

AFFIDAVIT

First, being duly deposed, I attest and affirm that the following statements of fact are true and correct as evidence:

1. From 1984 through 2008, in a continuous campaign, a few hundred networked prison guards and other prison employees connected with them, throughout 42 prison transfers at a couple dozen California prisons, have participated in a scheme to prosecute false Rule Violation Reports (RVRs, CDC-115s) against me for the admitted purpose of causing perpetual denial of my parole release from prison, in addition to inflicting other pains on me. The scheme also has included various mechanisms imposed by these CDC (California Department of Corrections) employees to prevent me from having any means to administratively appeal the false RVRs or to prosecute court challenges to remedy this scheme and the conditions surrounding it. The activities constituting this scheme are detailed throughout this affidavit.

2. In mid-November 1984, in San Luis Obispo County at California Men's Colony (CMC) prison, CMC guard Mr. Peterson (or Petersen) physically attacked me without provocation, with violent force sufficient to ~~have~~ nearly have broken my neck, requiring weeks in a neck collar. Within hours, several CMC guards approached me stating they learned I had numerous pending lawsuits against CDC guards at other prisons and promised they would have me set up with false RVRs and sent to the hole where they would have me murdered, if I were to file a lawsuit exposing Peterson's battery on me. They also promised a barrage of never-ending false RVRs for filing CDC-602 administrative grievances against CMC guards in general, and especially against Peterson for his battery. Specifically, they repeated numerous times, this day and in days following, "For every 602 you file on us, we'll file 115s on you" -implying they would falsify such reports and assure I was found guilty, even while innocent of any misconduct. These six or eight guards, coming to me day after day with these threats for weeks, then thinning out over months, assured me that they were networked with other guards throughout the whole state within CDC and had the power and ability to carry out such a false RVR campaign even through prison transfers, for decades, and that they would do so to cause perpetual denial of my parole release from prison and a life of unimaginable hardships in my prison *time*.

3. At this time, I had been in prison over one year and had never gotten a CDC-115 RVR. My behavior, which had been consistent as essentially the best of a "model citizen" in prison, did not change for the worse at this time, nor at any time since then to the present (throughout ^{34 (FL)} 28 years.)

4. Yet, within a few weeks of that Peterson battery and threats, on 12-8-84, I was issued and then found guilty of an RVR for the first time, and another for the same act followed in quick succession; and then a flood of them, dozens, sometimes several in one day. Whenever I had fair and impartial RVR hearing officers (fellow prison guards of the accusers), who were not connected with the "network" of the involved guards, I was acquitted of the charges of each RVR. But these were the exception to the norm.

5. My first two RVRs, and being found guilty of both, were for honoring Yahweh's religious Sabbath commands to not labor on our Creator's Holy Sabbath days. Federal courts over California have ordered such

RVRs to be dismissed and expunged (*Mayweathers v Terhune* 328 F. Supp. 2d 1086), but CDC/CDCR staff refuse to comply in my case.

6. Of the dozens of RVRs issued against me to date, 39 presently remain, most of which have had some "religious persecution" or "religious punishment" connection; that is, a campaign of punishment for my relentless stand for non-politically-correct true biblical Christian principles, values and living.

7. Every RVR I've ever been found guilty of has been connected to and influenced by an overblown reputation innately connected to the name "Lazor," my reputation as a prison litigator/lawsuit filer against CDC and as an excessive CDC-602 administrative grievance filer. My reputation as such is exceptional especially as a "whistleblower" against corrupt and criminal activities of CDC employees, in their own frequently stated estimation.

8. By statute, my parole release date was some sixteen years ago (May 1992), a mandatory parole release date unless I were a danger to the community, which I've never been, and there's never been any genuine evidence to the contrary. I've been denied parole, kept in prison all these sixteen additional years solely due to these falsified RVRs—exactly what C/O Peterson's fellow guard partners promised me in their own words, in November 1984, as well as at many other times since by other guards in their network.

9. In November 1996, Mule Creek State Prison (MCSP) Appeals Coordinator, Tom Emigh, who later rose to the position of a high ranking CDC administrator in Sacramento headquarters, pulled me privately aside and told me in no uncertain terms that due to my non-criminal history and realistically self-defense nature of my conviction, I was one of the few with my type of sentence (second degree murder under Proposition 7), who actually stood a very good chance of being released from prison on parole, over the next several years. But, he added, that I was spoiling that opportunity by filing CDC-602 grievances and appeals, and that unless I ceased forthwith, I probably would never get paroled for the rest of my life; i.e., my mandatory 1992 parole sentence would be converted into a "life without possibility of parole" sentence by CDC employee whims in misusing the CDC-115 RVR process as a reprisal-system for my filing of CDC-602 grievances. This is one example among countless others of the same assurances by CDC employees told to me many times since the 1984 Peterson battery incident. I never ceased filing CDC-602 grievances because it's been too unbearable to suffer the oppressions I'm under without an attempt to remedy them. Shortly after this meeting with Emigh, he went directly to inmates (Wilkins and Taschler), and incited them to attack me with physical assault and battery, which Taschler did, resulting in additional RVRs used to deny me parole for many more years. (Which is one of the RVRs in this petition where the hearing officer who pronounced me guilty participated in investigating and charging me with the alleged offense of mutual combat—in direct violation of CDC regulations, 15 CCR §3320 (h)).

10. Of the present 39 RVRs still outstanding, I suffer punishment still, to this very date, ever ongoing daily (including parole denial for ^{25 (2)} ~~sixteen~~ years, misplacement in the most harsh, violent, restrictive prisons, and hundreds of extra special daily oppressions not usually present but for the RVRs)—every one of them has an

identified nexus and motivation factor connected to my reputation as a "lawsuit filer" or "CDC-602 grievance filer" against CDC employees. Some CDC guards who've violently, severely abused me have ended up arrested by the FBI with their CDC careers ruined, and some even imprisoned for homicidal crimes (e.g., Sgt. M.S. Lemon; Michael Powers; et al.) This is known by some of the networked CDC employee abusers and held against me, including by their falsifying RVRs against me as reprisals for this.

11. From 1984, to date (2008), the campaign of false RVR "write-ups" by CDC guards and other connected employees has continued unabated and actually worsened over time. Many more CDC employees have continued to join in this networked campaign over time. Hardly a month has passed since the November 1984 Peterson incident, to present (roughly 300 months), when one or several inmates, often total strangers, have not approached and informed me that they hear on a regular basis, my name passed around among prison staff, with regard to being the most hated, most targeted and sought-after prisoner for inflicting random abuse, even uniquely in a category all my own, unlike any other prisoner they've ever heard of. From 1985 continuing through the past several months in 2008, I've been regularly informed by independent eye/ear-witnesses, that they've overheard guards (especially from MCSP, C/O Bufort May, particularly), telephoning their networked guard "brothers", where I'm now incarcerated, specifically attempting to incite them against "Lazor" (me), to practice special targeted abuses against me without cause. And especially to carry on the campaign of issuing and finding me guilty of fraudulent, false RVRs and other adverse reports ("chronos" and such), while knowing I'm behaving exemplarily. Mr. May was heavily involved in numerous acts of this precise misconduct against me during 2008 until I left MCSP, and phoning KVSP staff to continue this at KVSP, per witnesses.

12. This practice of guards calling others of their loosely connected network at other prisons following my transfers, has been going on steadily since 1986, to my personal knowledge, and which I have personally witnessed (actually heard) somewhere around a dozen occasions or more. It has also taken place from 1986 to 2008, of my personal knowledge (witnessed) by slightly modified means, including by false written reports passed on, by false, malicious progress notes passed on and placed to be read in my central files and medical/psych files which I've personally seen "guards" access in violation of state law and prison regulations. The "Wreck Lazor's life" message is also passed on by means of my CDC-602 complaints and staff's accusatory responses against me thereto, active at one prison, and then re-activated at the next prison I've transferred to. This I've witnessed scores of times. It has also, dozens of times, been passed on by misuse of CDC-602 telephone interviews where I'm summoned to a phone in the midst of between two and eight guards to address on an open speaker phone over my objections, false accusations from staff at the previous prison I was transferred from. The surrounding guards then have commenced the accusations, the attendant harassments and activation of the false RVR campaign at my new prison. This has happened many times.

13. I've had 42 documented prison transfers which is, or is close to, the CDC record for prison transfers based on extensive research. Almost all have been based on retaliation for the "Lazor-hate" phenomenon, either directly or secondarily connected with the name "LAZOR" (always pronounced with a hard "A") with a nexus

to "legal/ whistle blowing" against CDC employees and with religious persecution undertones. It's OBSERVABLY as if a computer-like "program" has been planted in the involved CDC employees' mind, to target and pursue "Lazor" with false RVRs and other reports with a vengeance. And when they find I'm a model prisoner, it's as if this "programming" COMPELS them to create and prosecute false reports and inflict cruel, undue punishments. When the name Lazor is said around them with a soft "a", this "programmed-like" response is not evoked as a general rule. Of the 42 transfers, each, with few exceptions, has resulted in the years-long and even decades-long confiscation of my legal files and legal work product that I've continued to generate monthly, almost daily, since my imprisonment began—all in an effort to prove my innocence, be exonerated and released or released on parole, be exonerated of the false reports, and to overcome prison obstacles. The confiscations and often subsequent loss/destruction/disposing of these files, including my only accessible copies of RVRs and 602s challenging them, parole transcripts and documents, and conviction case documents, often under strict time constraints (legal deadlines), have kept me from accessing these legal documents for some two decades continuously, as will be shown in specific detail below. Where I've finally gained access to such documents which survived, following months and years of confiscation, they've routinely been seized again and sequestered indefinitely, some forever, shortly after I gained access and had possession only long enough to re-start my legal work on them, but not complete it for CDC filing or court filing.

14. I keep exceptionally meticulous and thoroughly detailed records of all significant daily events in prison which affect me, including of my conduct, false accusations against me, declarations/affidavits from witnesses and involved parties, misconduct and involvement by prison staff in matters pertaining to me, and much else. I have done so from 1983 to present for various purposes, including supporting my allegations of factual events, proving my innocence/supporting my exoneration against false accusations, enabling the pinpointing of dates, times, names of involved staff, prisoners and witnesses and specific details of events. These records verify in many instances when I prepared and presented for filing or to CDC employees, initiation of and subsequent responses to CDC-602s and other dated legal matters. The staff campaign of ongoing confiscation and sequestering of these files ranging from months to decades, as already described, as well as the described destruction/disposal of them, has rendered it humanly impossible for me to identify, presently and often forever, if I had presented a CDC-602, what dates I did, to whom it was given or by what means mailed, including the 602 appeals of RVRs. This is the sole reason for my inability today to identify with pinpoint accuracy the exact dates and usually staff names I delivered such documents to, and if I did so—because all of my records of such events have also been confiscated and disposed of in this course, by CDC staff.

15. For a certainty, I have never been remiss on a single CDC-602 deadline of challenging any RVR I've gotten. Whenever I received the RVR, I diligently prepared and timely presented (filed by sending in the mail to appeals coordinators), my required CDC-602 challenge of every RVR ever received in CDC. In numerous instances, CDC staff refused to provide me a copy of the RVR, sometimes for months, sometimes never, until I obtained a copy years later from state files, the attorney general, et. al. When such non-service to me occurred,

it always violated CDC mandatory regulations binding on staff to present it to me within five working days. (Title 15, California Code of Regulations [CCR] §3320 (l)). Piggybacked upon that frequent staff failure, appeals staff from the lowest level at the prison I was at, to the highest level (CDC director's "appeals chief" in Sacramento), almost without exception refused to allow me to file a 602 appeal whatsoever without the RVR attached while knowingly and deliberately refusing to provide me a copy which they had ready access to and could easily have provided me at any time.

16. In those instances just described (which were anywhere from several instances to eight or ten), when I ultimately obtained a copy of the RVR many months or years later by extraordinary tenacity without letup, in spite of my proof that appeals staff refused and barred my earlier appeal of the RVR within 20 working days of the hearing disposition and that all involved staff refused me the RVR copy for all those months/years, appeals staff nonetheless permanently barred me from ever filing my administrative appeal-as-a-matter-of-unqualified-right; abrogating forever my challenge of those false RVRs. The courts then barred my petitions from being heard as to these, due to "failure to exhaust administrative remedies" in spite of the CDC staff obstructions just described.

17. I've amassed over 300, sworn/affirmed declarations and affidavits from eye witnesses, attesting truthfully to the events described above.

18. In all or almost all of the instances described in paragraphs 13-16, above, I consequently filed 602 grievances challenging these staff practices, often being required by them to file ten or more different 602 grievances just in order to get the initial 602 addressed. This is the norm, wherein appeals staff demand that I challenge and seek to entangle countless knots and obstructions, bars, locks and impediments seemingly without end, in order to be allowed to proceed further on the merits of these 602 appeals/grievances, until it had long ago reached the state of being a "full time" effort and more than full time. (I.e., it would take more hours than exist in a day, every day, just to meet these appeals coordinators' demands, whereupon meeting them they impose another barrage of them, without end). Many years ago it had already gotten to the point where it required more than 16-18 working hours in a day to keep up with even 20% of the demands put on me by CDC appeals staff just to get through their obstruction gauntlets to have my active 602 grievances/appeals heard on their merits. Despite my diligent attempts to the contrary, most of these 602 appeals have been permanently "screened out", i.e., procedurally barred, always without legitimate cause.

19. From approximately 1997 to the present (2008), there have existed less hours in a day than necessary to meet the demands of the CDC appeals coordinators' obstructionist-gauntlet to have my 602 appeals addressed on the merits and exhausted concerning RVR challenges and other related grievances. Prior to that, 602s I filed challenging RVRs, and others, were more than infrequently "lost" after I presented them to CDC staff, and never returned to me. When I tried to begin the process over again, which I did in each such instance as soon as I learned it was lost, CDC appeals staff barred me for being "late" or successive, when I did not file late and the only successiveness was based on staff having lost my first timely filed appeal.

20. On a few occasions over the years, (from the 1980s and on into the 2000 decade), one or more courts have barred my court challenges of a given matter (not necessarily an RVR challenge), citing to their presumption that the action they were barring could have been completed in a shorter time, AS THOUGH THAT WERE THE ONLY LEGAL CASE DEADLINE OR OBLIGATION I HAD. This is erroneous in that, nonstop since the 1980s to present, there has never been a day that I've had less than actually hundreds of vital legal obligations to complete and all being worked on at the same time. They have continued to ever expand, to grow in quantity and backlog every day to the present. These literally hundreds of simultaneous high priority legal demands and obligations every day for the past two plus decades, are in addition to the dozens of simultaneous administrative appeals demanded by the appeals coordinators at all prisons I've been at for the past twelve to fifteen years or more, as described in paragraph 18, above. Some typical examples of essentially endless streams of such demands from the prison appeals coordinators are when the appeals coordinator refuses to process the initial 602 grievance/appeal without certain papers attached, even though they are totally irrelevant. The only way I can hope to obtain those papers, is by filing another two or three 602s to various other prison staff as they won't provide them otherwise. Those are also blocked by the counselor, records staff, visiting lieutenant, litigation coordinator, et. al., demanding I must overcome some other obstacle first, which can only be done by additional 602 filing with other staff, and on and on goes this process. This is now the norm and has been for many years. And this process is multiplied as much as 50 times at once, due to over 50 backlogged 602s sat on for over a year and obstructed over a year by the appeals coordinator. (Recently this was going on with 51 such appeals at once.) This is much more than a full time job for four people, and I am only one person with other legal obligations too. Up to now, all courts who have barred me for untimeliness on any matter, have failed to take this into consideration. From 1999 to November 2001, while denied legal access to almost everything else, I spent almost all waking hours of every non-Sabbath day just trying to obtain and organize all my past 602s in order to have proof of exhaustion (attempts); only to have them seized, sequestered and disposed of just before completion of this 2 ½ year long process. I've since not been able to obtain copies of them again, to date, despite exhaustive, diligent efforts.

21. The entire administrative grievance process permanently malfunctions into a total, perpetual standstill shortly into the process described above, due to requirements of Title 15 CCR §3084.4(a) prohibiting filing of more than one 602 in any given seven day period, nor can any be filed after passage of fifteen working days from the date of inception of the triggering event. (15 CCR §3084.6(c)). By these two provisions interacting together, the administrative appeals system has been completely closed off, shut down permanently as to issues such as those described herein—including RVR challenges. My court challenges to this, for years, have resulted in complete denial of a remedy.

22. These obstruction gauntlet practices have proven to usually require much more demands on my time, energy, expertise and resources, than the prosecution of the average court action such as a habeas corpus petition, mandamus, prohibition, or civil complaint.

23. A complete list of the active, high priority legal demands upon me daily from the 1980s to the present, 2008, which I've diligently been working on or trying to, to prepare for court filing and prosecution, could fill dozens of pages of single-spaced typing, just by a one line heading list. Since more come into existence each week than can possibly be eliminated, the list only grows each month, exponentially. A brief sampling includes:

- Four past parole hearing petitions for writs of habeas corpus; each being a full time job under prison restrictions;
- Four separate and disrelated challenges to my criminal conviction and sentencing based on newly discovered evidence, fundamental changes in the law, past impediments to filing earlier; provable actual innocence; and eighteen major issues in the main habeas challenge, each requiring hundreds of hours of legal research that I've been barred from sufficient law library access to complete, from 1986 through 2008.
- More than 30 RVR habeas petitions, each one being nearly a full time job;
- More than 50 tort/civil actions for false, retaliatory RVRs that have wrecked my life and lost me my entire life, including the past 16 years in prison, when by law I was to be free on parole;
- Four different parole challenges, not for past hearings, but challenging the nature of the sentence and sentencing infrastructure itself, each separate action showing that the properly applied sentencing scheme of the statute I was convicted and sentenced under required me to be released from prison in 1992, with my sentence fully served at that time.
- More than 30 crucial medical/health urgency habeas petitions, and more than 30 related tort/civil actions for irreparable damages to my body, genes, my future, including the gross shortening of my lifespan—each of these actions purposed to stop further destruction of my body, health and life, which is occurring daily until such court actions can be prosecuted.
- More than 25 retaliatory-based transfers which, until stopped, will continue to perpetually disrupt and sabotage every legal action I've activated and am attempting to activate presently.
- About fifteen tort and civil actions for staff brutality on me, directly, and setting me up to be brutalized and murdered by other inmates, resulting in lifetime brain and neurological damage, and many other damages, to date. Purposed to stop all further such violence against me.
- More than a dozen legal actions to prove I've been barred from sufficient and meaningful law library access or other legal facilitation as required by law, in fourteen different prisons from 1986 to 2008, continuously, and to obtain a remedy for my continued imprisonment solely due to this obstruction and its many ramifications.
- Legal actions for a remedy and compensation for CDC staff stealing and destroying 26 of my personal, approved, typewriters and the losses and damages from not having them, and the court actions ruined by these acts by CDC staff.

- Relief from ongoing episodes, and compensation for losses and damages of over 80 documented major acts of robbery of my personal and legal property by CDC agents, including theft of legal files resulting in extra decades of my life destroyed in prison as a factually innocent prisoner, and irreversible destruction of my health and shortening of my life by these thefts.
- Numerous religious rights violation actions, which the U.S. Supreme Court has recognized as constituting "irreparable harm."
- Several hundred different, specific cases embarked on but not completed, of being barred from access to the courts by illegal, unconstitutional obstructionist tactics and scams by CDC officials;
- Hundreds of administrative 602 appeals/grievance filings not yet addressed or completed, and required by the courts for "exhaustion" purposes, to redress the literally hundreds of separate episodes of unconstitutional, extreme, inhumane abuses carried on weekly throughout essentially my entire imprisonment.
- Others, too numerous to continue listing.

These alone demonstrate that thousands of hours per day are demanded of me to work on these actions; which I have been doing nearly nonstop for over two decades. I've exhausted myself seeking legal assistance for these, as of yet, to no avail.

24. On November 10, 2001, I was attacked by inmates who had been solicited by CDC employees for my reputation for filing administrative complaints, and had my head stomped in repeatedly. This resulted in significant brain damage, adversely affecting my memory, conceptual capabilities, and impairing my ability to analyze material including legal cases and other aspects of legal work. It's also adversely impacted all other aspects of my life that has further retarded and impaired progress in every area of my life.

25. During the entire period of 1983 to 2008 while imprisoned, I've continued nonstop as my first priority in life to complete my very complex petition challenging the validity of my conviction/sentence and imprisonment. This work, like all else in my life, has been constantly thwarted, sabotaged, and my months and years of legal work product repeatedly seized by CDC staff for years, then disposed of/destroyed/lost. Each time, year after year, usually several times each year, I had to begin the whole project all over again and often without access to the old witnesses, data and research product that I'd spent years gathering in the past. This project alone was enough for four or five competent, experienced legal professionals working full time—and this carried on in this status for eighteen continuous years before I was able to complete the petition and file it before CDC staff seized and disposed of it again. Every week of my life, virtually nonstop, from 1984 through 2001, almost all of my waking hours were invested in the sidetrack necessities of battling CDC staff and their obstructions of this project in order to get access to my seized/lost/sequestered legal files and related administrative appeal efforts. Those 602 appeals consisted of mainly efforts to overcome the obstruction gauntlets at every turn, health emergencies which also retard and stop my legal progress, piled up RVRs, and

ever escalating avalanches of CDC staff reprisals, many at the point of inhumane oppressions. Even two percent of these could not be worked on in my limited 24 hours existing in each day.

26. My conviction challenge has still not been heard by any court, due to misapplied procedural bars. I am still investing many hours of my time every month of my life in trying to overcome that illegally imposed bar, so that my factual innocence petition can be heard for the first time.

27. Since 1984, continuously to the present (2008), work on my top priority conviction challenge has, of necessity, had to compete with massive amounts of time every month invested in the burgeoning files of false RVRs, and with scores of other legal work demands. Most of those attempts have been to get past the endless gauntlets of CDC obstructions against my efforts to complete these legal cases for court filing. Of the relatively small amount of court actions I did get filed over these 24 years, every one of them was sabotaged by hundreds of CDC obstructions that proved impossible for me to overcome. A small sampling of these obstructions is specified throughout this affidavit. (E.g., 42 disruptive transfers; over 80 robberies of property, including legal work product files; many hospitalizations near death with roughly half year recovery periods of disability, each; staff brutalizations, dozens of confiscations of my property, including legal work product; loss and disposal/destruction of my legal files; hundreds of 602 administrative grievance/appeal filings obstructed with endless schemes demanding hundreds of hours on my time per day.

SPECIFICS CONCERNING RVR FRAUD, SCAMS, STAFF ABUSES THERETO

28. As to every RVR I've ever been found guilty of, I was plainly informed that the specified punishments imposed by the hearing officer (judge/adjudicator) was the MAXIMUM punishment I could or would ever receive throughout the remainder of my life. I was informed forthrightly that none of the RVRs, neither severally nor cumulatively, could ever be used to extend my actual time spent in prison. And that not one of them, nor all combined, could ever be used to deny me parole and release from any prison at my MEPD (Minimum Eligible Parole Date) of May 1992.

29. Every RVR I've ever been found guilty of has been used, both severally and cumulatively, to deny me parole on my set release date of May 1992, and every day since then to the present, ongoing presently. Every day of this has been in excess of the total punishments imposed by the RVR hearing officer in every RVR I've ever received (and all combined), and likewise in excess of any judicial decree of imprisonment time by a jury or judge or any judicial branch entity.

30. Beginning in 1985, shortly after my first RVR in December 1984, and continuing to the present (2008), prison guards have confiscated my only copies of my RVRs and my 602 appeals of the RVRs, and my legal work product of petitions-in-progress to challenge the RVRs, confiscated before they reached a state of completion for court filing. What few I did get filed in courts, CDC staff then sabotaged every one of them, by way of hundreds of obstructions which proved impossible for me to overcome regardless of my diligent attempts

to the maximum of my capabilities. Those cases were let die by default or withdrawn for inability to prosecute or lost by inability to present and argue the merits of my case meaningfully.

31. The quantity of my RVRs I was working on simultaneously without letup, including efforts to overcome staff obstacles to my progress, grew from two in 1984, to seven in 1985, to fourteen by 1987, and eventually over 40 I've had to continue working on, all simultaneously over all these years to the present. These guilty finding challenges were in addition to often more than "full time" work in preparing defenses for the RVR hearings themselves (several hundred hours each on the average). This included tracking down witnesses and interviewing them, waiting in lines many hours many days to access someone or something including law library research materials, relevant records, and preparing defenses, and much else.

32. In 1983, CMC staff began a campaign which has never stopped through 2008, of confiscating, stealing, destroying, losing and otherwise dividing me from access to my personal typewriters approved for me to have, and obtained at my friends/family's expense. In 1983, friend Kirk Li sent me an approved typewriter which R&R staff illegally sent back without ever telling me, in violation of CMC rules. This sabotaged my legal work progress due to handwriting damages limiting my capabilities to less writing than that required to meet my legal demands. Similar acts were committed repeatedly thereafter, each time requiring quite a few months to get another typewriter sent in again. The next one or two typewriters, staff threatened to throw down the stairs next to the R&R offices at CMC, and upon transferring to San Quentin, the typewriter arrived appearing to have "been thrown down a stairway" in staff's own words. Eventually, each year, up to about several months ago, staff stole, lost or destroyed 26 of my typewriters, all documented, and each time requiring months of efforts and hardships to get financial resources to obtain the next typewriter. An average of more than one per year was taken or destroyed by staff by illegal, unconstitutional misconduct. Each episode prejudicially impeded the timeliness of, sabotaging my legal work progress.

33. During many or even most of my 42 transfers, staff lost or "disposed of" much of my legal property, including irreplaceable legal files/work product I'd spent years working diligently on. This included the 40 plus RVR challenges and numerous different attacks on my criminal conviction.

34. On many occasions of various different RVRs, CDC staff refused to provide me a copy of the RVR, while refusing to let me file the required 602 administrative appeal challenging its propriety, without the RVR attached. No matter how much I tried, I could not get beyond this staff obstacle. My 602 complaints about this obstruction, only resulted in more false RVRs issued with guilty findings as reprisals for my complaints. Once the 15 working day period passed after the RVR guilty finding was rendered, CDC appeals staff permanently barred me from ever appealing that RVR, thus abrogating my codified absolute right to administratively appeal every RVR (Title 15 CCR §3084.1(a)).

35. Exactly which RVRs fall into this category of CDC staff having forever barred my right to administratively appeal them, cannot be determined now solely because of staff seizing and disposing of my meticulous, accurate records of those events. One such verifiable event, representing others, occurred on 3-22-

06 when Litigation Coordinator Earl Kanipe took 34 boxes of my critical legal files (two decades worth of what survived other staff takings), which staff had accumulated over about 20 year by continuous seizures and sequesterings, building up the quantity every few months with more seizures. These contained 23 years of legal work product re-started over and over again, and irreplaceable proof of exonerating facts. MCSP R&R staff handed them off to Kanipe who "disposed" of them, which I have the official records to prove, even after Kanipe carried on efforts to conceal those records for two years.

36. One typical example, representing various others, of CDC staff attempts to permanently thwart and bar my right to appeal a most critical RVR that falsely accused me of violence that would cause parole denial for many more years, ended in an atypical resolution only because of an unusual counselor who had recently been assigned to my case. (Ms. Valenzuela, at CSP-CEN in 1999-2000). While at PBSP, out to court from CSP-CEN, on 7-4-99 I was set up by prison guards to be murdered by white-power gang inmates. I was jumped and brutalized and accused by a false RVR of "mutual combat" and, as usual, found guilty. For months I diligently attempted to get the RVR to enable me to administratively appeal it, and was denied. Ultimately, Counselor Valenzuela belatedly got me the RVR copy, and appeals staff barred me from filing, because it was late (I filed IMMEDIATELY, within a few days, of getting the RVR). After much wrangling by me, Valenzuela finally took the extraordinary steps of intervening and convincing PBSP Warden Mr. Ayres, to deem the appeal timely and hear it. Ayres personally investigated, heard the 602, and granted it, totally exonerating me of wrongdoing, as solely the victim of the attack. In doing so, he proved his understaff guards knowingly lied and covered up their fellow guards' misconduct in the false RVR prosecution against me. Despite this exoneration, this RVR was nonetheless used against me to deny parole in my parole hearings in 2000 and 2006.

37. At least several other RVRs I presently still suffer under, (never-ending punishments and ongoing parole denial), were similarly-situated to this one, in that, had I been accorded my codified-guaranteed right to prosecute my 602 appeal of them, my actual innocence would have been proven. Yet I still suffer under the wrongful guilty findings.

38. In a number of instances, court policies and practices have continued to prevent me from having my habeas petitions heard which challenge false, fraudulent RVRs, because CDC staff barred me from exercising my codified-guaranteed right to administratively appeal these RVRs, as just described above. This continues, though I have done everything possible that I can imagine on my part, and all that was required of me by law, to prosecute the 602 appeals.

39. The RVRs challenges that I have prevailed on by being exonerated and having them dismissed, has been at the cost of hundreds of invested hours of time and energy, efforts and resources for each one, to the exclusion of being able to work on other RVR cases, and on my conviction case, parole cases, and others. These each have gotten bumped out of line by all the time and resources I had in any given month and year, and decade, devoted to other ones. I could only work on so many, and that limitation necessarily prevented work on other ones still waiting now for me to have time for them.

40. Exactly which RVR challenges have been "bumped" by this time and energy limitation dilemma, there's no way to determine, solely because of staff taking and disposing of my records with all that information (See paragraph 35).

41. Specific periods and events of confiscation and disposal of my legal work product/files: The following are from notes which did survive, relating to specific staff seizures, sequestering, stockpiling (to build up the quantity), and disposing of my legal files over the past two decades. This is only a small sampling of many other episodes:

- 1986 at San Quentin, kept stored in "C" or "D" section for staff convenience until sent to R&R depot and kept there during January through February 1987, and again in April 1987 until transferred with me to CMF on 6-1-87.
- From 6-1-87 at CMF, kept in R&R storage through November 1987, until transferred to Atascadero State Hospital (ASH).
- From November 1987 at ASH, kept in storage there until transferred to CMC, and then to CMF in May-June 1988.
- From June 1988, the bulk of it remained stored outside my possession and access until transferred back to ASH in 1990.
- It remained stored away again at ASH and CMC between January and August 1990.
- During some period in 1990 at CMC, guards forced me to throw out boxes full of my irreplaceable legal files, asserting it was quantity-excessive, including RVR files, conviction case files, and much else, largely irreplaceable work product. Guards randomly chose what to take and dispose of when I proved unable to move fast enough to suit them or to choose some to throw out. Of what remained, some was stored outside my possession and access until I transferred back to ASH on 6-6-90.
- From 6-6-90 at ASH, my legal files remained stored outside my possession and access until I transferred back to CMF on 8-15/16-1990.
- From August 1990 at CMF, I possessed some of it, but much of it was stored at R&R, without which I could not complete hardly any, or any, cases for filing, until November 1991, when even what I possessed was seized and sequestered for the next eight months, while I was bounced from one psych wing to another, and nearly died of cachexia.
- On 7-7-82, I was transferred to CCI, while I was dying of cachexia in far-gone stages, and psychiatrically hospitalized as a result, during which time all my legal property was stored outside my possession and access until I was transferred back to CMF for critical emergency medical intervention, in August 1992.
- From that August 1992 period, at CMF, all of my legal files remained stored in staff custody outside my possession and access for one quarter year until I recovered and transferred to CSP-SAC on 11-15-92.

- From 11-15-92 at SAC, most of it remained stored by staff outside my possession and access until I transferred on 6-8-94 to CCI, again.
- At CCI again, as I lay dying of cachexia, a repeat of the 1992 transfer here, all of it remained stored at R&R outside my possession and access, except several boxes full that Warden Jerry Stainer ordered R&R guards to seize and mail out of the prison to my designee, or be destroyed. Several such boxes full of documents were mailed out, never to be seen again by me, the same as if he had destroyed them on site.
- During July 1994, I was transferred to PBSP and my surviving legal files followed me. A large portion of it again was stored at the R&R depot outside my possession and access, without which I couldn't complete hardly any of my cases being worked on, except a few new lawsuits to keep me from being murdered. (I was under a hit contract by solicited inmates by guard Michael Powers and others, who were convicted of crimes of this sort thereafter.) This status continued until I transferred to MCSP on 10-20-95.
- From October 1995 at MCSP, most of my boxes of legal files were stored at R&R outside my possession and access, with ongoing denials of access, month after month, in violation of the prison's own written policy for access, until transferred to CSP-COR on 3-27-97.
- From March or April 1997 at CSP-COR, most of my boxes of legal files remained stored outside my possession and access, regularly being added to by additional takings from me, where weather and critters destroyed some of the boxes full, until I transferred on 11-25-97 to SVSP.
- From November 1997 at SVSP, many of these boxes of my legal files, enough to deprive me of the capability to make much progress on any of my cases, remained stored by staff outside my possession and access, until I was transferred back to CSP-COR a half year later on 5-5-98.
- From May 1998, for the next eight months, these boxes of my legal files once again remained stored at R&R outside my possession and access until I was transferred again on 9-22-2000 to CSP-LAC.
- From September 2000 at CSP-LAC, the boxes of my surviving legal files were stored at R&R outside my possession and access until 7-30-03 or shortly thereafter when I transferred to HDSP.
- From late July or early August 2003, at HDSP, with the exception of about one day, essentially all my boxes of legal files with all my ongoing work product of the past many years which survived, was kept in various storage areas at HDSP. There, while under the property officer's custody in the PHU unit (Officer Gonzales or Rodriquez?), some six boxes full or more, most of which were critical legal files of conviction challenges, RVR challenges worked on for about 20 years, and parole denial challenges, were stolen along with my family Bible, irreplaceable family photos, and other priceless items, and never seen again. The property officer admitted only he had access to this stolen property. The theft occurred within several weeks prior to 11-20-03, when I was transferred with what survived of my legal files back to MCSP.

- From November 2003, at MCSP, through 3-23-06, various amounts of these boxes of legal files (by far most of, at all times), remained sequestered at R&R outside my possession and access, until I transferred to KVSP on 3-23-06.
- During the quarter of a year prior to this 3-23-06 transfer, at MCSP, notable events concerning more seizures, thefts, and destruction of my legal files and other property took place in successive waves, as follows:
 - Guard Ms. Lucas, Lieutenant Blim, and Inmate Scotty Wright (CDC #J-44215), headed up a group of guards who, from December 2005 through March 2006, regularly hit my cell every several days (sometimes every other week or so) seizing and permanently sequestering more legal work product. As I continued to produce more work, they continued to permanently confiscate more, citing it as quantity-excessive. Guards Lucas and her partner Ms. Brown deliberately handed over boxes of my personal and legal property to Inmate Scotty Wright to steal, sell/trade with other inmates, and trash. Wright prodded Lt. Blim to throw me in the hole without cause, whereupon all of my surviving legal property was seized and stored in various areas of the prison illegally (including unsecured in the education department.) Much of it was never recovered.
 - On 3-22-06, the day before the transfer from MCSP to KVSP, all newly-generated and re-gained property in my possession was again seized and packed up for next day transfer, except some of these were merged with 30 plus boxes of my legal work sequestered for the past 19 years. These were herded up into 34 boxes full, and disposed of by Earl Kanipe, MCSP Litigation Coordinator, in a staff action unprecedented in CDC history, as verified by CDC records.
 - During the morning of 3-23-06, at MCSP, Inmate Joseph Garcia (CDC #HO1695), delivered to me a large plastic hefty garbage bag full of my personal property he had recovered from the Lucas-Blim guards' campaign to loot and destroy my property. This contained critical legal work product, many years of efforts, with much irreplaceable documentation. Upon being called for transfer, I handed this property to Guard Mr. Pugh, who handed it to Guard Mr. D. Hammond, which I witnessed, who never put it on the transfer bus as supposed, and it has never been seen since.
 - From 3-23-06, upon arrival at KVSP in transfer from MCSP, and for an unknown amount of weeks following, KVSP staff reported they had "lost" ("ha, ha") my boxes of legal property, which had been stored with the ad-seq property officer, a staff enemy of mine named Mr. Maesa (or similar spelling). Some was eventually recovered, but not all. Within several weeks of receiving the surviving legal files, before I'd had the time to complete any of my legal case work (mainly focusing on a deadlined parole denial petition), I was again sent to the hole

without cause, and all the legal files I had were again taken from my possession and access. For the next several months, as I lay dying of cachexia, I had a nervous breakdown from overwhelming staff abuses. During September 2006, most of my boxes of legal files were returned to me, but some were lost, some looted by guards, and by then I was mentally incapacitated: unable to adequately perform legal work for the next few months. Still, I tried almost daily, with my focus necessarily on my parole denial petition. Most of my RVR files, and past parole hearing files, and conviction case files had by now been disposed of by CDC staff. I continued on this course, focusing almost exclusively, by necessity, on my most recent parole denial challenge, until I transferred back to MCSP for the third time, on 3-29-07.

- From March or April 2007, upon my property arriving at MCSP, most of my surviving boxes of legal files were immediately seized and stored at the R&R depot—most of what still remained: stored outside my possession and access. Without regular access, I could not make any legal progress on essentially any of my legal actions. There they remained, with access denied in violation of MCSP mandatory regulations, until I transferred yet again, back to KVSP on 8-20-08, straight to the hole again, without cause, where access to my legal files were restricted and denied.
- Upon this transfer from MCSP to KVSP on 8-20-08, Sgt. Minnick at MCSP R&R, seized over 20 boxes of my legal files and, additionally, personal property, including back-up files I'd sent out of prison for safekeeping over the years, sent back to me in piecemeal bits at a time. These files have been refused to be sent to me, by Minnick and his partners in this scheme, all the way up to and including MCSP Warden Mike Martel.
- Upon transfer arrival at KVSP, I was placed in the hole again without cause and kept there, with access to most of my surviving legal files denied me, until released from the hole on October 23, 2008. Many items were stolen while in ad-seq property storage.

42. During these 20 some years of re-seized, sequestered legal files campaigns, including continuing presently, at some points, I was granted limited, qualified access to some, not nearly all, of the files. This ostensible, occasional access proved to be a pretense and formality without substance. When I needed access I was denied at staffs' whim, close to 100% of the time, until it was too late to salvage what I lost. And the particular files/documents that I sought, I was denied almost 100% of the time. Staff, by systematic design of the seize-and-store scheme, assured that my boxes of files would remain in a state of chaos, unindexed, disorganized, in rotting boxes with the bottoms falling apart, and making me lift these more than 100-150 pound boxes with a damaged, diseased spine. As such, it required in almost every instance of ostensible access, more hours to ever find what I needed in the scattered dozens of boxes, than what I was ever afforded. And due to my mental disabilities from prison abuses for over one quarter century, nonstop, I often couldn't mentally endure more than a few hours of such file searching. There were times of accessing over 20 boxes at once, all open and

their contents sprawled over a large holding tank, when I was demanded to throw all the papers in random boxes, more disorganized than previously, because I had to be extracted right then for some prison emergency. This happened more than once or twice. Since then, years have been required to re-organize them, and I've never been allowed time to do that. Nothing can be readily found without that re-organizing and indexing.

43. The result of the factual events presented in paragraphs 41 and 42 above, are that in 23 years (1985-2008), I have never been allowed to access all my legal documents necessary to complete petitions for my RVR challenges, for parole denial of three different parole hearings, and my highest priority conviction challenge of provable factual innocence.

DENIAL OF REPLACEMENT COPIES OF LOST DOCUMENTS REQUIRED TO PROCEED

44. Commencing in March 1986, all my legal files that I possessed in my cell were seized and stored away outside my possession and access—many of them forever, never to be recovered. From then until 2008, every several weeks or months, more of my legal files continued to be seized frequently, and sequestered until disposed of. From this inception, March 1986, I began requesting of my prison counselors (CCI), their supervisors (CCII); then “Program Administrator” supervisors, records custodians and their supervisors, associate wardens, and others, to provide me with copies of the RVRs, administrative 602 appeals of RVRs, parole documents and transcripts, and other legal and CDC documents necessary for me to challenge all RVR, parole denial, conviction and other matters. From 1986 through 2008, only two counselors granted my requests for copies: In 1986 at San Quentin, Richard Howell (CCI), provided documents I sought, but before I could complete and file court petitions for them, they were again confiscated by staff and not returned. (See paragraph 41, above). In 1994, after being denied my requests for these documents and file reviews by at least a dozen counselors and records staff from 1987 through 1993, Mark Stambuk (CCI) finally provided the copies I'd requested. However, shortly thereafter, before I could make any significant headway in preparing a petition based on these documents, these were seized and then, I was transferred to CSP-CCI, where Warden Jerry Stainer ordered these documents destroyed or sent out of prison. They were taken by the guards and I've never seen them since. These and all other “safety copies” of documents I'd sent out of prison for safekeeping to family, were all destroyed by the major central California flood that hit the San Luis Obispo area in 1995.

45. All my other counselors, and I asked every counselor I was permanently assigned, and all records staff from 1986-2008, acted on my requests as follows:

- Some said they were too busy and would try to arrange it sometime in the future, then scrambled to have me moved off their caseload or yard; (Gloria Williams, CCI, (1993-94); Ms. Valenzuela, CCI (2000); Ms. J. Priest, CCI, (6-15-06), Mr. Gibney, CCI (2007-09); Mr. Garza, CCI (2008), et al.).
- Some outright refused, stating I'd already received the initial copy of each document and therefore, had no entitlement to another; without regard to the fact that some I had never gotten as mandated, and

others, staff had permanently confiscated illegally after my receipt of them: (Kathy Clark/Johnson, CCI (1995-97); records supervisors (1986-2008) et al.).

- Some outright refused, admitting they didn't have the time to deal with my massive, many volumes of (now, ten) central files; (Mr. R. Trujillo, CCI (1994-1995); records staff; et al.).
- Some provided a limited amount of copies, far less than requested and needed to carry on my legal case work, lacking the most critical documents I requested, without which I couldn't proceed. Some provided only front sides of 2-sided documents, rendering them useless; both sides were needed. Several times over the years, they requested back the one-sided copies for reference to get the back sides, and never returned with the back sides nor the front-sided copy I'd relinquished to them, leaving me with nothing, once again. (Valenzuela (1999-2000); Mr. Whitt, CCI (2006); et al.)
- Others, most frequently, after months and even years of wrangling with incessant requests and finally, grievance filing, provided only a partial file review (about 5-10% of the documents I needed to review) as a pro-forma pretense, and after waiting months, often over ¾ of a year for the copies I spent hours identifying and tagging, they finally informed me that because I was indigent (which is my permanent state while in CDC), they were refusing me all copies of anything from my files. (Kathy Clark/Johnson did this repeatedly during 1995, 1996, 1997; each time again promising she would provide them if I were to spend the hours tagging them, which I did each time). At least fifteen other counselors and many records staff personnel have done this between 1986 and 2008, repeatedly. With this avenue continuously foreclosed by CDC staff, there has been no way for me to obtain the required RVR documents, 602 appeals of the RVRs, parole hearing transcripts and records, and other legal documents necessary for me to challenge these matters on the merits administratively, or in the courts; (Mr. R. Trujillo, CCI (1994-95); Ms. A. Acosta (2002); et al).
- Others: My files were unavailable for over six months at a time. The Attorney General's office at times illegally took the entire C-Files into their possession for over six months at a time so that neither myself nor CDC staff could access it. (E.g. D.A.G., Mr. Cashdollar, 2001-2002).

TIMELY FILING OF 602 ADMINISTRATIVE APPEALS FOR EXHAUSTION

46. I have timely filed a CDC-602 administrative appeal for every RVR I have ever received in CDC. However, many have at some point in the two or three stage process been abrogated and sabotaged by CDC staff to where they couldn't go farther or were aborted by being "lost" while in staff custody. In every such instance, appeals staff have refused to re-file or re-activate the appeal process when I tried, instead killing the process and my right to appeal. This has been achieved by a number of different means. Sometimes by staff returning the 602 with critical and non-replaceable pages missing, without which the process is dead. Also, by them losing the 602 entirely, then refusing to allow re-filing. Also by sitting months-turned-into-years on my 602s, finally re-sending the appeal back to me demanding non-existent or non-accessible documents be attached before I can

have it processed: by sending my appeals to other prisoners who never return them (just as I frequently receive other prisoners' 602s inordinately often, mixed in with mine from the appeals staff); by appeals staff refusing to process the 602 due to documents I've attached, citing them as excessive, yet without which I have no support for my appeal; by incessant, abusive screenouts, which consume months and years of my time in a perpetual game of never ending "screening out"; by guards "rolling up" all my property without notice, including active 602 grievances/appeals under deadlines, refusing to let me access them until their fifteen working deadline expires, after which the appeals staff permanently bar it as "too late" without regard to time tolling. And a host of other schemes to completely abrogate a genuine administrative grievance procedure's availability.

47. Where I theoretically may have been able to file habeas petitions in the courts where CDC staff prevented my exhausting the 602 appeal of each RVR challenge on the merits, I was informed until recently that, to the contrary, this is not allowed by the courts. I was informed of this by case law, by various legal treatises and prisoners' rights type books, by court clerks and judges who barred my petitions on this basis, that without exception, if I did not have the merits addressed at the director's level of a CDC-602, I am thereby barred to prosecute a petition in the courts concerning that issue.

48. Aside from that just stated in paragraph 47, more often what has prevented me from court filing of my RVR challenges on the merits until this instant petition which is not on the underlying RVR merits, is that without access to the RVR and 602 challenging the RVR, I could not remember what my issues were for a particular RVR. With my notes seized and disposed of, and with the ongoing passage of time at each level of the 602 that staff routinely delays their response over the codified time constraints, (which is the norm, frequently exceeding a year for all levels), I could not remember my issues. This has been exacerbated by my having over 40 RVRs petitions to prepare, all at once, as they have built up, and due to my severe brain injury on 11-10-2001, that adversely affects my memory, analyzing and paperwork capabilities. This is why copies of the RVR and 602 I initially always filed have been an absolute necessity for me to prepare a court petition challenge, and why denial of such copies by staff has prevented my capability to prepare and file those petitions. The instant habeas petition has not required me to access the 602s I filed as to these RVRs because this petition is a "pure law" only excess of jurisdiction petition which does not involve the underlying merits of any of the RVRs.

49. The only way I did obtain the RVRs to attach to this petition, was by an attorney (Steven C. Sanders, Sanders and Associates, 3960 Industrial Blvd., Suite 100, West Sacramento, CA 95691.) He obtained them from a filing by the attorney general opposing my parole due to them. Since Mr. Sanders sent them to me, in less than 1 - 1 ½ years time, they have seized from me by CDC staff on at least four different occasions, at least three of those times requiring me to obtain them again from Mr. Sanders' firm, with no end in sight as to how many months or years they would be sequestered by CDC staff. These ongoing confiscations, along with this entire case file of my ongoing work product, has impeded my progress time wise, just as over every year for the

past two plus decades. I finally have been able to get outside people to hold safety copies, and by this means, have finally, only now, been able to overcome this "unconstitutional impediments".

50. In addition to my legal files being sequestered illegally for some two decades preventing my capability to prepare and file legal challenges of the RVRs, parole denials, conviction challenges and other legal matters, CDC staff have also repeatedly and deliberately destroyed and abetted in the inmate thievery of my legal files mixed with other valuable personal material items of property—on over ten well documented occasions. I've collected over 300 sworn or affirmed affidavits and declarations from eye witnesses to occurrences of staff sabotage of my meaningful access to administrative and court forums for remedies, and of CDC staff reprisals against me for being "Lazor, the legal beagle/602 filer/lawsuit filer". Many of these include witnessing staff deliberately destroying my legal files, including my RVR challenges, parole denial challenges, and conviction/sentencing challenges, including the following:

- In 1988 and 1990 at CMC prison, by several guards at the R&R depot trashing boxes of my legal files;
- In 1993-94 at CSP-SAC prison, several times trashing my legal files, directly or via inmates. This included guard Mr. _____ (White?) turning over all my cell property to my inmate enemy Robert Kelly (CDC #C-59443) for Kelly to steal whatever he wished;
- In 1997-98 at CSP-COR, several times, by guards at R&R who issued the ultimatum that either I reduce the quantity of my boxes of legal files by trashing some, or they would randomly do so. About five boxes full were destroyed this way on one occasion, then at least four boxes full again on another occasion;
- In 1994 at CCI, as already described where Warden Jerry Stainer ordered boxes of files taken and mailed out or destroyed;
- In 1996-97; and 2004-2006; and 2007-2008 at MCSP, some of which has been described above, MCSP staff worked in conjunction with inmates on several occasions to allow them to loot boxes of my personal property, which also contained legal files. In 2006, C/Os Lucas and Brown left boxes full with specially favored Inmate Scotty Wright, never to be seen again; on 1-18-08 and again on 5-22-08, guards Mr. May, Baker, and Wilkinson set at least ten boxes full of my legal files and other personal property in the 5-building dayroom and left, leaving them to be looted by inmates who, according to sworn witness testimony, carted off whole boxes full in order to get them to their private cells, where they could pick what they wanted and trash the documents to destroy the evidence of their thievery.
- In 2000, Sgt. Ms. Johnson with six other guards trashed hundreds of my legal papers pulling them from my cell, sweeping them across the dayroom floor and into trash receptacles, in front of dozens of shocked witnesses, at least six of whom testified to this by sworn affidavits.

51. My central files of ten volumes containing over 10,000 counted pages, have proven to have had critical documents illegally removed over the years. Hence, the file does not presently reflect complete accuracy as to

vital matters of what I did or didn't timely file challenging RVRs, parole denials, and other matters: as the proof has been tainted by removed documents.

52. I have continued to file CDC-602 appeals challenging both old and more recent RVRs right up to the past or present year; based on new law and newly discovered evidence I couldn't have previously known even with due diligence. All such 602s have been rejected (screened out) as untimely, though there was nothing untimely about them on these bases.

53. I have been, continuously, since 1992, sent to California's worst, most violent, abusive, terrifying and deadly prisons, through the present and ongoing still, (See EXHIBIT Y, ## 20, 26, 29, 31, 35, 38, 40, at the time each was deemed by most standards to be the worst), and treated with the harshest mistreatment in the state's prisons, according to more than 300 sworn/affirmed witnesses. In that course, I have been repeatedly set up to be brutally murdered on various occasions, shot twice, viciously attacked under CDC staff directives to inmates, have permanent brain and nerve damage from a severe head stomping, and other damages due solely to having an artificially elevated "point score" from the false, fraudulent RVRs at issue in this petition.

54. Ever since the day of the Peterson battery on me in November 1984, except for brief lulls until the networked guards learned where I was following transfers, I have been a uniquely special target of a loosely connected network of CDC guards and other employees connected with them, much like the prison guard gang, "The Green Wall"; and been specially subjected to a 25 year long campaign of what was initially violence, terror and harassment by hundreds of guards who only needed to be told that I'm the target, in order for them to join in, like having been passed a baton in a relay race. The violence/terror campaign eventually distilled down to primarily destroying my life by false RVRs, to keep me perpetually denied my due parole release. This perpetual parole denial by false RVRs is precisely what C/O Peterson's fellow guards promised me on the day he violently attacked me. It precisely follows the specific course those guards promised, in terms of what they would achieve through their statewide network of guards throughout the CDC system. For the first time since 1984, it appears that, as of October 2008 at KVSP, this network is somewhat dissolving except for some lingering traces.

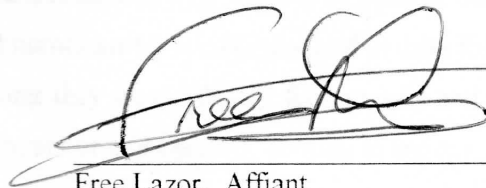

55. I have exhausted every administrative remedy that has been made available to me as to every RVR at issue in this petition, without fail and on time, as described in detail throughout this affidavit and petition.

56. In the past 23 years (1985-2008), I have never refrained for even one month from trying to obtain the required and necessary RVR and 602 appeal documents in order to complete the habeas petitions (this and others) to challenge all the RVRs I have ever received, but could not prevail any sooner than now due to the gauntlets of obstructions never ending, as presented throughout this affidavit and petition.

57. During the past several years (roughly 2007 or 2008), the Americans With Disabilities Act (ADA), a federal statutory codified law, has identified and come to recognize a psycho-emotional disability referred to as "Legal Abuse Syndrome". The disability consists of an emotional/trauma-based condition from being subjected to extreme emotional/psychological abuses from injustices and rigors of the judicial system in America. For

over two decades. I have been trying to describe a psychological disability under which I suffer, and have suffered for over 20 years, which is precisely this Legal Abuse Syndrome. This condition has contributed markedly for over 20 years to my inability to have done more, sooner, on this instant petition and the overload of many others. My experience has been akin to someone who has been brutally raped repeatedly, where they've been so psycho-emotionally damaged that they literally, actually cannot force themselves to confront the matter of sex even in a beautiful, gentle manner due to the ingrained trauma. Similarly, my trauma from legal abuse in CDC and the courts for 26 years (beginning pre-trial for my imprisoning case), is so extreme as to have consumed most of my waking days and nights for all those years, and it imposes a psycho-emotional barrier, an actual block, that impairs and prevents pushing through the trauma of making legal progress. It is as strong as an actual physical object serving as a restraint, but often harder to overcome or remove. The trauma associated with producing this affidavit has been so powerful of a blocker that it has taken me about one half year to write this to completion, while it has been my #1 top priority of all legal matters during that period. Producing a comparable affidavit not impaired by this trauma disability, would take me no more than several hours in one morning—compared to one half year of daily pushing myself here.

I, Free Lazor, attest and affirm, subject to penalties for perjury by state and federal law, that the facts presented in this attested affidavit are true and personally known to me to be correct. And that if called as a witness in any legal proceeding, I could competently and truthfully testify by affirmation as to these matters. This affidavit made this 20th day of November, 2008, in the County of Kern, California.

CDC NUMBER C-73842	INMATE'S NAME LAZOR	(WBT)	RELEASE/BOARD DATE	INST. CSP-COR	HOLDING NO. 3804-120L	LOG NO. 3B- 97-10-047
VIOLATED RULE NO(S) C.C.R. 53005(a)		SPECIFIC ACTS BEHAVIOR WHICH MIGHT LEAD TO VIOLENCE	LOCATION III-B MED. CLINIC	DATE 10/28/97	TIME 0700 HRS	

CIRCUMSTANCES
 On October 28, 1997 at approximately 0700 hours, while performing my duties during pill line, inmate LAZOR, C-73842, 3804-120L, approached the Medical Clinic window requesting his resource. When I started to open the container of resource and issue it to him, inmate LAZOR stated loudly, "Don't open that! I'll do it! Let me wash the top." It was unnecessary to wash the top because the contents were going to be poured into his cup. After issuing inmate LAZOR his resource, he asked for an additional one. I advised inmate LAZOR, per the Doctor's orders written on his chart, he was to receive his second resource at noon. Inmate LAZOR became very demanding and argumentative, which held up the rest of the inmates receiving their medication. Inmate LAZOR stated, "I have a chrono from the Doctor that I should have two and they should be closed. They always give me two." I was unable to find a CDC-128G, Medical Chrono, stating this. M.T.A. M. Puller did inform me in the past that the Facility Medical Staff issued two resources during the morning pill line to avoid this type of behavior being displayed by inmate LAZOR. When I reached out through the window port to issue the second resource with the container opened, inmate LAZOR grasped the carton and pushed it back towards me. This action forced my hand back through the window port, causing the fluid to splash all over my hand and dropping the container. Inmate LAZOR's actions and demeanor is an attempt to intimidate and manipulate staff. Inmate LAZOR is aware of this CDC-115 Rules Violation Report.

HEARING PLEA: "S" REFUSED TO ENTER PLEA. SHO ENTERED A PLEA OF "NOT GUILTY" IN HIS BEHALF. **FINDINGS:** GUILTY
 On 11-5-97, at approximately 0840 hours, inmate LAZOR personally appeared at his hearing and stated that his health was poor. 'S' rights and the purpose of the hearing were read to him. 'S' acknowledged receipt of all pertinent documentation at least 24 hours prior to the hearing. No I.E. was assigned per CCR §3115(d) (1).
INMATE PLEAS: Subject refused to enter a plea at the time of the RVR hearing. This SHO entered a plea of NOT GUILTY in his behalf. Subject stated, "I don't feel that I can have a fair hearing. It never happened, I'm afraid of extreme retaliation so I'll plead GUILTY and hope it goes away."
INMATE'S REQUEST FOR WITNESSES: Subject did not request any witnesses to be present at his hearing.
FINDINGS: 'S' is found GUILTY based on the Reporting Employee's written report in which the R.E. specifically states that 'S' became demanding and argumentative, grasping a carton of Resource and pushing it back towards MTA Maldonado, causing the fluid to splash on her hand. Furthermore, 'S's actions delayed the orderly dispensing of medication to other inmates. This SHO finds a clear preponderance of evidence to support the stated charge.
ADDITIONAL COMMENTS: 'S' stated that he would not receive a fair and impartial hearing from this SHO. This SHO determined that per CCR 53320 (h), which states "Staff who observed, reported, classified, supplied supplemental reports to, or investigated the alleged rule violation; who assisted the inmate in preparing for the hearing; or for any other reason have a predetermined belief of the inmate's guilt or innocence shall not bear the charges or be present during deliberations to determine guilt or innocence and disposition of the charges." This section has no relevance toward this hearing as I was not present at the time the incident occurred, did not submit any reports, did not investigate and/or did not assist this inmate in preparing for the hearing.
DISPOSITION: Subject was assessed ZERO (0) days forfeiture of credit for a Div. "F" offense due to being a LIFER; ninety (90) days loss of privileges which includes yard and dayroom restrictions, no family visiting and no telephone, from 11-5-97 to 2-3-98 and was counseled and reprimanded.

(1) Note date of Oct. 28, 1997, of supposed incident; (2) Note name of "Sgt. T.W. Steadman" and "Lt. T.J. Godin" as superiors who approved false report (RVR) and "guilty" verdict; (3) Now, see back side here: EXHIBIT B: Memo of T.W. Steadman acknowledging all "white" prisoners (Lazor is white) were locked 24 hours per day in their cells (Code words: "Modified Program") until Oct. 29 (paragraph 1). Notice Steadman's malicious attacks on Lazor for his recent filing of a complaint to Lt. Godin of MTAs (medical guards) assaulting him (paragraphs 2, 3, 4). This falsified RVR was clearly a reprisal by Steadman & Godin for Lazor whistleblowing/exposing MTA assaults & battery, just days earlier, in a complaint to Godin (using proper chain of command, by the way). (4) Now see EXHIBIT C, next page here, for the clincher.

Date: October 29, 1997

To: Inmate Lazor
C-73842
3B04-120L

Subject: REQUEST FOR RESOURCE

As of October 29, 1997, the White and "Other" inmates are off Modified Program. If in fact you are entitled to the resources as you alleged, then it is your responsibility to report to the Medical Clinic at the designated times to receive them.

In your letter to Correctional Lieutenant T. J. Godin, you wrote you have been assaulted twice by two different M.T.A.'s. If you have been assaulted as you claim, I am requesting you file the proper charges against the staff members, but I believe these are false allegations.

It would behoove you to stop making false allegations. Furthermore, it appears you are attempting to gain special considerations or favors from the Lieutenant. If in the future you have any further problems, please use the correct chain of command. That is, start with your Floor Officer and if your issue is unresolved then contact me. *

If I am unable to resolve the issue, then you may approach the Facility Lieutenant to request the necessary assistance. Any deviation from this chain of command could result in disciplinary action against you.

T. W. STEADMAN
Correctional Sergeant
Facility III-B
CSP-Corcoran

cc: R. PRIOLO, Facility III-B Captain
T. J. GODIN, Facility III-B Lieutenant
Facility III-B Medical Clinic
Housing Unit Bed Card
Inmate's Central File

* Lazor followed all of these procedures perfectly, first. He then filed the official complaint which Steadman demands, and for it, was retaliated against with being thrown in the hole; and with numerous additional false RVRs, guilty verdicts and punishments which continue to the present day, inflicted anew, from those 7 year old verdicts; In addition to continued parole denial for these falsified reports.

EXHIBIT B

MEMORANDUM

DATE: October 25, 1997

TO: ALL STAFF AND INMATES
Facility III-B
CSP-Corcoran

SUBJECT: PLAN OF OPERATIONS FOR FACILITY III-B

SCOPE: On October 25, 1997, at approximately 1320 hours, a physical altercation occurred on the Facility III-B Recreation Yard involving a White and an "Other" inmate. During the course of the fight, both inmates were ordered to "get down", with negative results. A Correctional Officer attempted to control the inmate's aggressions and was battered. O.C. Pepper Spray was needed to quell the fight. Based on these facts, all WHITE and OTHER inmates are being placed on "Modified Program Status" pending investigation into this matter.

Inmates housed with a WHITE or OTHER inmate will be affected by this Plan of Operations as well as those inmates housed in the Facility III-B Gym.

MEALS: All WHITE and OTHER inmates will be cell fed, with the exception of those inmates housed in the Facility III-B Gym. Affected Gym inmates will be fed in the dining hall using controlled feeding procedures.

WORKERS: There will be no White or Other inmates released to work/education assignments, other than those inmates designated as Approved Critical Workers and those inmates participating in the Century 2000 work program (P.I.A.). These inmates are identified on the Essential workers list and are to be released no later than 0630 hours regardless of weather conditions or ethnicity.

DUCATS: Only Priority ducats will be honored for WHITE and OTHER inmates. All affected inmates will be escorted to and from their ducat destination.

SHOWERS: Showers for all WHITE and OTHER inmates will be conducted in a controlled manner with each inmate being given the opportunity to shower once every three days. Showers for White and Other inmates will begin on October 26, 1997. Critical and Essential workers shall be showered daily upon return from their work assignment. Housing Unit Officers will maintain daily shower logs and turn them in to the Program Sergeant at the end of their shift.

CONTINUED ON BACK SIDE →

NOTICE

Plan of Operations Cont...
October 25, 1997

VISITING: Normal visiting will be permitted for all inmates. Affected inmates will receive an unclothed body search prior to their visit and will be escorted to and from the visiting room. The Family Visiting Program will continue for all inmates.

MEDICAL: An On-duty Medical Technical Assistant (MTA) will conduct rounds in all housing units to dispense prescribed medication and provide necessary medical attention for all affected inmates.

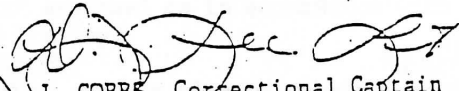

LIBRARY: Access to the Legal Library for WHITE and OTHER inmates is suspended until further notice. Priority Legal Users (PLU) will be escorted to and from the library.

CANTEEN: Canteen privileges for all WHITE and OTHER inmates is suspended until further notice. Critical workers and Essential workers will be permitted to draw canteen.

YARD/
DAYROOM: Yard and Dayroom activities are suspended for WHITE and OTHER inmates.

TELEPHONE: Telephone privileges are suspended for all WHITE and OTHER inmates with the exception of Critical Workers and Essential workers.

SYNOPSIS: All WHITE and OTHER inmates housed on Facility III-B will remain on "Modified Program" status pending Administrative Review of this matter in order to determine a safe return to normal program. THERE WILL BE NO DEVIATION FROM THIS PLAN OF OPERATIONS, UNLESS AUTHORIZED BY THE ASSOCIATE WARDEN AND/OR FACILITY CAPTAIN.

(for)

J. COBBS, Correctional Captain
Administrative Officer of the Day
Facility III-B, Level IV.
CSP-Corcoran

Page 2 of 2

This is the prison's 2-page internal memo proving, along with EXHIBIT B, that both Steadman & Godin fully knew the malicious MTA (Ms. Maldonado) had filed a false report against Lazor, who they knew was in his cell all day -- to extend his imprisonment, forever, along with other guards involved in this scheme.

Compare EXHIBITS B & C (this), to prove that Lazor was locked in his cell continuously from Oct. 25 (at approximately 1:20pm (=1320 hours)); until Oct. 29, and thus could not possibly have been at the "medical clinic window" as the report falsely alleges.

WOULD THE PUBLIC BE AMAZED TO KNOW THAT DOZENS OF THESE FALSE REPORTS BY THESE MALICIOUS CRIMINALLY-BEHAVING PRISON GUARDS, ARE THE ONLY REASON PF LAZOR IS IN PRISON TODAY, AND FOR ALL THESE YEARS SINCE 1992, WHEN PAROLE WAS OTHERWISE DUE?

SERIOUS
STATE OF CALIFORNIA
RULES VIOLATION REPORT

CDC NUMBER C-73842	INMATE'S NAME LAZOR (W)(J)	RELEASE/BOARD DATE	INST. CMF/M	HOUSING NO. L-206L	LOG NO. 89355
VIOLATED RULE NO(S) DR #3014		SPECIFIC ACTS FAILURE TO RESPOND TO DUCAT	LOCATION I-2 COUNSELOR	DATE 1-11-91	TIME 0900 HRS

CIRCUMSTANCES
On January 11, 1990, at approximately 0900 hours, Inmate LAZOR, C-73842, L-206L, failed to respond to a mandatory ducat to report to the I-2 Counselor's Office. I made additional attempts to contact LAZOR throughout the day, with negative results. The purpose of the mandatory ducat was so that I could provide Inmate LAZOR with a Life term Prisoner Documentation hearing update notice. I left the notice with the L-2 Housing Officer, third watch, and I left LAZOR's BPT Report with Mr. R. Hargrove, Correctional Counselor II, for delivery to Inmate LAZOR.

LAZOR is aware of this report.

HEARING
Subject was present at the hearing and appeared in good health. Subject acknowledged receipt of a copy of the written report and CDC-115-A and waived his right to at least (24) hours preparation prior to the hearing and stated he was ready to proceed. Staff Assistant and/or Investigative Employee was not assigned as in accordance with DR #3318(a/b). Subject requested no witnesses present at the hearing.

STATEMENT OF SUBJECT
Subject refused to enter a plea of make any statement in his behalf. Subsequently, a plea of not guilty was entered in Subject's behalf by the Senior Hearing Officer.

FINDINGS
Subject is found guilty based on the contents of the written report.

DISPOSITION
Subject was warned and counseled in regards to his future behavior expectations. Subject is participating in Program and Treatment (MOC/POC) which was considered at the time of the hearing. Subject was assessed 30 days loss of behavior credits and referred to UCC for confirmation of credit loss. Subject was advised of these findings, disposition and appeal rights. Procedural requirements/due process rights were complied with.

BLAKE

3/19/91 USC CONFIRMED ✓ R. Hargrove (PACA)

Besides this lie showing factual innocence, the law says: "Staff who review or classify a CDC form 115 shall not serve as the disciplinary hearing officer for that rule violation." (Title 15 California Code of Regulations, §3313(b)). But the law means nothing to these people. Blake was stealing thousands of dollars weekly from prisoners' cells/personal allowed property, and had a vendetta against Lazor for exposing that.

EXPLANATION AND RELEVANCE OF OFFICIAL CDC DOCUMENT SHOWN BELOW:

This page is EXHIBIT A of ATTACHMENT #2 on the obverse side of this sheet. EXHIBIT A, below, is an official "chrono" document, which is signed by both Gloria Williams and her boss, Romey Hargrove, acknowledging by their signatures that Lazor was in their presence on 1-11-91, picking up the board report. Yet Williams had written the false rule violation report claiming that Lazor was never found that day, 1-11-91, never in her presence that day, never therefore picked up or signed for the board report that day -- which this document signed by her (EXHIBIT A) proves to be false. (See obverse RVR: "I made additional attempts to contact LAZOR throughout the day, with negative results," That is hereby proven to be a fabricated lie by Williams). This "chrono" (EXHIBIT A), was hidden from Lazor for many years, including during the so-called hearing wherein he was found "guilty" of the offense. Had it not been hidden by Williams and other CDC staff, Lazor would have been found "not guilty" of this RVR. Once discovered, CDC deems it "too late" to present for consideration. The guilty finding, as well as parole denial for endless years, sticks -- as well as thousands of additional punishments, continuing to date, 13 years later, in 2004 -- based on this guilty finding.

Williams and R. Blake, who rendered the "guilty" verdict, knew that most of these appointment "ducats" are trashed by the inmate workers who staff gives them to, to pass out to the prisoner; so they never know they are being summoned. But regardless of no notification, Lazor was readily found right where he was supposed to be, at his work station, and promptly reported to Williams early that day. This scheme constitutes kidnapping, by criminal conspiracy of Williams, Blake, and parole board commissioners, who each know how this game is played, and their integral cooperative part in it. Tragically, about EVERY RVR against Lazor (dozens) was likewise falsified.

Also: SEE NEXT PAGE (EXHIBIT B) for laudatory work report by Lazor's job supervisor, which is where Lazor was supposed to be, and was readily located, on 1-11-91. (This work report (EXHIBIT B) was written 13 months earlier, but Lazor continued to work there daily through 1991, as a highly sought-after worker, due to his exceptional work performance).

NAME and NUMBER LAZOR, PAUL C-73842

The Board Report for the JAN '91 Board of Prison Terms Calendar was discussed with the above inmate and his caseworker, pursuant to AB 73/27.

CIRCLE ONE: Subject refused to respond to ducat for 1/11/91 ^{Mandatory}

GENERAL CHRONO: R. Hargrove CC II

EXHIBIT A (OF ATTACHMENT #2)

EXPLANATION OF CDC DOCUMENTS BELOW:

The first report, below, shows where Lazor was on 1-11-91, until Williams summoned him from there to her office. It also shows exemplary work and conduct. The other reports below, reduced in size for space, and likewise on the next page, show just a sampling of many more good conduct reports by honest guards, but many illegally taken from prison files by CDC staff and destroyed. Even with these in the file, the BPT rejects them and punishes Lazor for them, because one malicious dope-crazed guard wrote another overriding report, falsely claiming that Lazor had "manipulated staff" to gain these reports and/or falsified/forged them. Lazor was found INNOCENT of that false charge, but the malicious guard wrote another different kind of report which gets no "verdict", stating the same thing, which remains prominent in the prison file for the BPT to judge at parole hearing time.

NAME and NUMBER	LAZOR, P. F.	C-73842	CDC-128-B (Rev. 4/74)
<p>Mr. Lazor has worked as the Arts In Corrections lead clerk for approximately eight (8) months. In this capacity he types memos, reports, purchase orders, price quotes, with speed, accuracy and enthusiasm. Inmate LAZOR has displayed an eagerness to learn and he grasps concepts easily. He has become a real asset to the Art Program photo documentation process and he also has become a great help with our video projects. I feel he is above average in intelligence and has potential for real positive life accomplishments.</p>

DATE	October 13, 1999			
<p>Inmate LAZOR, C-73842, has been the chapel lead clerk for the level-4, C-Facility chapel at Centinela State Prison since January, 1999. Throughout this period, he has assisted the chaplains of the various different faiths with a good attitude, enthusiastically willing to do whatever is requested of him, even on the spur of the moment. He willingly works extra hours and days beyond those required. Mr. Lazor has always been willing to facilitate whatever clerical needs I've had, especially as a highly-skilled typist, in speed, accuracy and responsible decision-making. Mr. Lazor works well with minimal supervision, and has also initiated and persisted in volunteer religious projects, including music, songbook construction and preparation. Mr. Lazor has proven to be able to very efficiently handle any of the wide range of clerical duties and responsibilities that arise in this setting, more ably than the average clerical worker.</p>
