Subject: INDIUM

INDIUM TESTIMONIAL: I created a proprietary manufacturing process for WaterOz, where I processed Hallmarked Indium metal directly into Indium Hydroxide; and we further processed the Indium into an Anti Oxidant mineral in solution.

I have hard many concepts about Indium and after much testing I concluded that it is needed by the Pituitary Gland to keep all of the Hormones in total balance. Indium seems to really help keep the Pituitary Gland in balance. Almost every function of the entire body system is controlled by Hormone functions, that are all controlled by the Pituitary Gland. For example, Insulin controls Glucose, and other Hormones control digestion, sleep and even the wake state cycles.

I do not believe that we are currently getting any Indium in our diets; as it seems that as we get older and older our Pituitary Gland, seems to have a more difficult time keeping all of these different Hormones in balance; and as these Hormones are no longer in balance, every system starts to break down. For example older people have a hard time staying asleep for more than a few hours at a time. In my opinion Indium used to be in the diets of mankind before the great flood; but the plants that used to be consumed by man that might have had Indium in them, are no longer available in our food chain. Maybe this is why man used to live so much longer.

In my opinion, if there ever was a mineral that could slow down aging, like the fountain of youth, it would be one of the products on the periodic table, and maybe it is Indium. As the Indium keeps the Pituitary Gland healthy, the Pituitary Gland can now keep all of the Hormones in proper balance through the entire body system. When I did my own testing using Kinesiology, I was amazed, that the Indium tested, as extending the life cycle of a person beyond what I believed possible.

In my opinion, Indium is a Glandular that is needed by the Pituitary Gland, to help keep all of our Hormone functions in proper balance. For example, I gave a 16 ounce bottle of WaterOz Indium to a customer named Elizabeth and she immediately started complaining saying that she did not like Indium. I asked her "why"? And she said: "She had taken some Indium, that she had purchased on line, and it made her very angry and upset, and then she even had a fight with her husband." I explained to her that in my opinion she probably had consumed some "Indium Sulfate", not "Indium Chloride or even Indium as a Hydroxide"; and that "Indium Sulfate," is actually a Liver Poison, that is sold in a bottle, that actually has a skull and cross bones printed on it. I later learned that this analogy was correct. Anytime you poison your Liver with any kind of poison, you can become very angry and upset; and this might be why some drunks get very violent as alcohol poisons their Liver.

Elizabeth finally agreed to try some of my new WaterOz Indium. So I had her consume four full ounces at 100 PPM's for her first dosage.

Five days later, I got an email from her stating the following: "After I took the first dose of the Indium you gave me, I felt a Euphoric feeling come upon me within about 20 minutes. This Euphoric feeling, felt like I had just consumed some red wine. I have therefore continued to take two ounces a day, and this euphoric feeling is now constant. I also skipped eating for five full days, and lost over 12 pounds, and during this period of time I never even felt hungry or tired; but when I finally sat down and put the food into my mouth, I was instantly hungry and had a great appetite. I believe that this product makes going on a diet very easy, as the hormones that effect hunger seemed to stay in balance, and this would explain why I did not feel dizzy, or hungry, as I was totally burning off excess fat. I also noticed, that I had more libido, and I've never felt better in my life; this stuff is great."

We also process the WaterOz Indium with our special proprietary Ozone process, that uses light to make Ozone in the frequency range of 260 nanometers, to turn our ionic Indium directly into an anti-oxidant using an oxidant to actually remove un healthy oxidants. This also helps to increase longevity.

Sunlight in the frequency of 260 nanometers creates Ozone gas, and then I discovered that the frequency found in the special healing waters in Lourdes France tested at 252 nanometers. Therefore, I believe that as these two frequencies are so close together in proximity, that there might be some kind of direct correlation between these frequencies and concepts, and that would explain why so many people have reported that they have had good results in the past when they consume WaterOz products.

I believe the reason that our proprietary process is so special, is that ionic Indium minerals must also be in the correct form as an anti-oxidant or each Cell through the entire Body System might reject them. This would explain why some supplements on the market work better than others.

In conclusion, I do not think that there are any other Indium products on the market that are processed using

Rudy Davis

Ozone Gas to remove and replace oxidation, to create an Indium with the correct frequency as an Anti oxidant except for the WaterOz Indium.

I therefore, believe that the WaterOz Indium would be a great product to promote overall general health, and it could also be used for specific applications like losing weight, and extending our ability to live much longer. It would seem to me that having all of a person's Hormones in balance would be very helpful, in many different medical conditions; especially if every cell desires to assimilate this new and improved mineral concepts.
