

Dear M. I really don't know where to start as I have so much to tell you about.

Anyway, I want you to know that I appreciate having you for my new friend.

I have about Seven different Energy devices. About half of them can be proven to work right now as I can direct you to different website to see the concept actually working.

The most crazy one of my concepts is called the STIWAL (Static Time Internal Warp Levitate). I normally would never mention this device as it really sounds totally crazy and therefore it is the last one that I would ever talk about. But the point is this, you can go to a web site right now and see a concept that is similar to mine actually working. Go, to "Johnsearl.com". John is an friend of mine and he has been able to make anti gravity since before the assassination of JFK. He is in his 90's now and might now be around to much longer. The point is this, I have a better design in my opinion them him. Rudy has the drawings right now for the STIWAL on his hard rive. If I can ever get out of this mess, I would like to build the first one to levitate my car. Kind of like the cars that they showed in the Movie the Fifth Element.

About the GALT. I really like this design and Jeremiah now claims to have a different version of it. Jeremiah works in Bob's dome and now has just gotten my CNC Machine hooked up to power and this means he will be able to start cutting out some of these energy devices in a larger size almost immediately.

Before Bob, died, he had sent a loan application to the In-Q-Tel.org for me. They are a CIA Lender that lends to support any device that has military applications. My GALT would actually replace all of the Nuclear Reactors in all of the Ships and Subs. They would be interested in the GALT, if they would just believe that we really have something that is this exciting. The point is this. The In-Q-Tel, group give out loans at 1 or 2% interest, and for every dollar they loan you they give you a gift of \$11.00 for free. This means that if we were to borrow just \$100,000 we would get about \$1.2 million to spend. Then on top of that they would provide us our first big customer and contract, the U.S. Navy. Remember I was in the Navy as I joined when I was only 17 years old. So, I'm a sailor.

I have wanted to have someone show President Trump, my video that is now on the Y Tube.

My mother has written President Trump about four times and he has actually answered each time. In the last letter she got, they gave me a Pardon Number and said that they are now considering my Pardon, but there is no time stated for this relief. I just wanted you to know that we have already been attempting to get his attention.

Remember that I was in Russia when they said I was here hiring the Swisher guy to be a hit man. Swisher was in a coma in the VA hospital in July of 2002. My Passport showed that I was traveling all over the world during this time. They hid both of these things. Also I had many alibi's. My interpreter while I

was in Russia was named Roman Ponomarenko. He was my closest friend during these travel years and we have his affidavit concerning my alibi with him. He became a Senator in the Ukraine after I went to prison and then about two years ago he died of the flu. This was really sad.

I had talked to him from prison and he was very excited about the GALT Motor. He had the idea that we could make a deal with the Ukrainian Senate to become the power company for the entire country. He told me that they are currently paying about 80,000,000,000 a month for the power at .10 per KWH as they have no means to make their own power. He told me that they sell food for Euro's's and then use the Euro's's to pay for the purchased power. He also told me that Russia had stolen all of the Coal mines that were in the Crimea, and this is why they are having so much trouble keeping every body warm. Our offer deal, was as follows: We were going to drop the price of the energy to the people by 50%. Then we were going to only collect 40,000,000,000 a month and then we were going to give 50% of that to the Senate to pay for their federal government. I just wanted you to know that we really at this time have no intention of selling any of my devices as we want to just sell the power. I wanted you to understand that we have discovered that we can not get a U.S. Patent in this county. Note that Mr. Son (billionaire from Japan that owns the Softbank) has stated in the WSJ that if anyone had the way to get rid of Japan's Nuclear Reactors, he would right a check right now. I have not been able to get anyone to just help me

reach out and get someone's attention of interest. But I keep trying.

Now I have also designed a new Electric Jet Engine, that could be used to replace all piston engines, Jet Engines and electric motors. This concept also uses no fuel as it makes its own electricity as it runs.

All of the concepts that I'm now using are in fact totally provable using regular physics concepts. For example, the GALT Motor is really an A.C. Alternator that violates the Law of Lenz as it makes free torque while it also creates A.C. Amp flow to feed the Grid. Now we would convert the A.C. into D.C. and then we would use regular Tie In Inverters that are already on the market to feed the Grid.

It is interesting to note, that as we need no fuel for our concepts, the whole invention would pay for itself in just a few hours or maybe in a day or two. This means that we can maintain a growth curve straight up through the sky. I would propose to build a two foot rotor model that will earn about \$250,000 a month and get it installed and then use 90% of the money coming in to build many more and just keep expanding as fast as we can.

But as you can see as we have military ramifications, we really could use some political help. I would be interested in working with you in any way that you desire. But again, at this time I really do not want to sell any of the actual GALT Motors as I just want to feed the grid everywhere in the world. But, I

would be willing to sell them to the U.S. Navy and help them remove the Reactors.

I therefore, to believe that President Trump would be interested in what I have to offer this country. Note that as he already has written my mother and they are already considering my pardon, it might now take much to just get him to do the right thing at this time. Remember this is no evidence that I ever talked to Swisher let alone hired him to be a hit man. Note that Mr. Swisher was actually in the VA Hospital in a coma in July when he said I did all of these crimes. Two of the Judges that canceled my appellate win, were the Judges that canceled Trumps travel ban. These people have created law just for me. I'm not sorry for anything that I have done in the past and now plan to do ten times more of it in the future and if they don't like it, I'm game to go anywhere in the world to just get out of this rotten place.

One of the main reasons that they were after me is that they do not like me making Copper Water. Copper is amazing and it is known to kill every virus known to man; and all parasites; and all molds and mildews and now we find out that it also seems to kill all Cancers everywhere throughout the whole body system. Therefore, the Copper should replace Penicillin and even the need for inoculations, as we can now remove Aid's in about two hours and even the symptoms.

Rudy has been collecting some new testimonials for the Copper. Rudy has been acting as my store bank for information and concepts.

So, as you can see I have a lot to offer and I'm ready to make things happen. I also would like to help you with your California Project.

I had the idea of using the Platinum Mine to help create Token that are backed by some real value. I just have 100's of ideas and I can talk for hours about them. I have written a lot of papers about these many different things and Rudy has copies of some of them and Guy has the rest.

Anyway I'm out of time on this end. I have not gotten your email yet. Therefore, if you have any questions please go ahead and email them to me and I will give direct and specific answers.

Anyway I appreciate your help and I will call you on Saturday, as you requested.

Your friend Dave
