

. My name is David Hinkson. I have been a provable Political Prisoner for 16 years. I now listen to your show ever chance I get but it have not found it in KY. I'm not writing you this letter to ask you for any specific thing, as I would just like to make some clarifying points about Colloidal Silver and express my opinion about Silver products in general. First note that I studied Chemistry to a large extent while going to College, and I have read many College Chemistry Books over the years as this has been one of my passions. I worked with the late Douglas Noland who was a mining expert in Las Vegas and we working together and actually got the Mono Atomic, so called White Gold, to become real yellow Gold, and we also took real yellow Gold, and turned it back into White Powder Mono Atomic Gold. This has never been done before by anyone that I know of. I thought you would know about Mono Atomic Gold, as Art Bell used to talk about it on the Coast to Coast years ago. I even interview a man named David Hudson on my talk show, who claimed that he discovered the Mono Atomic Gold. What I'm trying to tell you here, is that I had become an expert in the field of Mineral Supplements and the associated chemistry. I also have a degree in Naturapathe. As for credentials, I was doing such a good job in my field, that the FDA targeted me and put me in prison just to shut me up (43 years).

You might find some my comments very interesting, as in the past, I actually went to Russia to do clinical work for the Doctors Without Borders, and I also worked exclusively with Doctors, who work for the Doctor Without Borders. I guess you could say that I think that I'm the foremost expert in the world on Infectious Diseases. I did many Clinical Trials in many countries including the Dominican Republic, Haiti, Swaziland, Ukraine and Russia; as I worked with a man named Anton Botha (Botha diamond mines South Africa). I have given lectures on Infectious Disease in all of these countries to regular Doctors. My last lecture was in October of 2002, as I spoke at the Infectious Disease Symposium in Xharcove Ukraine, to over 250 Russian Speaking Doctors. In attendance at this time were two Surgeon Generals (Belarus and Russia) and my interpreter was the late Roman Ponomarenko.

In 1988, I started doing my own talk show called the David Hinkson show (on the WWCR), and I was on the air right after Bill Cooper (Behold the Pale Horse). I found like you, that it takes a lot of funds to stay on the Air (\$10,000 a month - just for WWCR). So, while I was attending and speaking at a Whole Life Expo about Ozone Therapies, I met a well known man named Bob Beck, who was giving a lecture on Colloidal Silver, and he invited me to attend. Bob was selling a machine that made Colloidal Silver using electricity. During my visit with Bob he told me that I should start making a Silver Product, and that I could sell it on my talk show; to pay for air time. He kind of challenged me to do this at this time.

Then about one year later, I was again attending another Whole Life Expo and this time I brought with me a sample of some Silver Water that I had just finish creating. Then, again Bob came by my Booth, where I was selling Ozone Machines (for \$300.00), and at this time I pointed at the eight ounce Kerr Jar (glass) sitting on the table, and said, here is the new Silver product that I created, as you challenged me to do. And he said: "What is that, that can not be Silver Water, as it is totally clear?" I responded by saying: "That is Silver and Water, and there is about 500,000 Parts Per Million in this jar, and that means that it is 50% pure Silver by volume." And Bob stated: "That is impossible." And I said: "here let me dip this Silver Litmus Paper into the Jar, and you can see for yourself how much Silver is in there." So I dipped this litmus paper into the Kerr Jar, and it turn totally Black (off of the chart). Then Bob picked up the Kerr Jar and was astonished that was like picking up a lead brick. There really was more than 50 Ounces of Silver Metal in the clear liquid (8 oz). I had also had my Silver Product tested for Nitrates, and it contained .00001 Nitrates; in other words there was no real Nitrates levels present in my WaterOz Silver Product, as it tested as having even less Nitrates in it, than regular spring water.

So again Bob invited me to come hear his lecture and I again went. Then Bob called my name and had me stand up and he told the Audience that I had created the first pure Colloidal Silver that was clear and that they should go by my booth and check it out. I never referred to my Silver product as being a Colloid as the word Colloid in my opinion does not really denote a very small particle size. A marble size piece of Silver in the water could still be considered a Colloid. My Silver particles are and were smaller than an Angstrom; thus there was no Tindal effect present when a Laser light is shown through the Silver medium.

I went on over the next few years to sell millions of dollars worth of the WaterOz Silver Water, at 100 PPM. I also sold and shipped a Silver Product that was 600 PPM that was to be used only in Nebulizers, to abate T.B. All of my Silver bottles were in PET Plastic (clear plastic), and you could shine a Laser Light through the contents and there was never a Tindal effect. Note that my WaterOz Factory was fire bombed after I was in prison for 12 full years.

So, yesterday I was talking to my friend Rudy on the prison phone, and he asked me what I thought about the Silver Water that you are selling over at your website Prison Planet. I did not know how to respond to this question at first as I have no way to go and see your product, and then I said: "well it should be clear as water, and it be at least 100 Parts Per Million, and if you shine a Laser Light through the liquid there should be no Tindal effect; and it should test as having absolutely no Nitrates in it.

I have consumed many gallons of this Clear WaterOz Silver Water and I now have a lot of Silver left over in my system. Yet, I still get and can get the flu these many years later. I'm sorry to say that the Silver in General ended up not doing exactly what I initially was told that it would do. I'm just keeping it honest with you as I still like to use Silver for some applications.

Here is the problem, Silver whether it is clear or not, really can stay centralized in the system to provide a kind of ongoing immunity from Virus, as it really does stain and stay localized; but it really does not osmosis everywhere very well, as it really does not cross the Blood Brain Barrier, Spinal Fluid Barrier or travel in and through the Lymph system. What this means, is that I had 100% great luck removing T.B. fast, when I just had a patient in India for example, inhale the Silver Vapor, at 600 Parts Per Million (Thimble full size); as the Silver Vapor would coat and permanently stain the exposed Lung Tissue surface and thus further provide a permanent protection against any Lung type of Infections; now or in the future. Note that Silver works good, if we really just want the Silver to stain, and stay localized; i.e. to stain the Lung Tissue. This means that we could actually treat a person with the Silver in a Nebulizer, for the sole purpose of making sure that the patient never gets T.B. or for that matter any other type of Lung Infection in the future. Usually just one treatment did the job, but for severe cases, it sometimes in fact, took up to three 15 minute treatments, with the Nebulizer to remove even Terminal T.B. So, if a person just wanted to gargle with the Silver to remove Strep Throat, it would do a great job and would provide a permanent or long lasting stain in and upon the surface area of the Throat Tissue. Silver also really worked great if put on a burn or even a Sun burn as it stains as seemed to even abate the pain of the burn.

Then a few years later I actually created a non toxic Copper Solution that had no Nitrates in it. Note that Copper is listed as a poison that can cause a disease called Wilsons Disease. Wilson Disease is caused when the Copper is a Colloidal (heavy Metal Particle). Note that the law that they are now using to prosecute the people in Flint Michigan for the Lead in the Water problem, is called the "Lead and Copper Act." Here is the point. Copper if made wrong can be extremely toxic. The negative side effects

of consuming Copper that is in the form known as a Colloid (particle size is too large), is that you can not keep food in your stomach as you continue to throw up, and you get totally constipated; as it really does effect the entire digestive track to an extreme level.

But a few months ago I read an article in the WSJ, that said that they are going to start using Copper on the table tops, door knobs and facet handles in hospitals as Copper has been shown to kill all Nitrogen Breathing Pathogens. Back in the day when I first started drinking and having others drink the non toxic Copper Product to remove the common cold, it really worked to a degree that surprised me. Here is the point. Copper when made correctly can cross the Blood, Brain and even Spinal Fluid Barriers; and it can also move throughout the entire Lymph System. Copper, does everything that they claimed that the Silver was supposed to do, and better. But Copper does something that the Silver could never do as it has been shown to 100% kill every Parasite known to man. I had a doctor who had been working in Africa, call me and thank me for saving his life, as he had contracted a Brain Eating Ameba and was surely going to die. The Copper really saved him. Right now, there is no way to treat, cure or even abate having a Brain Eating Ameba as you will surely just die as they know of no cure. As I knew that Copper passed all of these different Barriers, and was in the Lymph System, and I knew it also killed all Nitrogen Breathing Pathogens, and I knew that the body secretes Lymph fluids into the Lung Cavity called Flem when there is an infection, I had the idea of having my cousin Derek Kartchner drink an eight ounce glass of Copper Water at 300 PPM. He told me that he had been coughing for three months and he could not find a way to stop coughing. This test worked well as two hours after he drank the glass of Copper Water his cough was completely Gone. Then my Lawyer friend named Scott Cantor in Las Vegas was diagnosed with Terminal Lymphoma, but we had never tested in on a Cancer before. I knew that Copper could cross into the Lymph System and that it killed all Parasites and Viruses, so this was a very interesting test. Scott Consumed 8 ounces a day at 300 PPM's for 30 days (until the Gallon was gone), and he went back in for the Cancer test and at this time they told him that he no longer had Lymphoma.

When I first drank about 8 ounces of Copper at 300 PPM's, I felt a worm like thing crawling across my forehead under my skin (large Parasite). I broke out with a rash all over my body, that was caused by millions of small Parasites trying to get away from the fact that I now had Copper in system. Most people don't even know they have Parasites. Read the Book titled "What Came Home to Dinner" and you will find that most everybody on this planet has some kind of Parasitic Infestation. They are in fact handed down from mother to child for generations. Even cooking food does not kill the eggs. Note that modern medicine does not even check anyone Blood before they do a Blood Transfusions for these Microscopic Parasite. There are in fact over 10,000 different kinds of Microscopic Parasites on this planet. Most people have never lived a day without having them in their system. I have seen children with Asthma lose their asthma when Copper is consumed. I have seen people lose all of their allergies when Copper is Consumed. There is now an award being offered under the concept of Crowd Innovation that I read about in the WSJ, for \$25 million, if someone can find a way to kill Penicillin resistant Bacteria. Well boys this Copper really does the job. But the establishment really does not want to find a new low cost treatment or cure, as in my opinion, it is all about making money.

Note that taking a Copper has been shown to improve the Livers ability to Digest all Proteins. Note the decomposing Parasites and Virus are in fact a new source of Protein! LOL.

Remember earlier in this article, I made the statement that the Copper really effected the digestive track. Well it really does, and that brings me to another point. There are some diseases that are

actually caused by the Livers Inability to digest Proteins. Some of these disease are M.S., M.D., Lue Garrets Disease.

. I had two Black Ministers in New York put thier labels on my Copper Product (Cap Distributing), and they then gave out free samples to all of his chruch members. Then, he noticed that a lady lost her Sickle Cell within a few days. I'm not saying that it is the cure for every disease, but it would now seem that everything we have tried it on, seems to have worked up till ow. I was arrested before I finished testing the Copper on M.S. and M.D. I saw a story in the WSJ about out a women who had two young boys who both had M.S. and where both wheel chair bound, and in this story the bottom line was they were both going to die and soon. I would give anything to be able to reach this nice lady and let her test the Copper on this condition, as I really care about these two boys and I think that my Copper concept might be the mircle they are praying for.

So, during this period of time I came up with a new concept that I termed "NTSS" (Non Toxic Saturation Safe). If a mineral can be used as an NTSS Agent, it means that we can consume a lot of it with no out expereincing any negative side effects. For instance the minerals that I found that were the best as being an NTSS Agent were, Calcium, Zinc and Copper. The problem here with the NTSS concept is you really have to take enough of a certain mineral to actaully raise the Blood and Lymph Serum Levels, to the point where something really great or interesting can happen. Just consuming a small amount of something like the FDA states you should do, might not really do the job. The secret here is that we are putting these minerals in a state, were they are really pre-digested and in the right or correct form, and this means that your digestive track does not have to do anything in order to assimilate it and use it.

I can remember as I got started selling my 19 different minerals. Each one of them had a slightly different story. But of course not all of them ended up being as interesting as the Copper product. But there were three others that ended up being very interesting.

ZINC: Zinc, when made correctly, and consumed as an NTSS Agent, ended up 100% stopping the Sexual Replication of all Viruses (within 15 minutes). Therefore, if the Blood Serum Zinc levels could be maintained for ten days, all of the Virus through the entire body system would now lose their ability to sexually replicate. So this concept alone could be used to treat an Aids Patient; as after ten days they can't replicate anymore and then after thirty days they all die off of old age. I had Larry Wayne Harris who retired from the CDC in Georgia do the first test on my special Zinc product. (note Larry was arrested for having Anthrax on the plane, when Bill was in the White House, and Larry was on his way to visit me in Las Vegas NV.).

INDIUM: Indium, when made correctly (Indium Sulfate as is now sold as Indium and is a poison), if enough of it is consumed can give a person a the same feeling that he would get if he drank a glass of Red Win and this buzz can last for over 24 hours. This, so called buzz shows up in about 20 min. One over weight Lady drank a two ounce dose of Indium at 100 PPM, and felt the good feeling, and went on to skip eating for five straight days. She said she did not get dizzy or hungry or even upset as she just burned off the fat. On the sixth day she sat down and ate a large meal and she did not feel hungry until she had the food in her mouth. Overall a person can use the Indium to help lose weight, as a person can just not eat for a week as the fat burns off, with no negative feelings or side effects. Indium seems to work well, as it seems to balances the Pituitary Gland that controls all of the Hormones. Everything is controlled by the Hormones. For example, the awake and sleep state, Insulin and Sex Drive. My tests

show that the Indium might be the missing fountain of Youth, as it seems to balance everything. Doing our own Kinesiology tests we determined that the Indium could extend a person life by over 400%. This sounds to good to be true.

CALCIUM: Calcium, when made correctly (Calcium Carbonate is now sold as a Calcium Supplement, and it does not harden bones, causes Calcium deposits in the joints, to cause arthritis), has been shown to absorbed Acidic Crystalline Nuero Toxins through out the entire body system and then; remove them through the Kidneys. It is interesting to note here, that the fecal matter that is discharged from all Nitrogen Breathing Pathogens and Parasites is considered to be a Crystalline Nuero Toxin, and in fact even these decomposing Parasites and Virus are also considered to consist of Acidic Crystalline Nuero Toxins. In fact it is actually the flu systems that are caused by the build up of these Acidic Crystalline Nuero Toxins, that are secreted as a waste product from these Nitrogen Breathing Pathogens. Therefore, our tests showed that if we consumes 4 ounces of our Calcium mineral 700 PPM, it can literally make the flu symptoms disappear within hours. So if a person is really sick and you want to just give them more time to fight the infection, you could first have them consume four ounces of this Calcium. It really is not a cure for everything, but it does seem make the headache and cough go away fast. For example it is the Acidicness of the actual Acidic Crystalline Nuero Toxins, that are secreted form the Pathogen, that actually cause your Throat Irritation and the Ear Ache; and as these Acidic Crystalline Nuero Toxins are increased in the Blood, the Hydrogen is then replacing the Oxygen levels, and this can lead to death. In fact Puss is just another name for an Acidic Crystalline Nuero Toxin. You will note that the pimple in your nose when drained quits hurting as it is this Acidic Toxin that causes all of the pain.

I really at this point in time have no financial agenda in regards to selling or promoting any product, as I'm in prison. My concern now is that I need to get the information about the Copper to as many people as possible. For example, I would love to give the secret concepts to King Maswati (Swaziland), as we (Botha and I), actually did testing there and I know that the King would remember me. It might also be helpful if someone like a leader of another country could call President Trump about the Political Prisoner Of America (me).

In the past, one of my secretaries got a little bit out of control, and without my permission, sent a check to CBC, "Good Morning America" for \$6,000 to advertise the minerals. They ran these ads for two weeks, and we got one call and no sale. This was a complete waste of time. But, when I got on the small Lue Epton show (as a co host), and we interviewed a couple of people, letting them tell their story, about how the WaterOz minerals had helped them; and/or we would offer out free samples of the Copper and/or Zinc product, and invite them to help us test the product; or we would tell them to please email us with the information of someone who had one of the diseases that we were talking about on the air, so that we can send them a free sample, the phone went ballistic ringing off of the hook, and our website would stay busy for hours and days. So, the end result was that a small local Talk Show with a small audience actually generated a large amount of interest and sales. At this time, I noticed that even when we offered everybody a free sample, about 40% of the calls that came in ended up placing an order. So, we did not make any money or profit on all of the free samples, but we still ended up generating a large amount of sales/orders. Of course we had a 100% money back guarantee on the product, even if the bottle was completely empty. It would seem that anytime people really feel that you are sincerely trying to help them without some attached agenda they will respond in mass.

I noticed that once people started being WaterOz customers, they continued ordering forever and this generated a large and steady ongoing income. For example once a person drank a couple of ounces of Indium and felt the great feeling (buzz), they would forever want more.

When we sold these products, we would sell them at a low wholesale price, and as there was a lot of extra profit even at this lower price, we would then paying up to 30% of this wholesale price, directly to Lue Epton, under the banner of being for advertising; and this paid for most of his airtime. I just think it is the fair and right thing to do, as I wanted to share the ongoing success with the show that made the sales possible. I guess I learned this as I was having to pay for my own air time, and the expense for the show was ongoing. It would not be right to just pick up all of the listeners and not share with the host ongoing.

I have had the idea of doing a Crowd Funding Project for he Copper. We could ask for a small donation (i.e. \$1.00) and as Congress just changed the law to now allow us to give Tokens, we might be able to give a Token (i.e. Bit coin), or even a free sample of the Copper Water. What really matters is just getting them to try the product. We can also pay up to 15% as an adverting fee and then call it a Crowd Funding fee, for helping us with our Crowd Funding Project (standard fee is 10%). I just have many ideas, that I would be interested in sharing with you.

As I built my WaterOz business and did my own show (David Hinkson Show), I can remember making a few competitors very unhappy. For example, I was supposed to speak at the annual seminar for the Naturopaths in Las Vegas and a Doctor named Joe Wallach was scheduled to speak before me. I have known and debated him in the pasta and his concepts are wrong. When Mr. Wallach saw that I was speaking after him, he packed up him booth and fled the building. I can honestly tell you he really hates me. Then when I started selling a better Ozonators than Ed McCabe (\$2,400 each) for the low price of \$300.00 each, he was not happy with me. When I started selling Silver that was 100 PPM (most of them were 3 PPM), at \$25 a gallon, I made a few people angry. But, it was the people that were competing with me that would debate me and then work with me and tell the truth that really impressed me (i.e. Bob Beck).

To finish this email, I just want to mention that I have another project that I have been working on over these many years and that is that I have invented the real GALT Motor. If you remember the book titled "Atlas Shrugged," that was written by Ann Rand in the 40's, she had a character in her book, named John Galt. In this book John Galt saved the world with his new Galt Motor. It just so happens that I have invented the real GALT motor. The word GALT is a real acronym for Geometrically Amplified Lateral Torroid. It was Mr. Tesla that first coined the word Torroid to describe what later became known as the Transformer. My GALT Motor is small, light weight, brushless and creates a lot of torque for its overall size. A GALT that is physically about 12" X 12" square will create over 129 horse power @ 130 KW. We now have a picture on the Y Tube, that can be seen, if you just type in "GALTgenerator," and the newest picture is the fourth line down. Remember that I got this done from prison and it took years, as it was not an easy task. If you want to see a better Video you will only have to wait for a few more days. This GALT motor now can be proven to work and it can be used to lower the overall cost of A.C. Power Bills. It can also be used to power cars, boats, trucks and planes. In fact there really is nothing that it will not be able to power. We are finally were we need to be to move forward in high gear.

In fact, I now have 6 other energy devices that you might find interesting. I would like to do a series of Crowd Funding projects where we can actually raise funds to build these devices. For example, we could

raise a small amount to build the HinksonTransformer (no moving parts), and then place them in homes for free, as we share in the generated profits under a co-generation contract. I just have some many new ideas to share wtih you.

One of my most favorite new inventions is an Electric Jet Engine, that creates its own A.C. energy as it runs. This design will rev up to as fast as the bearings will allow it to go. This would be the best replacement concept to replace the Jet Engine in all of the planes all over the world. I have even tried to offer these inventions to the In-Q-Tel.org (CIA Lenders). So, as you can see I have been busy here in hell really trying to help what is left of my country. Things have gone a little bit slow in the past, but recently I met a man named Rudy Davis and he has been a very big help in helping me get the word out about my situation and my inventions. Maybe you could take the time to talk with him.

Your friend Dave
