

Step 1

Clean application surface!
Line up your decal, and place a strip of masking tape down the middle (do not remove transfer tape or backing paper yet).

Step 2

Slowly, carefully peel back transfer tape from the right half of the decal (vinyl graphics will stick to transfer tape). If any part of the vinyl doesn't peel off with the transfer tape, stick transfer tape back down to backing paper, and firmly squeegee down with plastic card (credit card/license, etc.).

Step 3

Cut off exposed backing paper with scissors.

Step 4

Using a plastic card such as a credit card or license, squeegee down right side of graphics, moving from center towards the outer edge.

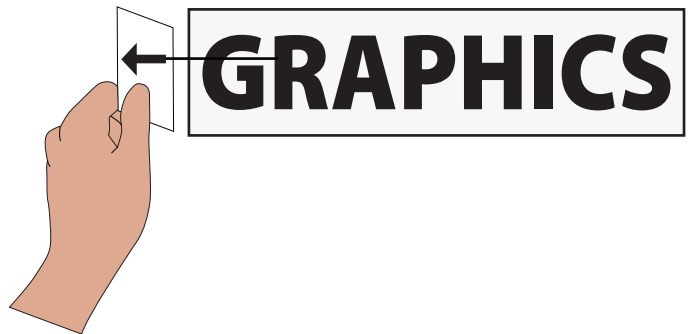

Step 5

Remove masking tape and remaining backing paper.

Step 6

Squeegee down remaining graphics, moving from center towards outer edge.

Step 7

Slowly and carefully remove transfer tape from decal. If any part of the vinyl graphic does not stick to the install surface, press transfer tape back down onto that area and slowly peel back again.
