

## CANCER BY DAVID HINKSON

During the early 40's Dr. Royal Raymond Rife worked with Nicola Tesla to actually create a define a new type of electromagnetic Wave; that was actually formed into a very sharp razor spikes. In fact they defined these wave concepts into three main categories, as Square, Normal and Spiked (sign waves). Note that in the 90's there was a man who worked to cure his own Cancer using radio frequencies, and he never even notice that this work had already been invented by Mr. Rife. In the end he failed and died of Cancer, never realizing that he was using a wrong wave formation. It is my opinion that the Propagated Wave Formation must have a sharp spike or it will not be able to do the job, of killing these many different kind of Pathogens. We don't have to reinvent the wheel as sometimes we need to just remember what has already been invented in the past, as we move forward.

So in the past I purchased a "Signal Generator" that even had the frequency on the LED Screen. Then I went to Radio Shack and purchased some, Chokes and Capacitors and using my Oscilloscope actually got the output signal to be all spiked. I then hooked up the two wires to two stainless steel plates and placed one foot on each of them, and I used these frequencies throughout my entire body.

Then, Mr. Rife invented the "Universal Prismatic Microscope", that used mirrors and sun light in such a way as to not destroy or kill what was being actually studied. This new Dark Screen Microscope was and still is the most powerful microscope that has every been built, as it amplified his view up to 60,000 times! This allowed him to actually view the live Viruses in a totally controlled environment. He then went through each of the over one thousands different frequencies and categorize that every Virus, Bacterium, Parasites and all other Pathogens were particularly sensitive to their own specific and defined "Electrical Magnetic Frequency; and thus can be destroyed by intensifying that frequency, until it literally exploded them, and shatters them like an intense musical note can shatter a wine glass! In order to shatter these Microorganisms, Rife invented the Frequency Beam Ray Machine. He learned that any species of life has its own Electromagnetic "Signature" - a pattern of Oscillations based on its individual genetic chemical blue print. It's different for all life forms. This instrument is based on Dr. Rife's quest to study the unique Electro Magnetic signature of Viruses, Bacteria, Parasites, Fungi and Cancer, and the experimentation using frequencies to destroy them.

A report from the Smithsonian Institute in 1944 validates Rife's work. It is titled. "The New Microscope" by Dr. R.E. Seidel (report #3781), and states that "under the Universal Microscope disease organisms such as those of Cancer and other diseases my be observed to succumb when exposed to certain lethal frequencies..". The Universal Microscope was used to actually watch the Viruses, as the Frequency Generator actually killed certain cells that were infected with Viruses, and were thus Cancerous.

Although he achieved remarkable success with frequencies, Dr. Rife also did many studies in attempting to grow Cancer from scratch. There was one sure fire method that caused a tumor to start to grow every time, as he could inject a Virus into a cell on a rat and then send a bit of X-Ray Radiation into the cell; then the Virus would immediately cause cell mutation and the cell would start breathing Nitrogen, and thus a Tumor would start to grow. It is my opinion that all Cancers are in fact just one of your Aerobic Cells that used to breath Oxygen, and now it has now been converted into breathing

Nitrogen, and now it is called a Cancer. This in my opinion is the real definition of what all Cancer are and should be addressed as.

All Oxygen Breathing Cells can be converting into being Nitrogen Breathing organisms easier if they are first poisoned with some kinds of industrial chemical. However, Silver and Copper both Kill Viruses, and proper Zinc levels can actually stop replication of the Viruses; and it is this Zinc Concept that can also eventually remove all Viruses as they will start to die off of old age after 10 days. Note that normally all Viruses can now longer Sexually Replicate after 10 days. Therefore, it has been proven that if you have proper Zinc and Copper Levels you might have have no viruses in your system. Is it any wonder studies have shown that high Zinc levels in men can reduce Colon Cancer, but the question now becomes what is the correct level of these Minerals. Note that taking the recommended RDA levels in my opinion, do not necessarily provide any real protection against Cancer.

There are a lot of different concepts that can be used to kill cancer cells. Sometimes it has been shown to be a good idea to use more than one concept, especially if the concepts being used are non toxic, and if a type of treatment is actually toxic, you would need to assess just how toxic it is on the liver, and maybe consume some Alpha Lopic Acid to help to mitigate any damage that might be done to the Liver.

One of the most serious poisons is Dioxin. Dioxins are created when you bleach and then burn bleached substances. For instance, Plastic is made by chlorinating Oil or Petroleum products. Burning Plastic generates Dioxins. Freon is actually made by Chlorinating Propane. Also, burning Freon produces Dioxins. I believe that when you smoke and burn the actually White Bleached Cigarette Paper, you are releasing Dioxins into your system from the burning White Bleached Cigarette Paper; and this is much worst than breathing the burning Tobacco. Maybe this is why smoking Cigars has bee shown to not cause Cancer as often.

The human diet is threatened by ingestion too much acidic foods. Consumption of Lemon Juice actually creates more Alkalinity not acidity. The overall pH (pH = parts Hydrogen) of the body is supposed to be alkaline at 7.2. Blood can carry many different types of gases and not just Oxygen and/or Nitrogen. Water and/or Blood can only carry so much of these gasses, so if you increase the Hydrogen/Acid levels the Oxygen levels can drop or fall. If you, for example, pour vinegar into a fish tank the fish will all die of asphyxiation or lack of Oxygen, as the water can longer can hold or carry Oxygen Molecules. Your overall body system is supposed to be at 7.2. Any poison that is ingested into the body when the pH of the body has been lowered is many times more toxic, and this can also help a Cancer Cell get started. Farmers use HCL (Hydrochloric Acid) when spraying insecticides to increase the overall killing power of the applied poison. Lowering the pH also increases the cleaning power of soaps. So in summary, every poison is much more toxic to your body as you lower the pH of your overall body system. Also Nitrogen Breathing Anaerobic Pathogens and/or even Plants, like Trees or Grass cannot live any environment that is above 6.7 Alkaline, on the pH scale. So as long as the overall pH of the human body is at 7.2 Cancer can not get started growing. As the body's overall pH is lowered and becomes more and more acidic you chances of getting Cancer or tumors are increased overall.

One should avoid all food products that contain Acid Preservatives such as Soda's, that have "Citric Acid", or even Phosphoric Acid in them; as both can lower the body's overall pH levels. Note that Citric Acid is not Vitamin "C", as Vitamin "C" is known as Ascorbic Acid). You will find that these two different Acids known as Citric Acid, and Ascorbic Acid are two different distinct types of acids, as Citric Acid is not

only not usable by the body system, but it also has many negative side effects, including Acid Reflux Disease, Weight Gain, and increasing overall toxicity, as all know Poisons will become more toxic to the entire Body System. In fact Citric Acid is a preservative (manufactured by Monsanto), that lowers the overall pH of the entire body system. Consuming Citric Acid will lower your overall pH, and this can help to get Cancers started.

Cancer breathes Nitrogen, but overall, no matter how much bad Nitrogen you have extra in your system it does not effect the pH of your Blood; as the Human Body will always keep the pH of the Blood in balance at 7.4. But everywhere else in the Human Body that becomes too acidic, can now develop a shortage of Oxygen, as the Hydrogen will actually replace the Oxygen levels. This can further help Tumors get started.

One of the most affected area of being too acidic is the Lymph system. If this system is too acidic, Tumors can start there. Any cell that is damaged or poisoned will attempt to repair itself. But once a cell converts into or becomes an Anaerobic Breathing Cancer Cell, it is your enemy. Also the elemental correct form of Calcium, can be used to flush these Hydrogen Waste products (also known as an Acidic Crystalline Nuero Toxin) from your cells and Lymph system.

When you're usable Calcium Blood Serum Levels become depleted, as they attempt to remove the acidic waste products, the toxins now are left in the cells, and thus weaken the defense of the cell. As you can see, a lot of the concepts are overlapping. Some people say if you want to get rid of your Cancer just raise the pH of the overall body system. But I found that once a Cancer Tumor gets started growing, like all living things, it will attempt to protect and defend itself. So just raising your pH is a good thing to do and can maybe prevent Cancer from ever getting started, but it is not the cure at the later stages of this disease.

ALPHA LOPIC ACID: Was discovered by the Czech Republic during the 70's. They discovered that they could get a person who had Serosis Of the Liver, to generate a whole new Liver (30 days). I can remember a story about an intern who was working in a Death Clinic In Arizona (clinic where people 100% die - i.e. mushroom poisoning). He had heard about the Alpha Lopic Acid and had his Pilot friend picked up some in the Czech Republic. When the Alpha Lopic Acid was given to the patients in this Death Clinic he ended up saving all of these terminal patients.

This whole concept is very interesting as a lot of different Cancer treatments that are very effective can be toxic to the Liver. Of course it really matters how toxic it is and how much of it needs to be taken. For example it only takes about 10 milligrams a day of Hydrazine Sulfate to abate most cancers (see the Kathy Keeton Story). Therefore, yes the Hydrazine Sulfate is toxic and comes with a Skull and Cross Bones on the label, but 10 milligrams is not a very large dosage, as this is an overall small amount.

I also like the idea of sometimes taking two substances that are just a little bit toxic, instead of taking more on a single substance. For example if you were to take 10 Milligrams of Indium Sulfate along with 10 Milligrams of Hydrazine Sulfate that would be a great slightly toxic combination.

Then there are some products that can be used to abate Cancers that are really not toxic at all, and it still might be a good idea to consume some Alpha Lopic Acid to help the body heal and to help destroy cancer cells; as the liver is needed to help the overall process anyway.

Now the current method for medically trying to deal with Cancer, is that they use extreme chemo poison or even Radiation to attempt to kill that Cancer, and they hope that they kill the Cancer before the poison kills you. I really don't like this method and disagree with how they are doing these treatments. I think that we need to have our treatments become more targeted and only target the Cancer. But the problem overall is that Cancer Cells will try to defend them selves against some of the treatments that are targeted to kill it. Note that any element that is alkaline on the scale above 7 (and kept under 10.5), can be shown to actually kill Cancer Cells, but the Cancer Cells will protect them selves by excluding the material from entering into the Cancer Cell. For example, In the past I had the idea of Ozonating a Sugar Solution, and this concept made the Glucose toxic for the Cancer and yet the Cancer could not help itself as it would consume Glucose that had Ozone attached to it. So, I used to add Honey and or even Maple Syrup to this mix with the Glucose, along with some Baking Soda (to provide the Alkalinity), then Ozonate the whole mix; and this overall mix was not toxic at any level. This could be a good starting point in the treatment some Cancers conditions.

**SODIUM BICARBONATE:** Another way to raise the body's pH very fast is to use Sodium Bicarbonate as a treatment (Baking Soda). Every Cancer patient and every health care practitioner, should know that oral intake of Sodium Bicarbonate offers an instant and very strong shift of pH into the alkaline. This tells us to take very seriously the oral use of Bicarbonate for Cancer Treatment. The International Medical Veritas Association has published an article on the use of Bicarbonate and Maple Syrup. (See director International Medical Veritas Association: [Http://www.winningcancer.com](http://www.winningcancer.com). Honey and maple syrup both are absorbed by the body directly into the blood stream. When Bicarbonate is added to Maple Syrup, the Cancer Cells gobble up the Glucose, receiving a dose of Alkalinity and the Cancer Cells will die. Use 100% pure Maple Syrup or Honey. Mix one part Baking Soda with three parts Maple Syrup in a small sauce pan, while Stirring and gently heating the mixture for five minutes. Take at least one tablespoon of this mixture daily. Or take one Tablespoon up to three time a day.

I believe there are three levels of treatment for Cancer: 1st, we have the "Natural Herbal Method." 2nd, is the "it's just a little bit poison method". 3rd, is the main stream doctor, "burn, poison and cut it out method," that tries to kill the Cancer before you die. Then, the Doctors also use Radiation Treatment, when it was probably radiation that converted or transmuted your cells into being Cancer in the first place.

**LAETRILE IS ARSENIC:** Twenty year ago a doctor came up with the laetrile concept. Laetrile comes out of Peach, Apple and Apricot seeds. Small amounts of it will not hurt you, and it is also listed as Vitamin B17. My research has shown the B-17 is excellent as a Cancer preventative, but once a tumor starts growing and starts protecting itself, I discovered that the Laetrile is not as effective. But, if a person would mix the Laetrile with Glucose and maybe even Ozonate it, you could have great results. Steve McQueen went to Mexico when he was diagnosed with Cancer, to get Laetrile treatments, and he still died. The media lied; he did not die of Cancer as the Laetrile treatments did actually work. He died like Kathy Keeton as he went in for cosmetic surgery on polyps, and he was put under so deeply, he never woke up.

I have recommended that people order bags of Apricot seeds and take four per day to insure against the start of Tumor growth. Also if you are going to start any Cancer treatment it is good to take 10 Apricots Seeds a day. In my opinion Apricot Arsenic in small doses can help stop Cells from beginning

the mutation process in the first place. So it is a good maintenance program. There are some Herbal formulas that do a good job killing Cancer, if you have more actual time.

**BLOOD ROOT:** One product that was made by an Indian Woman who live on the Oklahoma Reservation, was called Black X, but she was arrested for selling it. I later learned that one of the main ingredients in this product was Blood Root and Zinc Chloride. There is a similar product offered by a company in Winnemucca, Nevada called Canex. Although they make no claims the main ingredient is Blood Root. The product comes as pills or salve. The product in my opinion really works. I put some salve on a skin Cancer and put a Band Aid over it; I went to sleep and forgot about it. There was no pain or itching involved. Then twenty four hours later, in the shower, I pulled off the Band-Aid and a half inch of Tumor fell out of my left arm, and I now had a half inch deep hole in my arm. At this time I kept a Band-Aid over the hole, that had a drop of Tea Tree Oil on it. It took three months for the hole to totally close up, and I noticed that there was a white ring of skin around the outside edge of the hole. This white ring kept moving inward until the entire hole was finally gone. Canex also seems to remove most of the pain associated with Cancers.

**SHARK CARTILAGE:** Some people were consuming Shark Cartilage pills to fight tumors, as they said that Sharks don't get Cancer. I discovered that Cartilage, especially from Sharks, is very high in Sulfur. This concept seemed to help just a little. Possible sharks to not get cancer because they live and swim in Salt Water, as Cancer does not like Salt. Note that Salt has Chlorine in it, and this is why Salt is known to kill most Viruses and Funguses. Salt is also known as a drying agent as it tends to dry out the Nitrogen Breathing Pathogens, and that is why it was used as a food preservative for thousands of years.

**SKIN CANCER PRE-TREATMENT:** If you have Skin Cancer you can start by filling or lightly sanding the surface of the Tumor with sand paper, or a fingernail file, or you could scrape the surface a little bit, and/or even rub salt water or Ozonated Lemon Juice with Glucose into the exposed Cancer, and the Cancer will not be happy.

**OZONATING LEMON JUICE:** Salt was not as effective as using Ozonated Lemon Juice. I Ozonated Lemon Juice for 24 hours, put in a pinch of Sugar in it to bait the Tumor and rubbed this Ozonated mixture on my face three times a day. Skin Cancer died fast and facial skin wrinkles and other skin problems disappeared like magic. But I used to keep this Lemon Juice in the refrigerator between treatments. The Ozonated Olive Oil test failed as the skin Cancer grow faster when applied. So I do not recommend Ozonated Olive Oil for treating Skin Cancers.

**MILD POISONS FOR CANCER TREATMENT:** Some of these mild treatments, will make any Cancer sorry it ever bothered you. But when I say mild poison, I'm referring to any product that can effect or poison your liver even slightly; at any level. So remember that you can and should always take Alpha Lapoic Acid to offset any negative effects of consuming any product, that is listed as a poison, especially if it is toxic to the Liver.

Dr. Gold was interviewed in New York by Kathy Keeton. (See <http://www.hydrazinesulfate.org>). Kathy was a reporter for Penthouse Magazine and the wife of the owner Bob Gluccione. She wrote an article about Dr. Gold's new Cancer treatment that appeared in a 1999 copy of the Penthouse magazine, titled "100 Billion Dollar Cancer Scam". At this time she even helped arrange a class action lawsuit against the American Cancer Society. The article was well written and very informative, and that is why Dr. Gold

ended up fleeing the United States and is now practicing medicine in St. Petersburg Russia. Her written Article claimed that Dr. Gold's new treatment was successful, at removing even the worst Cancers.

A few months after Kathy wrote a second Article about Cancer, and then Kathy herself was diagnosed with galloping Breast Cancer. I guess it was called galloping because it was spreading very fast - and they told her she had less than two months to live. Her regular main stream Doctor, wanted her to start immediately taking the standard "Chemo" treatment. Kathy ignored her doctors, and flew back to New York, and was treated by Dr. Gold. He gave her 90 mil per day orally. Again this Hydrazine Sulfate, is listed as a poison when you buy it, but the dose taken was small enough to be only a minor problem. It can be bought from any chemical supply house. Kathy followed Dr. Gold's advice, and six weeks later lost her "incurable Cancer", testing clear of all Cancer. Instead of dying, in six weeks she got 100% better. Note here that Hydrazine Sulfate is an Acidic Sulfur Compound. (It is Sulfur bound atomically with Hydrogen). Now, if I was to try this method again, I would mix it with some kind of Glucose and maybe Ozonate it.

Then a few months later Kathy Keeton went to the hospital for elective surgery, that had nothing to do with Cancer, and she died on the operating table because as they admitted, the anesthesiologist gave her too much anesthesia. I do not know if her death was truly an accident, but I do know that she had been cured by this remarkable Sulfur Treatment.

#### INDIUM SULFATE:

I also had heard about a Mineral Supplement product that was being sold called Indium. They were claiming that this Indium would cure everything known to man. Although sounding "way out", they also were claiming that Indium was the element that would allow a man to live to be 900 years old, and that it had been removed from the plants after the great flood. These many claims piqued my curiosity, so I played with this new mineral (#49 on Periodic Table). I bought some of their Indium product. But it made me extremely upset, angry and anxious, and it further caused me to not be able sleep for three days. I later learned that anytime you take any product that poisons the Liver you can become very irritable, not be able to sleep, and be depressed. I have since met other people who took some of this Indium (Sulfate), and they reported similar relations. Indium Sulfate is actually a mild Liver Poison. When I woke up four morning later, the last of my tumors (the one on my Thumb), was loose and sore, and had a red ring around it. I grabbed it, and pulled it out of my Thumb and

a three inch root came out with it. I later learned that this was type of Cancer is called a Cancer Wart. These are horrible, as they just eat you up, and the roots can travel a large distance.

After doing a little more research, I discovered, that the Indium Sulfate that I had consumed, was not a product like I made at WaterOz, as I was processing my raw Hallmarked Minerals, instead it was Indium Sulfate. So pay attention to the actual type of Element that you are consuming, as the Compound that you think is an Element, might not necessarily be the same. For example, just because you drink water does not mean that you are drinking a glass of Hydrogen Gas and just because there is Hydrogen Gas in water does not mean that you can breath Water as you might drown; and note that just because you are consuming Calcium Carbonate as a Calcium Supplement, does not mean that you are consuming any usable Calcium. The Medical profession leaves most of us in a state of total confusion with disinformation.

However, Dr. Gold was using Hydrazine Sulfate to abate Cancer, and I used Indium Sulfate. Note that both of these two compounds are Sulfur based and both of them are listed as being a poison. So, I was the first person, who discovered that Indium Sulfate, like Hydrazine Sulfate will remove and kill Tumors. So, in the future I would have people use the Hydrazine Sulfate and the Indium Sulfate together in small dosages, to mitigate their Cancers. My test in the field have now shown that the Indium Sulfate appears to do as good of a job at killing Cancers, as the Hydrazine Sulfate, but with one main difference, Indium is more excepted by the Glands, and therefore, I think it can kill Cancer even better in the Glands, than the Hydrazine Sulfate. In my final work and testing, I found that it took less overall Indium Sulfate to do the same job at killing Tumors.

You can order either of these products directly from any Chemical Supply House cheaply (Spectrum Chemical is a good source). You can also order a small 10 mg spoon (1/8 inch in size). Kathy Keeton was taking an equivalent of three of these spoonfuls daily to totally kill her Cancer in six weeks. I believe from my experience in the field overseas and on experimenting on myself, that you can take a lot less of the poisons, if you supplement your treatment with the Blood Root and Apricot Seeds. The Blood Root product is only taken at 10 mg/day. Just a little bit goes a long way. Or you can take the Canex with the Apricot seeds. Note the cheapest place to buy the Blood Root by the pound, is on the Church of Wicca Website.

Upon reflection, I would start out with 10 Apricot Seeds, three 10 mg scoops of Indium Sulfate, and two Canex pills. If all you have is Indium Sulfate and Apricot Seeds, I would still start out with three 10 mg scoops of the Indium Sulfate/Hydrazine Sulfate. After the first week you should see a major death rate of the Tumors. It is better to kill them slowly as long as they are dying, and if more is needed, you can always raise the daily dosage slightly. All the Cancer should be dead in six weeks. It is very affective so you need to be careful and start with less especially when treating Brain Tumors. If you kill a Brain Tumor to fast, the dead mass of Cancer cells can overtax the Brain. That is why it is important to move slower with Brian Tumors. Note that if you were to kill the Cancer in the Brain to fast, you might experience a condition known as a Herxhimers reaction. This means that the decomposing Cancer Matter is making you even sicker, and this could actually lead to death. But remember, if you take the correct type of Calcium, this Calcium can now absorb these Crystalline Nuero Toxins.

LEUKEMIA: Leukemia is easier to deal with if you use a mineral that has the ability to travel everywhere through the entire body system were there is moisture. So, here we note that it is the Calcium Copper and Zinc mineral products, that have the ability to travel everywhere through the entire body system, and in fact go anywhere where there is moisture, and this includes the Blood Brain Barrier, Spinal Fluid Barrier and even the Lymph System. Note here that it is Lymph System fluids are provided into the eyes, sweat and even the fluids that's are secreted into the Lung System known as Flem. So it might be advisable to use either Calcium, Copper and/or Zinc mixed with Ozonated Glucose or some of the other things that we have talked about in this written Article. The important thing to note here, is that anything that is mixed with the liquid Calcium, Zinc and/or even the Copper will be able to Cross all of these different Barriers.

COPPER: Copper not only can cross the Blood Brain Barrier, but when a man consumed non toxic Copper Water, he lost his Lymphoma Cancer. He had consumed about 8 ounces a day for 30 days and then got retested and got the negative results for Lymphoma.

There was a book and video offered by a Mrs. Day, called Cancer Does Not Scare Me Anymore. I liked her book. She was able to remove her Tumors, but on her video she had listed items to avoid eating to an extent that I could not find anything that I wanted to eat. The main thing in my opinion is that we should eat foods that are as unprocessed as possible.

Also, consuming WaterOz Indium keeps the Pituitary Gland in balance and this alone could help to mitigate a Tumor, but it is the poison aspect of the Indium Sulfate that really kills the Nitrogen Breathing Anaerobic Pathogens and Virus.

It is my opinion that

TURMERIC: is found in Mustard. It is non toxic and it is; used by the Indians in India to make their Curry Chicken recipe. This spice called Turmeric 100% has been shown to stop Cancer from growing and it can actually kill most all Tumors. You can buy this in the grocery store and consume a tablespoon every hour all day long with no negative side effects. Note that the Cancer levels in India are very low as they overall consume a lot of this spice. Taking a Tablespoon of Turmeric once a day is also very good as it can get rid of excess insulin as it seems to also balance and control the pancreas ability to control Insulin levels. I know for example that when I become Hypo Glycemic and take a spoon full of Turmeric my Insulin levels immediately drop to normal and I can then go to sleep. Therefore, overall this is a great product to help you put overall insulin back into balance and this alone can help you sleep better and get to sleep sooner. I really like taking this product as a supplement as it makes me feel great.

Note that the Element known as Copper is also used by Cancer Cells to build new veins. This is why one person stopped consuming the Copper. I think that is a stupid concept as Copper also is known to kill all Viruses and Parasites and I think that most Cancers are in fact caused by a Virus entering the cell, and I would even call Cancer a Parasite. So maybe Copper is used to strengthen your Arterial System and Collagen in the skin, but I know that Cancer really hates the Copper, and after thinking about this subject I really think that consuming a non toxic Copper product is just the right thing to do as I know that Cancer Cells, Viruses and Parasites are all mitigated and can be killed by Copper. So in summary here it might be smart to mix some of the other concepts with the Copper, especially if the Cancer has no choice but to try to use the Copper to build the Blood Vessels.

HYPERBARIC CHAMBER: As is used to treat skin divers that get a disease called the "Bends" (Bends is caused when a diver comes up faster than the air bubbles), can be used to kill all Cancers in two hours; by increasing the Oxygen Levels in the chamber and your system while you are sitting in it. What you do is increase the pressure in the Chamber to three Atmospheres (90 lbs per square inch), you will find that the Blood can no longer carry any Nitrogen Gas; while at the same time you are increasing the Oxygen levels, to maximum during this time duration. Now as all Virus and Cancers breathe only Nitrogen they will start to die as they can not breathe. When you are pressurized in a Hyperbaric Chamber, all Nitrogen can be replaced with Oxygen and you might feel a little bit high. But here is the point. Can you imagine that Steve Jobs with all of his money could have taken a vacation in a location where they are skin diving and cured his Cancer in two hours. What good is having all of that money if you don't know how to just stay alive.

I myself would really like to own my own Hyperbaric Chamber. I know that Michael Jackson owned one. I also heard that Magic Johnson has one. Maybe this is how he removed the Aids from his system. Here note that a Hyperbaric Chamber can be used to remove any and all Nitrogen Breathing Pathogens.

I think that a person could buy a used one for the price of a car. Maybe more of them should be available.

Dave
