

Idea plan that we can use and build down from - its a framework for a masterpiece.

So here are the concepts I have in my mind and it relates to your work precisely. I will try to write very little to define the idea since my mind is going 10,000 miles a minute right now.

Concept 1 - Thought loop from 10D to 1D = my pictures = your pictures = course to teach

Concept 2 - logic tree - neurodivergent mind

Concept 2b = ADHD = AuDHD = Autism

Concept 2c = mental health issues GAD = cPTSD = chronic depression

Concept 2d = Concept 2 = Neurodivergent mind is just a different way of thinking

Concept 2bv2.0.0 = ADHD = hunter trait = hypervigilance = paranoia = keeps us safe

Concept 2bv2.0.1 = Autism = Builder trait = hyperthinking = logical minds = why? Questions

Concept 2bv2.0.2 = AuDHD = Architect trait = Planners = ADHD = Autism = We have both traits

Concept 2bv2.0.3 = We have both traits = we co-ordinate = we all have loopy minds

Concept 2bv2.0.4 = we all have loopy minds = minds eye = abstract thinking = like minds

Concept 2bv2.0.5 = like minds = bridge medium music = pictures = drawings

Concept 3 - time loop = AuDHD minds in history = cleopatra = Michelangelo = Tesla = US = ...

Essentially we can start with the course and in the course implant a seed of the brilliance of the neurodivergent mind as the top and everything falls under that umbrella. This is a massive project that can go on indefinitely and as we give away ideas it will create our own market in time because we can then fit in anywhere on the following thought lines to make as much money as we like.

OPEN THOUGHT LINE 1

2D TO 1D TO 1D TO 2D TO 2D TO 3D INPUT in the recursive feed back loop is simply because a 2D perspective will need to see the same images 4 times and likely as much as 10 times to get the idea into their brains.

200IQ = 160IQ

160IQ = 115IQ

115IQ = 90IQ

90IQ = 75IQ

Because the model needs to be simple enough for a person with limited intellect to understand completely but be so complex in design that a person with a genius and above degree of intelligence can deep think about it. Don't worry - its not hard. A simple picture that I have been plastering around the internet with the ADHD kid and the Autism kid does the trick. We can develop our own in time from an AI generated image and you can also draw your own to define as well. Depends on what your perspectives are and your brilliance will shine if you just draw your mind.

Essentially all this means is that you can draw time crystals from your mind and I can find the pictures in my phone as a step by step process that we just need to build. It starts from a single point - a poem and a picture and just grows from there. I can supply all content for the neurodivergent mind and it will rewrite history in the past today, in the present which will in turn rewrite history and in this way will change the entire world perspective in time.

Basically - we are prodigies that are considered disabled and if we speak publicly about this we will be silenced. If we just focus on small things independently and get it to market - it will take off in a massive way. I can write dozens of poems and small articles for you and will email them as I get answers to my questions.

In turn you can then submit this to poetry contests or magazines and make yourself money. I will email you my books that I have completed - this is my own works and you can build off of it in your own way - I will try to get them published and in the event that I cannot do this - hopefully in time you will be able to do it yourself.

All I ask in return is in 5-10 years when you are rich - you write me a check that can take care of me the rest of my life. I want to see you become a \$Billionaire and change the world. I know you can do it - because we have similar minds and because I believe in your brilliance too.

Take care Melody. Let me know what you think. (I was in trance when I wrote this - no idea what it means but it is brilliant by design - print it too)
