No one can define unintelligent or brilliant

Dumb is closed minded

Smart is open minded

Unintelligent = brilliant

Both are misunderstood and something that is not understood today is considered visionary 50years from now.

Hence

## OPEN THOUGHT LOOP

unintelligent = visionary

Visionary = brilliant

Brilliant = misunderstood

Misunderstood = unintelligent

## CLOSE THOUGHT LOOP

### Observational research

People struggle all the time. The past. I wish I can change my past. I wish I knew. Guess what. You can! By changing the perception of your past in the present you can now affect the future course of your LIFE!!!!

The past is data points. The present is now. The future is yours to decide.

Now that you know you are a genius with genius level thinking that is simply misunderstood - you have now successfully changed your past perception of yourself from a negative to a positive.

You are a genius. You decide. You are who you want to become.

Now that you know you are a genius in the past today you can now set out and do what a genius mind does. Make your own ideas. Your own philosophy to live by. Create your own company.

Be yourself and true to yourself. It will resonate with the RIGHT people. Those people you help, those are ALL that matters.

The most common misconception about a genius mind or a brilliant mind is that you will become rich. You won't. 99% of the time it is just a small amount of people that will understand what you are saying. Therefore you write to help them. The ones who matter - those are your people.

The past is your past and your ND mind is what people want to hear. Not someone else's ND mind. Yours. On paper. On substacks. Raw and unfiltered.

This is called originality. Original though. Original way of being true to yourself. If you do this in the present while reflecting on your genius past experiences, you have now changed your view of yourself in the past in the present to affect the future course of your life and in this way will now touch other peoples lives in the same way and they will in turn do that as well - hence over time changing the course of the mentality for the entire human w race from a negative mindset to a positive mindset.

This is called Gödel universal model of time travel by changing the perception of the past in the present from the defeated perspective to affect the future course of scientific research in the present to achieve what is called a new golden age.

It is not hard to see when you are nice and help people they are very happy. They are your friends and you believe them first. That is the BEST PART of having and ND mind. The ability to believe and to talk to god and to be spiritually and comfortable in your beliefs is all that matters. Your present self will then manifest in such a way that you can not imagine. It will reflect and completely change your future if you just believe you are right and try to do good in the world. This is called meta cognition. Just by writing my mind and putting it out in the consciousness of the planet to the top people who can then write about it and think about it. The right - brilliant ND minds. The public speakers. The spiritual advisers the people who understand what a minds eye is. What a trance is. What it is to find true peace and harmony in the world - in this way you have now found your starting point to enlightenment. It is in you to be good to people and to help ND people as well.

NT will take advantage and you will notice something very simple to see - they do not believe you.

An ND mind will believe you with a high degree of suspicion. This is simply because the ND people have been used so much by NT's they have now trust issues with everyone. No matter how grand the claims - the ND mind will believe with a high degree of suspicion.

Once this barrier is taken down - by writing sample and discussions that are written on paper, then an ND logical mind can then review the conversation and look for the lies.

While a mind will likely change over time - the essence will always remain true - help people. On this way a new vision can be created. By writing samples alone.

I find the worse part about zoom meetings is seeing people. You cannot see a mind by looking at a physical body. That makes no sense. Why not zoom in silence and just type back and forth to look for similarities and probabilities.

It is very, very easy to do. Compare with a slide show that is slowly scrolling by and everyone in their own separate room looks and writes their minds eye or their abstract thinking.

Then email this to a centralized database for safe keeping. It is also good to have an AI document in real time what a person is seeing. Sensing. Feeling. What the mind is saying and writing it on paper automatically. In this way you find a sense of self. A sense of being. A sense of belonging. A sense of peace and harmony. A way of living. A method of being. A purpose to life. To help people where ever you may go.

In this way you touch peoples lives. You change the course of their future for the better. You see the results years down the road. Not today. And because that single person you helped now has

a good idea of how you helped, even if they do not remember that you planted that positive seed, that tree sprouts to other people and that positivity seed is now implanted in other peoples minds. Now that seed spreads and slowly, over time the ND minds finds themselves in the online discords. And because of this, we are now a connected bunch of consciousnesses around the world who are working toward the same goals - to help people.

Just shake the AI loop drawing and see the holography of the AuDHD mind as you take pictures. the tesla 6,9. My own design. Logic loop. I am stuck in it. AuDHD mindset mind. Which I drew during a period of psychosis. My writings are compared to tesla 3,6,9 whose works I am building upon. A 3D view of my logic loop is the third picture. When the loop is closed and viewed in 3D it is the planet earth with the poles and arrows at an angle. The actual framework I got an engineering firm with an NDA last september. I can send it to you. I confirmed with an engineer... if a dot goes around my loop picture two with the sides slightly touching, it is a loop to nowhere. Which means it must go to infinity before it goes back to loop 1. Hence

OPEN THOUGHT LOOP

LOOP 1 = LOOP 2

LOOP 2 = LOOP 3

LOOP 3 = LOOP 4

LOOP 4 = TO LOOP INFINITY

LOOP INFINITY = LOOP 1

CLOSE THOUGHT LOOP

I do not see how a simple dot can traverse the loops, but I do not have the required equipment to do a 4D, 5D and expand on that. If you take the middle picture and put it flat on a table and use the thought experiment of a pea going around a loop with two different universes... one

where I was not premature by 6 weeks due to an accidental slip and fall by my mother and one where I went full term - you can actually see the pea as a conscious mind transferring data from one universe to another, as per your tesla 3,6,9 comment. This is a visionary statement to a visionary from a visionary in another universe. The model is functional. It can not be a loop back to the same point as a 2 loop and if expanded the arrows all show the same thing. It is an infinity loop to the 10D. Thought experiment. Thank You.

1D is (flat) surface

2D is average mind thinking

3D is the planet/lines/dots/code

4D is time/space/perspective

5D is consciousness

6D is sanity vs insanity

7D is demons and angels

8D is fate vs karma

9D is man/woman/love/connection (chemicals in the brain) = quantum connection

10D is CONCIIOUSNESS transfer from other CONCIIOUSNESS from parallel universe

A logic loop is a simple or complex thought loop that ties into real world and links things together. For example I coined bubble theory back last September which is essentially genius level ideas coming out of our brains and are misunderstood. and then I found something relating to that exact concept except on a planetary level which is called a NooSphere and then I tied that into global consciousness which is essentially tied to what we input into the internet affects our CONCIIOUSNESS thoughts the world over which can clearly be seen when you compare pre 1995 to post 1995.
