

Terminal blocks are an essential component of any infrared heating system, providing a safe and secure way to connect electrical wires. Our in-house manufactured terminal blocks are designed to handle high temperatures and demanding environments, making them ideal for infrared ovens and other industrial heating applications. They ensure reliable electrical connectivity, simplify maintenance, and enhance system safety by preventing loose or exposed wiring.

#### Technical specification

Material	Steatite C-221
Dimensions	42 x 32.5 x 19.5 mm
Average weight	38g
Packed Weight	400g (per 10)
Maximum Voltage	500 V
Maximum Temperature	450 °C
Maximum Cable CSA(Solid)	4 mm <sup>2</sup>
Maximum Cable CSA(Stranded with ferrule)	2.5 mm <sup>2</sup>
Maximum Current	20 A Up to 30 A permissible at lower temperatures.
Standards	CE

SECTION A-A

M4 fixing hole
