Thank you for excepting my email connection.

I have written a series of articles and Mel and Rudy have a lot of them. If you would tell me what your interests are, I would be happy to write about any subject that you want to interview me about.

My primary interest right now, is I wanted to help raise awareness for what is going on with these insane prosecutions.

I also have been formulating some ideas on fund raising for the cause. Of course we don't really want to do anything unless it fits into our overall concept of helping others; as that is what it is really about.

I have written an article about the Copper Water that I used to manufacture and sell before the FDA attacked me. This Copper Water will kill all Viruses and Parasites through the entire body in about two hours. This means it will remove Aids, Malaria, River Blindness, Hep C, and as it can cross the Blood Brain Barrier, it will 100% remove the Brian Eating Ameba. It will also help the Gulf War Vets. So I have a real reason to want everybody to have this product and to try it for free.

So, for now I had the idea of offering subscribers or listeners a free sample of said Copper for them to try out. Then I would give the difference between the Manufactures price and the Wholesale price, directly to the show or publication that got the customers in the first place. This way we could raise an ongoing income stream right away. This concept would work, because once people find out that they can remove the common cold and the symptoms in two hours, it changes their whole perspective on medicine and other priorities. In my opinion the Copper product is a greater find than Penicillin. I might deserve a Nobile Peace Prize for this work. Vain. But what they gave me was a kangaroo Trial. Note no one has ever complained about my products except for undercover confidential information's.

Right now I could Cure John McCain, but there is no such thing as a Cure, as he has made sure you will be arrested for just saying this. Then of course nature now really needs a new habitat for the endangered cancer that is eating his brain. So, let them dine. I just don't care. You can quote me on this if you would like.

Anyway, as we gain some cash flow, actually helping people not be sick, we would now have a larger and large audience and we can network with more people of like mind, and expand and expand.

I also wanted to do a Crowd Funding Project, where we get many people to donate just one dollar to the Green Conservancy. Yes this is my non profit that has already been created, that is going to seize the global warming agenda; we hope. We now have a working model of the real GALT Motor. See on Y-Tube, GALTgenerator - fourth line down. Were we show that we can actually violate the Law of Lenz. Note that the GALT Motor actually has a rotor that rotates and makes free horse power.

I have seven energy devices (or more). We also have a HinksonTransformer. This Transformer has no moving parts. Using the money that has been now donated to us, we are going to buy this week (hopefully) a CNC machine that will cut out the parts. Up till now it is the machining costs that are destroying us.

So, anyway we actually got this H-Transformer to create free A.C. Energy with no moving parts on the bench. We hope to have a video of it done in the next few days. This will go viral. Remember that everything I say here is deemed to be impossible by the U.S. Patent office, who will not issue us a Patent. But, the Chinese now have said they will.

So, what I proposed that we now do, is give each person who donates just one dollar a co generation contract where we install one of these H-Transformers, for free!!!. This would either lower their energy bill by 50%, or we could even install a unit that drops their overall power bill to zero. As we install these units for free, we would now get a check from each member who has a co generation contract with us and that gives us a steady income stream, all while we lower there monthly bill. Therefore, after just one month we would have earned enough money to now Place more units. So, overall every single month we expand and our income goes up and overall we keep installing more and more of these energy devices, always plowing the money right back in and expand and expand. Now we would pay a percentage of the income to support the talk shows, and other funds can be paid as crowd funding fees/advertising. But overall we are attempting to save everybody money while we pay for a large expansion program that keeps everybody earning some of the pie. Every body wins.

So, right now we are in a position to now get this done very fast. I just ramble on here. Later today I'm going to start writing you about my case if that is what you are interested in. If you want more information about any of my ideas just ask.

Your friend Dave
