broad-spectrum above-ground insect control with three distinct modes of action
- Stacked with the Enlist® corn trait
- Builds on glyphosate system with additional tolerance to 2,4-D choline in Enlist® herbicides, glufosinate and FOP herbicides
- Refuge-In-Bag (RIB) solution with 5% refuge, more high yielding corn per acre
- RIB makes refuges simple and convenient
- **Treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-454PC ENLIST RIB

- PowerCore® Enlist®
- RM 105 day
- Roundup®, Liberty®, and Enlist One® herbicide tolerant
- Protection from above ground insects
- Very impressive disease package, including tar spot
- Tremendous health and intactness with strong stalks
- Widely adapted with long girthy ears and high test weight
- Works well in heavy tough soils
- Performs well in no-till and minimum till situations
- Excels in highly productive soils

SmartStax® RIB Compete® Corn Blend Hybrids

SmartStax® RIB Compete® Corn Blend Hybrids feature:

- **Roundup Ready® 2 Technology**
- **LibertyLink® herbicide resistance**
- Refuge-In-Bag (RIB) solution with 5% refuge, more high yielding corn per acre
- RIB makes refuges simple and convenient
- Protection from above ground and below ground insects
- **Treated with Acceleron®** which includes Poncho for insect protection and four different fungicides to protect against soil and seed-borne diseases

SX-584RR STAX RIB

- RM 107 day
- **Roundup Ready® 2 Technology**
- **LibertyLink® herbicide resistance**
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil
- Works well with not-till, minimum-till, and conventional situations
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

2024 GMO Seed Corn Test Plot Data

Planted 5-22-24, Harvested 10-30-24, Monroeville, Ohio

VT Double PRO® RIB Complete® Corn Blend

Above Ground Protection, Single Bag Convenience

MODES OF ACTION COMPARISON CHART

	VT Double PRO® RIB Complete® Corn Blend	Herculex® 1	Optimum® AcreMax®
PRIMARY PESTS			
European corn borer	**	*	**
Southwestern corn borer	**	*	**
Fall armyworm	**	*	*
Corn earworm	**		
Black cutworm		*	*

** Dual-mode activity * Single-mode activity

- ✓ Two ways to control earworm
- ✓ Blend of 95% traited, 5% refuge seed means no separate, structured refuge required in the Corn-Growing Area
- ✓ The truly simple refuge-in-a-bag solution: just fill your planter and go

Three kernels damaged per ear can equal one bushel lost per acre

2025 PREMIUM SEED CORN

CONVENTIONAL HYBRIDS

SX-152

- RM 95-96 day
- Dominant yield performance for its maturity across all environments
- Very girthy flex ear adapts to moderate planting populations
- Medium statured hybrid with very good roots and stalks with very good standability
- Outstanding grain variety that also works well for silage

SX-239

- RM 101-102 day
- Wide adaptability moves across various soils
- Excellent early vigor for minimum tillage and early planting
- Medium-tall plant with very good stalks and roots
- Long ears with good kernel depth with excellent test weight and yield

SX-495

- RM 105 day
- Medium-tall with above average stalks and roots
- Long ear with excellent flex and big kernels
- Increased health, better on leaf diseases and good late season stay green
- Moderate population will work best as plant has above average ear flex
- Handles stress well, moves across all soil types, and very versatile

SX-523

- RM 106 day
- Wide adaptability with consistent high yield performance
- Very good emergence and seedling vigor for cold soil.
- Works well with not-till, minimum-till, and conventional situations
- Very good drought and heat tolerance
- Works well across all soil types
- Uniform long girthy ear with good flex and average test weight

SX-574

- RM 107-108 day
- High performing hybrid with excellent agronomics
- Very Strong disease package including Goss's Wilt and Tar spot
- Medium long girthy ear with very good grain quality and test weight
- Widely adapted across soil types and works with a wide range of populations

SX-579

- RM 109-110 day
- Outstanding yields!
- Very good test weight and kernel depth
- Excellent early vigor works in no-till and minimum-till
- Excellent roots with very good stalks
- Medium height plant with very good fall intactness
- Super disease package, good GLS and NCLB tolerance

SX-630

- RM 109-110 day
- Shows impressive early growth
- Strong stalk & roots
- Excellent conventional or no-till choice
- Large girthy ears
- Good dry down and staygreen
- Adapts well to various soil types, and excels with high management

Most hybrids can be treated with Poncho® 250.

See page 8 for details.

- Provides seed and seedling protection against all seven major early corn insect pests, up to the 5-leaf stage.
- Contact and systemic activity is a highly effective broad-spectrum insect control.

Always read and follow label directions.

Poncho® is a registered trademark of BASF Corporation.

2024 Conventional Seed Corn Plot Data

Planted 5-22-24, Harvested 10-30-24, Monroeville, Ohio

Poncho 250

- Covers all seven major early corn insect pests, up to the 5-leaf stage.
- Provides seed and seedling protection.
- Contact and systemic activity offers highly effective, broad-spectrum insect control.

Yields 9.7* bu./ac. more than seed not treated with an insecticide

**Based on 526 side-by-side field trials comparing the performance of Poncho 250 treated seed to seed not treated with an insecticide.*

Always read and follow label directions.
Poncho® is a registered trademark of BASF Corporation.
