Wide band Repeater	17-31
Band selective Repeater	32-41
Fiber optical Repeater	42-45
Passive components	46-54

Company profile

Shenzhen ZNV Technology Co., Ltd(Called "ZNV"). Founded in 2005, it is a national high-tech enterprise, formerly known as ZTE Liwei, a subsidiary of ZTE. Depend on AIoT core technologies such as ubiquitous data access, convergence, big data intelligence, AIoT system integration and delivery capability of more than 10 years, ZNV deeply cultivates the market segments of Power& Environment monitoring, intelligent operation and maintenance, safety emergency and one-network management, providing AIoT hardware, software products, solutions and services. At the same time, ZNV is rapidly expanding the field of enterprise digitization and enterprise services, providing AI software, big data software, application services and modeling services for more than 100 enterprise.

Company culture

Our Mission

Create a working system with safe operation and optimum energy utilization for customers!

Safer world, better life!

Corporate Vision

Values

Honest, professional, innovative, win-win!

ZNV Experience

20+Years Telecommunicaiton Experience &
10+ Years Industry Delivery Experience

R&D	Marketing	Delivery
25%+ Master degree or above	30% Marketing share for P&E, Intelligent gateway	18年 R&D management experience
700+ Patents and software Copyrights	50+ Smart city and one network of management	CMMI-5
Provincial Engineering Technology Research Center	100+ Digital and intelligent service enterprises	31个 Provinces, cities and autonomous regions

National Level

- Selected in the Ministry of Science and Technology national key research and development plan "Science and Technology Innovation 2030 - "New generation of Artificial Intelligent "" project, ZNV is the leader of the subject
- ZNV was selected as one of the "Key technologies and Demonstration countries of IoT and Smart City 2019-2022" by the Ministry of Science and Technology

Provincial Level

- Be award as "Engineering Technology Research Center of Urban Management Pre Warning and Prediction of Guangdong Province"

City Level

- "Research and Industrialization of Key Technologies of Full Data Connection System in AIoT" was selected in Shenzhen National Development and Reform Commission 2019-2021 Support Plan for strategic Emerging Industries
- The project of "Research and Development and Industrialization of Sentosa Big Data Management and dispatching Platform based on Programmable containerization Technology" was funded by Shenzhen Municipal Bureau of Industry and Information Technology in 2022 to promote the key links of digital economy industrial chain
- "Research and Development of Key technologies of heat dissipation protection materials for 5G communication equipment" was funded by 2020 Key Project of Shenzhen Science and Technology Innovation Commission

Undertake Scientific and Technological Innovation Projects at all Levels

Competitions/Awards, Gain a Wide Range of Authoritative Certification

"2022 Industry AIoT Innovative Enterprise" of CAS

Top 100 telecom Equipment Technology Service providers in China by 2022

Elevator Coverage Solutions

The elevator space is small, the elevator shaft is surrounded by reinforced concrete and reaches a height of tens of meters. The elevator car lift and elevator doors are all made of metal, which greatly attenuates the mobile phone signal. If a signal amplifier is not installed to cover the mobile phone signal in the car lift, Cell phones cannot be used normally in the elevator.

C17L signal amplifier is installed in the elevator machine room, and a Log periodic antenna is used as the Donor antenna, which is installed outside the elevator machine room toward the base station tower. If the total height of the elevator shaft exceeds 50 meters, an A17L series elevator signal amplifier needs to be installed on the top of the car lift, and a low-gain panel antenna is used as the service antenna to radiate the interior of the car lift, and a Log periodic antenna with good directivity is used as the Donor antenna which faces the elevator shaft and receive the signal from the base station in the shaft. The system diagram is as follows:

Bill of Materials:

Name	Model	Quantity	Remark
Elevator Amplifier	A17L Series	1 set	Installed on the top of the car lift
Signal Amplifier	C17L Series	1 set	Installed in the elevator shaft
Log Periodic Antenna	OY0727-0965	3 pieces	One outside the shaft, one inside the shaft, and one on the top of the car lift
Panel Antenna	IP0727-0665	1 pieces	Cover the interior of car lift
Coaxial Cable	5D-FB	10~20 meters	
Cable Connector	N-C-J5D	8 pieces	

Vehicle Signal Solutions

Operators deploy fewer base stations in rural areas. The signal is vulnerable to significant attenuation due to terrain impact, and the vehicle body will also attenuate the base station signal by 15~20dB. If the vehicle is driving in the suburbs and the base station signal received in the vehicle is lower than -105dBm, mobile phones in the car will not work normally. Installing car amplifiers can improve in-vehicle signals even when the vehicle is traveling in an area where the base station signal is weak (In the area where there is no signal at all, even if it is installed, the signal in the car cannot be improved)

The main unit of the car amplifier is usually fixed under the passenger seat, and the car omnidirectional antenna with magnet base is mounted on the metal part of the car roof as the receiving antenna. Hide the lead wire of the receiving antenna into the sealing strip of the vehicle door frame. Then pull it into the vehicle and connect it to the BTS port of the car's amplifier.

Use a patch antenna with a self-adhesive sticker to attach it to the suitable position inside the vehicle as a coverage antenna. The signal quality in the vehicle can be improved by using the vehicle mounted 12V power supply to power the amplifier.

Bill of Materials:

Name	Model	Quantity	Remark
Car Amplifier	A33W-B3B8	1 set	Installed under the passenger seat
Vehicle Magnetic Antenna	CX0727-03360	1 pieces	Mounted on roof metal
Patch Antenna	CT0727-0365	1 pieces	Installed in a suitable position near the driver's seat in the vehicle

Villa Coverage Solutions

The exterior walls of villa buildings are generally surrounded by cement concrete, which has a large attenuation effect on the signal, And the interior is relatively complex. Cell service is generally weak in areas away from windows and basements. It is not complicated to improve the mobile signal in the villa. Install the receiving antenna on the roof of the villa where the signal is good, install the signal amplifier host in an Elv box or a hideout in the stairwell, and connect the receiving antenna to the amplifier host using a 7D-FB coaxial cable. Mount an omnidirectional coverage antenna in the center of every 100 square meters indoors. Connect the power splitter or coupler with a 7D-FB coaxial cable at the output connector of the amplifier. The signal from the amplifier can be distributed to the coverage antenna.

Take a three-storey villa with 100 square meters per floor as an example. It is equipped with an amplifier host with a downlink output power of 20dBm, install it in the equipment room; install an omni-directional ceiling antenna in the center of the ceiling of each floor, covering 360 degrees in all directions. The receiving antenna is installed on the roof of the building where the signal is stronger. In order not to damage the appearance of the house, the cable connecting the antenna and the signal amplifier should be buried into the wall in advance before the decoration.

The system diagram is as follows:

Bill of Materials:

Name	Model	Quantity	Remark
Repeater	C20L-B1B3B8	1 set	Installed in equipment room
Log Periodic Antenna	11dBi gain	1 piece	Install on the roof where the signal is strong
Omnidirectional Ceiling Antenna	3~5dBi gain	3 piece	Install the middle position of each ceiling
Coaxial Cable	7D-FB	50 meters	
Coaxial Cable Connector	N-J7D	12 piece	
Coupler	CP0727-7N	1 piece	
Two-way splitter	SP0727-2N	1 piece	

Multi-mode signal coverage solution for large complex buildings

Large buildings such as shopping malls, entertainment centers and hospitals can not be covered by outdoor base stations because of their large building area and large internal spacing. Signal coverage must be achieved by building an indoor distribution system within the building. The MDAS multi-mode digital optical fiber distribution system is the first choice for building a large-scale indoor distribution system. The MDAS system consists of three parts: the main unit MU, the expended unit EU, and the remote unit RU. The main MU coupled base station, RRU RF output, converts RF signals into digital optical signals and transmits them in four separate ways via fiber optics to four expended units, the EU. Each expended EU then transmits the digital optical signal in eight ways via fiber optics to eight remote-unit RUs. The remote unit RU processes digital signals into RF signals, amplifies them and outputs them to the antenna for coverage.

Taking a hotel indoor distribution system as an example. Coupling the RRU signal with an MDAS host, the MDAS host is then connected to two extensions unit EU, one of which is connected to four remote units in 4 ways and the other is connected to six remote units in six ways. Each remote terminal is connected to 10 omni antennas, each with a coverage radius of 15 meters.

The system diagram is as follows:

Bill of Materials:

Name	Model	Quantity	Remark
MDAS Main Unit	M27T-B1B3B8-MU	1 pieces	Installed in the communication cabinet of the RRU room
MDAS Expendable Unit	M27T-B1B3B8-EU	2 pieces	Installed in the communication cabinet of the RRU room
MDAS Remote Unit	M27T-B1B3B8-RU	10 pieces	Installed in the coverage area
Omni Ceiling Antenna	IO0727-03360	100 pieces	
2 Way Splitter	SP0727-2N	50 pieces	
3 Way Splitter	SP0727-3N	5 pieces	
15db Coupler	CP0727-15N	10 pieces	
10db Coupler	CP0727-10N	30 pieces	
7db Coupler	CP0727-7N	35 pieces	
5db Coupler	CP0727-5N	5 pieces	
1/2" Coaxial Cable	HCAAYZ-50-12	2100 meters	
1/2" Coaxial Cable Connector	NJ-50-12	512 pieces	

Coverage Solutions For Tunnel And Pipe Gallery

Tunnels are diverse. It is divided into road, railway, and metro tunnel according to its use. Different functional tunnels have different requirements for signal coverage. According to the tunnel's structure, it can be divided into curved, straight, long, and short. Tunnels of different structures also have different signal coverage.

In general, the use of highway or rail tunnels for calling or the Internet accessing is not very high. Outdoor base station signals can be extended to achieve signal coverage. Take the example of a 5km straight road tunnel. A set of 10W air-coupled fiber optic repeater with 1 pcs local unit and 5 pcs of remote units is adopted. A high-gain outdoor plate antenna is installed at the mouth of the tunnel to receive the signal from the base station and connect it to the fiber optic repeater via a 1/2 coaxial cable. Local units are installed in tunnels as close as possible to outdoor reception antennas, and five remote units are installed in tunnels of 0.5km, 1.5km, 2.5km, 3.5km and 4.5km. Five remote units are connected to local unit via fiber-optic cable. The radio frequency output port of each remote unit needs to be connected to a two-way splitter and then to 2 directional antennas (installed in reverse), each covering a distance of 500m.

The system diagram is as follows:

Bill of Materials:

Name	Model	Quantity	Remark
Fiber Optical Repeater local unit	O40T-B1B3-MU	1 piece	Installed in the tunnel
Fiber Optical Repeater Remote Unit	O40T-B1B3-RU	5 piece	Installed at 0.5, 1.5, 2.5, 3.5, 4.5 km from the tunnel entrance respectively
Directional panel Antenna	OP0825-1265	11 piece	
Coaxial Cable	HCAAYZ-50-12	About 50 meters	
Coaxial Cable Connector	NJ-50-12	38 piece	
Two way splitter	SP0727-2N	5 piece	
Fiber Optic Cable	GYTS53 12core	4500 meters	

Village Coverage Solutions

In many villages located in mountainous areas, the signal in the villages is very weak due to the obstruction of hillsides and forests, and the cost of adding base stations or using optical fiber remote solutions is high and difficult to construct. High-power wireless repeaters are used to solve the problem in mountain villages. The signal coverage is the most economical and quickest solution. Choose a high-gain parabolic antenna as the receiving antenna, and install it on the hillside where the base station tower can be seen; install the high-power outdoor wireless repeater on the top of the hillside, and use a 1/2 feeder not exceeding 50 meters long to connect the receiving antenna with the repeater; choose a high-gain directional plate antenna as the coverage antenna, install it on the hillside on the back of the receiving antenna, and align the radiation direction to the village, and connect the coverage antenna and the repeater with a 1/2 cable of no more than 10 meters. The radiating surfaces of the receiving antenna and the covering antenna must be opposite.

If there is no AC power available on the hillside to power the repeater, a solar power supply system can be used to power the repeater. The system diagram is as follows:

Bill of Materials:

Name	Model	Quantity	Remark
Wireless Repeater	C43T-B1B3	1 piece	Downlink power 43dBm, 95dB gain
Parabolic Antenna	PW1727-2411	1 piece	Horizontal radiation angle 11°, 21dBi gain
Directional Panel Antenna	OP0825-1865	2 piece	18dBi gain
Two Power Dividers	SP0825-2N	1 piece	
Coaxial Cable	HCAAYZ-50-12	about 60 meters	
Coaxial Cable Connector	NJ-50-12	8 piece	

Wide band Repeater Series

Wide band repeater, also known as signal amplifier or mobile phone partner, refers to a repeater that uses RF filter or dielectric filter for filtering processing. Due to its advantages of simple filtering technology, low time delay, and low cost, it is widely used by customers and favored by the market.

Amplitec wide band repeater has a complete variety, ranging from 10dBm low power to 43dBm high power, from single-band to multi-band products, which can be used in various scenarios.

C20M 4G/5G Dual Band Micro signal repeater

Suitable for 4G/5G signal coverage in residential and small shops

Features

- Large LCD display;
- ALC, AGC, MGC;
- 5G TDD adaptive baseband synchronization;
- ISO self-excitation elimination;
- Upstream idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support Bluetooth connection to Amplitec Helper APP.

Technical Specifications

Model	C20M-BxNx
Frequency Band	Any one in 4G band 1, 2, 3, 4, 5, 7, 8, 20, 28, 66 and any one in 5G N41 or N78
Bandwidth	Full Bandwidth in 4G bands and custom bandwidth in 5G bands
Gain	UL 70dB, DL 70dB
Output Power	UL 17dBm, DL 17dBm
Gain attenuate	1~31dB, Step of 1dB
ALC control Range	≥ 30 dB
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 8.0 dB
Group delay	≤ 1 μs
Power supply	DC: 12V /3A
Dimension	180*130*45mm
Weight	<1.8kg

Note: The letter "x" means the 3gpp 4G band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66 and 5G bands: 41, 78

C20M 4G/5G Triple Band Micro signal repeater

• Suitable for 3G/4G/5G signal coverage in small shops and offices

Features

- Large LCD display;
- ALC, AGC, MGC;
- 5G TDD adaptive baseband synchronization;
- ISO self-excitation elimination;
- Upstream idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support Bluetooth connection to Amplitec Helper APP.

Technical Specifications

Model	C20M-BxNx
Frequency Band	Any two in 4G band 1, 2, 3, 4, 5, 7, 8, 20, 28, 66 and any one in 5G N41 or N78
Bandwidth	Full Bandwidth in 4G bands and custom bandwidth in 5G bands
Gain	UL 70dB, DL 70dB
Output Power	UL 17dBm, DL 20dBm
Gain attenuate	1~31dB, Step of 1dB
ALC control Range	≥ 30dB
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 8.0 dB
Group delay	≤ 1 μs
Power supply	DC: 12V /3A
Dimension	250*230*50mm
Weight	<2.5kg

Note: "X" is 3GPP Band Number: 1, 2, 3, 4, 5, 7, 8, 20, 28 and 5G bands: 41, 78

C13L Series Single Band Micro signal repeater

• Suitable for the signal coverage between apartments and equipment

Features

- Large size LCD display;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Upstream idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink are automatically balanced.

Technical Specifications

Model	C13L-Bx
Frequency Band	Any one in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66
Bandwidth	Full Bandwidth
Gain	UL 65dB, DL 65dB
Output Power	UL 17dBm, DL 13dBm
Gain attenuate	1~31dB, Step of 1dB
ALC control Range	≥ 30dB
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 6.0 dB
Group delay	≤ 1.5 μs
Power supply	DC: 5V /1A
Dimension	130*90*19.5mm
Weight	<0.4kg

Note: "X" is 3GPP Band Number: 1, 2, 3, 4, 5, 7, 8, 20, 28

C17L Series Dual Band Micro signal repeater

• Suitable for small residential signal coverage problems

Features

- Large size LCD display;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Upstream idle shutdown;
- Over-power automatic shutdown;
- Automatic balancing of uplink and downlink;
- Optional Bluetooth connection to Amplitec Helper APP.

Technical Specifications

Model	C17L-BxNx	C20L-BxNx
Frequency Band	Any one in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66	
Bandwidth	Full Bandwidth	
Gain	UL 65dB, DL 70dB

Gain attenuate	1~31dB, Step of 1dB	
ALC control Range	≥ 30dB	
VSWR	≤ 2.0	
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz	
ACRR	Fully comply with 3GPP	
EVM	Fully comply with 3GPP	
PCDE	Fully comply with 3GPP	
Noise figure	≤ 8dB	
Group delay	≤ 1.5 μs	
Power supply	DC: 5V /2A	
Dimension	220*140*37mm	
Weight	<1.2kg	

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C20M Series Five Band Micro signal repeater

• Suitable for the 2G/3G/4G signal coverage of small shops and offices

Features

- Large LCD display;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support Bluetooth connection to Amplitec Helper APP.

Technical Specifications

Model	C20M-5B-BR1	C20M-5B-BR2	C20M-5B-EU	C20M-5B-SA

C20L Series Triple Band Micro signal repeater

🏠 Suitable for the signal coverage of small hops and offices

Features

- Large LCD display;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support Bluetooth connection to Amplitec Helper APP.

Technical Specifications

Model	C20L-Bx8x8x
Frequency Band	Any three in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66
Bandwidth	Full Bandwidth
Gain	UL 65dB, DL 70dB
Output Power	UL 15dBm, DL 17dBm
Gain attenuate	1~31dB, Step of 1dB
ALC control Range	≥ 30dB
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 8 dB
Group delay	≤ 1.5 μs
Power supply	DC: 12V /3A
Dimension	178*253*50mm
Weight	<2.4kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C23S Series Dual Wide band repeater

🏠 Suitable for 3G4G signal coverage in offices and warehouses

Features

- Smart OLED display;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support Bluetooth connection to Amplitec Helper APP.

Technical Specifications

Model	C23S-Bx8x
Frequency Band	Any two in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66
Bandwidth	Full Bandwidth
Gain	UL 73dB, DL 73dB
Output Power	UL 23dBm, DL 23dBm
Gain attenuate	1~31dB, Step of 1dB
ALC control Range	≥ 25dB
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 8 dB
Group delay	≤ 1.5 μs
Power supply	DC: 12V /3A
Dimension	292*140*48mm
Weight	<1.8kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

A23 series quad-band car amplifier

🏠 Suitable for enhancing 2G3G4G signals in cars and trucks

Features

- ALC, AGC, MGC;
- OLED display;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance.

Technical Specifications

Model	A23-4B1	A23-4B2	A23-4B3	A23-4B4	A23-4B5	A23-4B6
Frequency Band	B1, 3, 5, 7	B1, 3, 5, 28	B1, 3, 5, 28A	B2, 4, 5, 7	B1, 3, 7, 8	B1, 3, 7, 20
Bandwidth	Full Bandwidth					
Gain	UL 50dB, DL 50dB					
Output Power	UL 23dBm, DL 0dBm					
ALC control Range	≥ 25dB					
VSWR	≤ 2.0					
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz					
ACRR	Fully comply with 3GPP					
EVM	Fully comply with 3GPP					
PCDE	Fully comply with 3GPP					
Noise figure	≤ 8.0 dB					
Group delay	≤ 1.5 μs					
Power supply	DC: 12V /2A					
Dimension	162*122*34mm					
Weight	<1kg					

A33W Dual-band car amplifier

🏠 Suitable for enhancing 3G4G signals in cars and trucks

Features

- Small size, easy to install;
- Low noise;
- Low interference;
- Low power consumption.

Technical Specifications

Model	A33W-Bx8x
Frequency Band	Any two in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66
Bandwidth	Full Bandwidth
Gain	UL 45dB, DL 45dB
Output Power	UL 26dBm, DL 10dBm
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 8.0 dB
Group delay	≤ 1.5 μs
Power supply	DC: 12V /2A
Dimension	163*92*25mm
Weight	<0.5kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C27S Series Wide Band Repeater

• Suitable for solving the signal coverage of small shopping malls, office buildings and basements

Features

- Smart OLED display;
- ALC, AGC, MGC;
- ISO automatically eliminates self-excitation;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Optional Bluetooth connection "Amplite Helper" mobile APP function

Technical Specifications

Noise figure	≤ 6dB	≤ 8dB	≤ 8dB
Group delay	≤ 1.5 μs		
Power supply	DC: 27V /2A	DC: 27V /3A	DC: 27V /5A
Dimension	310*268*58mm	205*268*96mm	360*268*96mm
Weight	<4.5kg	<6.5kg	<9kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C33S Series Wide Band Repeater

• Suitable for solving the signal coverage of small shopping malls, office buildings, pipe corridors and tunnels.

Features

- Smart OLED display;
- ALC, AGC, MGC;
- ISO automatically eliminates self-excitation;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Optional Bluetooth connection "Amplite Helper" mobile APP function

Technical Specifications

Model	C33S-Bx	C33S-Bx8x
Frequency Band	Any two in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66	
Bandwidth	Full Bandwidth	
Gain	UL 80dB, DL 85dB	
Output Power	UL 24dBm, DL 33dBm	
Gain attenuate	1~31dB, Step of 1dB	
ALC control Range	≥ 30 dB	
VSWR	≤ 2.0	
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz	
ACRR	Fully comply with 3GPP	
EVM	Fully comply with 3GPP	
PCDE	Fully comply with 3GPP	
Noise figure	≤ 6dB	≤ 8 dB
Group delay	≤ 1.5 μs	
Power supply	DC: 27V /3A	DC: 27V /5A
Dimension	310*268*58mm	310*268*96mm
Weight	<4.5kg	<7.5kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C33J Series Triple Wide Band Repeater

• Suitable for solving the signal coverage of small shopping malls, office buildings, pipe corridors and tunnels.

Features

- Smart OLED display;
- ALC, AGC, MGC;
- ISO automatically eliminates self-excitation;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support USB connection to local PC monitoring software

Technical Specifications

Model	C33J-Bx8xBx
Frequency Band	Any three in band 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66
Bandwidth	Full Bandwidth
Gain	UL 80dB, DL 85dB
Output Power	UL 24dBm, DL 33dBm
Gain attenuate	1~31dB, Step of 1dB
ALC control Range	≥ 30dB
VSWR	≤ 2.0
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz
ACRR	Fully comply with 3GPP
EVM	Fully comply with 3GPP
PCDE	Fully comply with 3GPP
Noise figure	≤ 8dB
Group delay	≤ 1.5 μs
Power supply	AC: 100~264V/50Hz
Dimension	490*410*190mm
Weight	<25kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C37J Series Wide Band Repeater

• Suitable for solving the signal coverage of large shopping malls, office buildings and villages.

Features

- Smart OLED display;
- ALC, AGC, MGC;
- ISO automatically eliminates self-excitation;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support USB connection to local PC monitoring software

Technical Specifications

Model	C37J-Bx	C37J-Bx8x	C37J-Bx8xBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"
Bandwidth	Full Bandwidth		
Gain	UL 80dB, DL 85dB		
Output Power	UL 24dBm, DL 33dBm		
Gain attenuate	1~31dB, Step of 1dB		
ALC control Range	≥ 30 dB		
VSWR	≤ 2.0		
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz		
ACRR	Fully comply with 3GPP		
EVM	Fully comply with 3GPP		
PCDE	Fully comply with 3GPP		
Noise figure	≤ 6dB		
Group delay	≤ 1.5 μs		
Power supply	AC: 100~264V/50Hz		
Dimension	370*332*137mm	490*410*210mm	490*410*210mm
Weight	<12kg	<28kg	<28kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

C43J Series Wide Band Repeater

• Suitable for large indoor distribution systems or remote rural signal coverage

Features

- Smart OLED display;
- ALC, AGC, MGC;
- ISO automatically eliminates self-excitation;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink automatic balance;
- Support USB connection to local PC monitoring software

Technical Specifications

Model	C43J-Bx	C43J-BxBx	C43J-BxBxBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"
Bandwidth	Full Bandwidth		
Gain	UL 90dB , DL 95dB		
Output Power	UL 24dBm, DL 43dBm		
Gain attenuate	1~31dB, Step of 1dB		
ALC control Range	≥ 30 dB		
VSWR	≤ 2.0		
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz		
ACRR	Fully comply with 3GPP		
EVM	Fully comply with 3GPP		
PCDE	Fully comply with 3GPP		
Noise figure	≤ 6 dB		
Group delay	≤ 1.5 μs		
Power supply	AC: 100~264V/50Hz		
Dimension	490*410*190mm	490*410*210mm	698*500*225mm
Weight	<25kg	<28kg	<38kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

Band Selective Repeater Series

Band selective repeater, also known as industrial repeater, refers to a repeater that uses IF saw filter or digital filtering technology for filtering. Due to the high out-of-band suppression performance of the band selective repeater, the out-of-band signal other than 400K can be suppressed by 40dBc, which can effectively avoid adjacent frequency interference, so operators usually use the band selective repeater when extending the coverage network.

Amplitec's band selective repeater have been selected several times overseas mobile communication operators' repeater equipment procurement bidding projects. This is equipment earmarked for Vodacom, Ooredoo, Telkomsel and other multinational operators.

F20S/F23S Band Selective Repeater

• Indoor Coverage Projects for Operators

Features

- Smart OLED display;
- The band width can be adjusted with in the range of 0.2~24MHz in 100K steps;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlinks are automatically balanced.

Technical Specifications

Model	F20S-Bx	F20S-BxBx	F20S-BxBxBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"
Bandwidth	0.2~24MHz can be set		
Gain	UL 70dB , DL 70dB		
Output Power	UL 15dBm, DL 20dBm		
Gain attenuate	1~31dB, Step of 1dB		
ALC control Range	≥ 30 dB		
VSWR	≤ 2.0		
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz		
ACRR	Fully comply with 3GPP		
EVM	Fully comply with 3GPP		
PCDE	Fully comply with 3GPP		
Out of band Gain	Fully comply with 3GPP		
Noise figure	≤ 6 dB	≤ 8 dB	≤ 8 dB
Group delay	≤ 9 μs		
Power supply	DC: 12V3A	DC: 12V5A	DC: 12V5A
Dimension	205*268*58mm	360*268*58mm	360*268*96mm
Weight	< 3 kg	< 5 kg	< 9 kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

F20T Series Band Selective Repeater

• Indoor Coverage Projects for Operators

Features

- Smart OLED display;
- Support band width adjustment in the range of 0.2~24MHz in 100K steps;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and down links are automatically balanced;
- Support 4G Modem wireless access network management cloud platform.

Technical Specifications

Model	F20T-Bx	F20T-BxBx	F20T-BxBxBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"
Bandwidth	0.2~24MHz can be set		
Gain	UL 70dB , DL 70dB		
Output Power	UL 15dBm, DL 20dBm		
Gain attenuate	1~31dB, Step of 1dB		
ALC control Range	≥ 30 dB		
VSWR	≤ 2.0		
Spurious emission	≤ -36 dBm @ 9KHz~1GHz, ≤ -30 dBm @ 1GHz~12.75GHz		
ACRR	Fully comply with 3GPP		
EVM	Fully comply with 3GPP		
PCDE	Fully comply with 3GPP		
Out of band Gain	Fully comply with 3GPP		
Noise figure	≤ 6 dB	≤ 8 dB	≤ 8 dB
Group delay	≤ 9 μs		
Power supply	DC: 12V3A	DC: 12V5A	DC: 12V5A
Dimension	205*268*58mm	250*268*96mm	380*268*96mm
Weight	< 3 kg	< 7 kg	< 9 kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

F33T Series Band Selective Repeater

🏠 Suitable For Indoor Coverage Projects For Operators

Features

- Smart OLED display;
- Support band width adjustment in the range of 0.2~24MHz in 100K steps;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and down links are automatically balanced.
- Support 4G Modem wireless access network management cloud platform.

Technical Specifications

Model	F33T-Bx	F33T-BxBx	F33T-BxBxBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"
Bandwidth	0.2~24MHz can be set		
Gain	UL 80dB, DL 85dB		
Output Power	UL 23dBm, DL 33dBm		
Gain attenuate	1~31dB, Step of 1dB

F43T Series bandwidth adjustable with repeater

🏠 Suitable for operators to solve outdoor signal coverage in remote rural areas

Features

- Smart OLED display;
- Support bandwidth adjustment in the range of 0.2~24MHz in 100K steps;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink are automatically balanced.
- Support 4G Modem wireless access network management cloud platform.

Technical Specifications

S20T Series Digital Tape Repeater

🏠 Suitable for solving indoor signal coverage of multiple operators at the same time

Features

- Smart OLED display;
- Support bandwidth adjustment in the range of 0.2~24MHz in 100K steps;
- ALC, AGC, MGC;
- ISO self-excitation elimination;
- Uplink idle shutdown;
- Over-power automatic shutdown;
- Uplink and downlink are automatically balanced.
- Support 4G Modem wireless access network management cloud platform.

Technical Specifications

Model	S20T-Bx	S20T-BxBx	S20T-BxBxBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"
Sub-bands	1~3 for each band

S33T Series Digital Repeater

🏠 Suitable for solving 2000-5000 square meters of multi-operator signal coverage at the same time

Features

- Smart OLED display;
- Support 1~3 subbands;
- Support for setting subband bandwidth in the range of 0.2 to 20 MHz;
- ALC, AGC, MGC;
- Over-power automatic shutdown;
- Uplink and down links are automatically balanced.
- Support 4G Modem wireless access network management cloud platform.

Technical Specifications

Fiber optical repeater series

Fiber Optical repeater is a repeater that uses optical fiber for signal transmission, and consists of a local unit and a remote unit. The local unit transmits the coupled signal from the base station to the remote unit through electro-optical conversion through optical fiber, and the remote unit converts the optical signal into an electrical signal, enters the RF unit for amplification, and sends it to the transmitting antenna to cover the target area.

Amplitec fiber optical repeaters are of all kinds, excellent performance and stable quality, and are favored by many customers all over the world.

O37T Series Fiber Optical Repeater

• Suitable for multi-signal coverage in remote villages and tunnels

Features

- ALC, AGC, MGC;
- Digital filtering;
- Support 15KM optical fiber transmission;
- Over-power automatic shutdown;
- Uplink and downlink are automatically balanced;
- Support LAN connection to local OMT monitoring software;
- Support 4G Modem wireless connection network management platform.

Technical Specifications

Model	O37T-Bx	O37T-BxBx	O37T-BxBxBx
Frequency Band	Any single band in "x"	Any two bands in "x"	Any three bands in "x"

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

O43T Series Fiber Repeater

• Suitable for solving remote villages and tunnel signal coverage

Features

- Digital filtering;
- Optical fiber transmission distance 15KM;
- Support 1x4x4 networking;
- ALC, AGC, MGC;
- Over-power automatic shutdown;
- Uplink and downlink are automatically balanced;
- Support LAN connection to local OMT monitoring software;
- support 4G Modem wireless connection network management platform.

MU Weight	< 15kg	< 15 kg	< 25kg
RU Dimension	450*350*190mm	490*410*210mm	513*461*187mm
RU Weight	< 25kg	< 28 kg	< 28kg

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

M27T series fiber optical indoor distribution system (MDAS)

• Suitable for operators to solve the signal coverage of large shopping malls, hotels and office buildings

Features

- ALC, AGC, MGC;
- Digital filtering;
- Support LTE 2*2 MIMO;
- MU supports parallel connection of 4 EUs;
- EU supports parallel connection of 8 RUs;
- Support 2KM optical fiber transmission distance;
- Support LAN connection to local OMT monitoring software;
- Support 4G modem remote connection network management platform.

Technical Specifications

Model	M27T-BxBx-MU/EU/RU	M27T-BxBxBx-MU/EU/RU
Frequency Band	Any two band in "x"	Any three band in "x"
Bandwidth	Can be custom	
Gain	UL 40dB, DL 40dB	
Output Power	UL -20dBm, DL 27dBm	
Gain attenuate	1~31dB, Step of 1dB	
ALC control Range	≥ 30 dB	
VSWR	≤ 2.0	
Spurious emission	≤ -36dBm @ 9KHz~1GHz, ≤ -30dBm @ 1GHz~12.75GHz	
ACRR	Fully comply with 3GPP	
EVM	Fully comply with 3GPP	
PCDE	Fully comply with 3GPP	
Out of band Gain	Fully comply with 3GPP	
Noise figure	≤ 6dB	
Group delay	≤ 13 μs	
optical interface	LC/LC	
Dimension	440*330*47mm @ MU, 440*330*70mm @ EU, 350*195*120mm @ RU	
Weight	< 5kg @ MU, < 6.5kg @ EU, < 8.2kg @ RU	
Power supply	AC 100~264V/50Hz @ MU & EU, AC 100~264V/50Hz or DC 48V by EU @ RU	

Note: The letter "x" means the 3gpp band number: 1, 2, 3, 4, 5, 7, 8, 20, 25, 28, 66

Passive Components/Antenna Series

- Low Insertion loss
- Low Intermodulation
- Low VSWR
- Widely used in indoor distribution systems and DAS systems

Antennas

5G 4*4 MIMO Omni Ceiling Antenna

Model	Frequency (MHz)	Gain (dBi)	VSWR (dB)	Horizontal Beamwidth	Vertical Beamwidth

Requirements Analysis

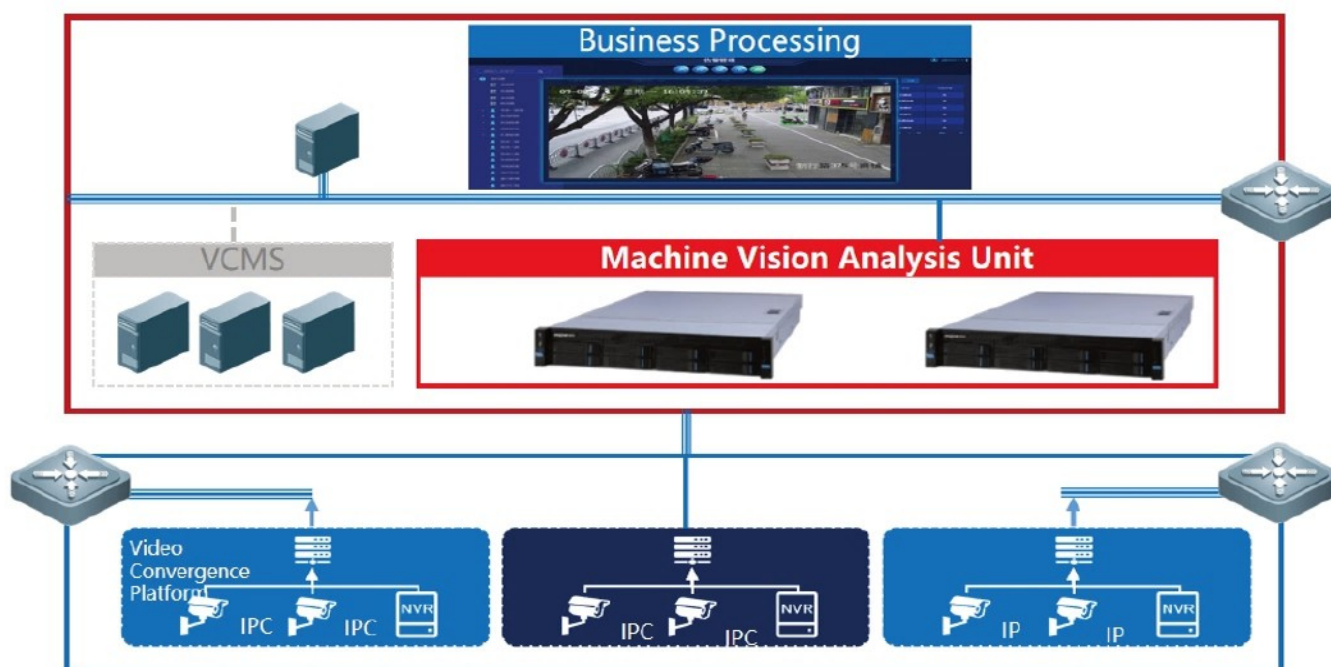

With the acceleration of urban development, urban intelligent monitoring and management are facing more and more challenges. The video-based visualization application is widely used in the city management field, such as city security, environmental health governance, combating illegal behaviors and other businesses. However, due to the low utilization rate of video surveillance in the past, the video application does not integrate the management business process, the complex and changeable law enforcement situation on the spot, the insufficient evidence, the lack of law enforcement personnel and other problems, the timeliness and accuracy still cannot be guaranteed.

With the maturity of deep learning algorithms, the rapid iteration of AI accelerated computing chips and the accumulation of structured information generated by the Internet, the rapid development of machine vision technology in the field of artificial intelligence, research and exploration of how to realize the active discovery of illegal behaviors in video data, rapid summary, intelligent analysis, automatic alarm and other issues, will bring a leap-forward for intelligent city management. Sexual progress will also play a positive role in solving the unfavorable situation of "fewer people and more things to do" and "more points and more areas" in urban management.

Product Introduction

Atlantis machine vision analysis unit is a modular intelligent discovery and analysis product for city violation problems. It uses the analysis algorithm of key elements in the scene based on deep learning to identify and locate specific targets in videos/images, and realizes the intelligent in-depth analysis of a series of multi-source view data such as people, cars, non-motor vehicles, objects and events generated in complex and changeable scenes. Through the comprehensive analysis of structured and semi-structured data to identify abnormal behavior and statistics in videos, realize disorderly parking of non-motor vehicles, personnel intrusion, illegal parking, illegal dumping of muck trucks, disorderly pile of goods, illegal drying, disorderly setting of billboards, illegal setting of banners, garbage overflow, occupation operation, cross-door operation, tourism vendors, human flow statistics. For city management, community security, comprehensive treatment to provide low cost, high efficiency, intelligent services.

Atlantis machine vision analysis unit consists of a view parsing engine and a fusion analysis engine. It helps transform city management from "see" and "see clearly" to "understand".

Features

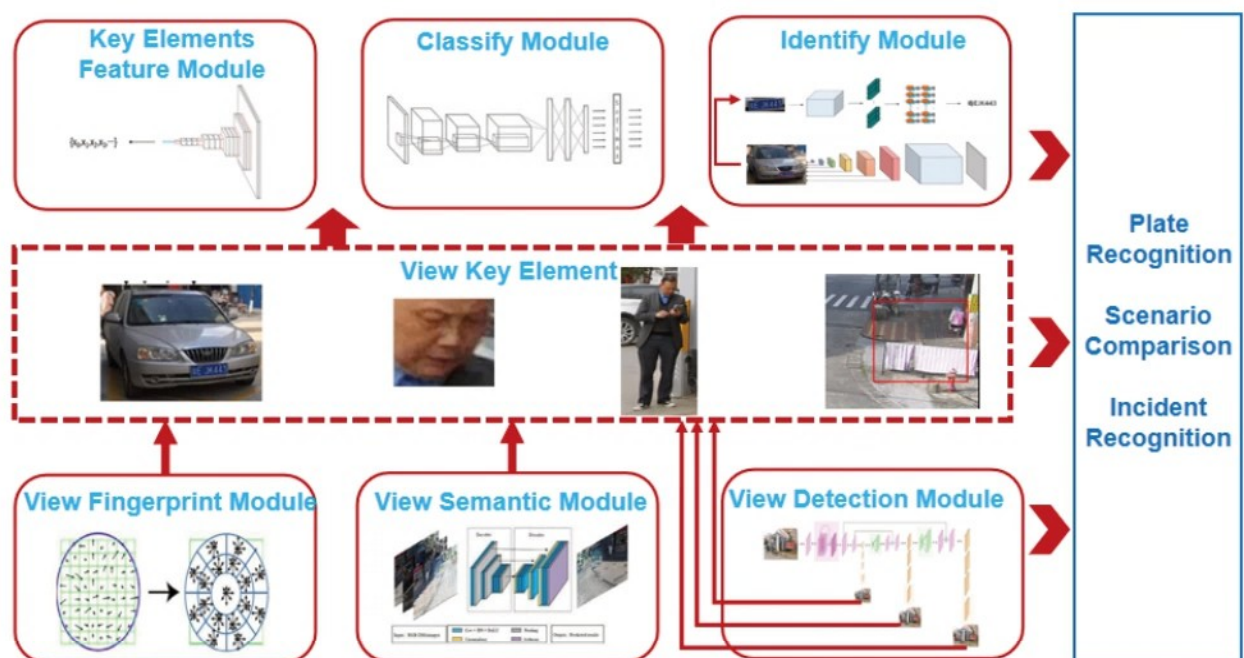

▶▶ Provide Visual Easy to Choreograph Operation, Construct Model Rapidly

Intelligent analysis is the combined application of key elements such as people, vehicles, objects and scenes in different scenarios. Through AI perception and fusion analysis, users can freely choose capability components according to scene requirements and quickly build scene models.

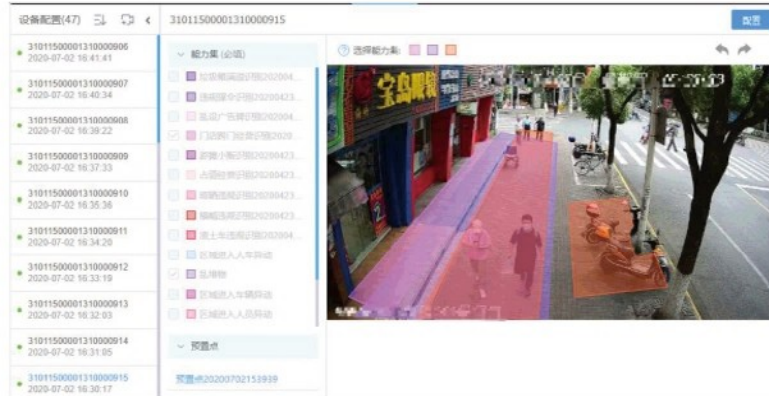

▶▶ Advanced deep learning algorithm, identifies violations accurately

Based on deep learning intellisense technology, intelligent analysis and alarm can be carried out by multi-dimensional perception of people, cars, objects and scenes, as well as integrated analysis of structured/unstructured data. Modular AI recognition function can conduct personalized analysis for different camera videos.

Rich Data, Diversity Scenario Algorithm Model

Intelligent identification and analysis of violations of many kinds of events in urban management, and active alarm of violations discovered. The main categories of violations include disorderly parking of non-motor vehicles, personnel intrusion, illegal parking of motor vehicles, muck car violations, disorderly piling, illegal drying, disorderly advertising billboards, illegal setting of banners, overflowing garbage bins, occupying the road business, cross-door business, tour stalls, etc.

Road Management

The perception technology based on deep learning can intelligently identify and analyze violations of various events, realize real-time discovery and active alarm of violations, solve the problem of manpower shortage in road management, and improve the operation efficiency.

Community Management

Deep learning technology based on a number of scenarios associated with the community management intelligent detection and analysis of the illegal act, the effective protection of the community management and orderly and clean.

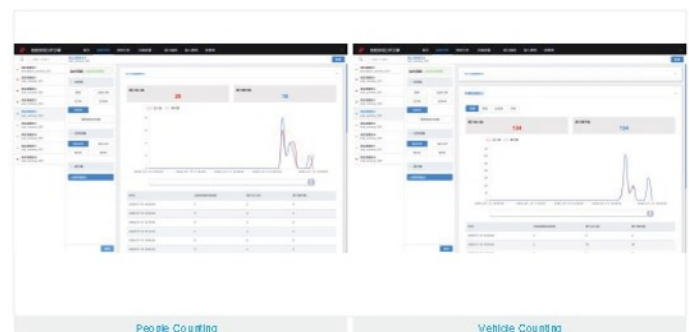

Slag Car Management

Based on the deep learning technology against the illegal violation of residue in the car to ensure legitimacy of residue in car running in the city, to ensure the safety of people's life.

Support Real-time Video Based People/Traffic Flow Statistics

Facing the designated detection area of traffic light intersections, entrances and exits of key sections, and other entrance and exit scenes, the number of people and vehicles entering and leaving areas can be judged to realize dynamic statistics of people and traffic flow

ZNV Video Structure Edge Gateway

Product Profile

ZNV Video structured edge gateway is a lightweight, real-time online view structured gateway created by ZNV based on video industry standards and deep learning algorithm. It can provide accurate and efficient real-time detection and abnormal discovery capabilities of people, cars and objects, and serve various scenarios such as public security monitoring, smart parks, safe cities and smart parking lots. To provide customers with flexible and efficient video structure on the edge of the network.

- ZXNVM CIMS-IAC-201
- ZXNVM CIMS-IAC-202

Specification

Model	ZXNVM CIMS-IAC-201	ZXNVM CIMS-IAC-202
Modality	Embedded all-in-one, edge smart box	
Hardware Configuration	CPU: 4 core, 64 bit, max 2.0GHz RAM: LPDDR4/4G Memory: eMMC 16G, support expansion Netork: Gigabit network port, onboard WIF	CPU: 8 core, 64 bit, max 2.6GHz GPU: Mali-T864 + RK1808 RAM: LPDDR4/8G Memory: eMMC 16G, support expansion Netork: Gigabit network port, onboard WIF
Operation Environment	Operation Temperature: -10℃~50℃ Humidity: 10%~90% (Non-condensing) Inch: 154 x 107 x 34mm (L×W×H) Power: DC in 12V	Operation Temperature: -10℃~50℃ Humidity: 10%~90% (Non-condensing) Inch: 187mm*131mm*54mm (L×W×H) Power: DC in 12V
Performance	Support 4 channels 1080P real-time video detection (image processing 4FPS); Face detectable size: 32*32 pixels; Humanoid detectable size: 64 * 64 pixels; Vehicle detectable size: 200 * 200 pixels (plates 100 * 100 pixels) ;	Support 20 channels 1080P real-time video detection (image processing 4FPS); Face detectable size: 32*32 pixels; Humanoid detectable size: 64 * 64 pixels; Vehicle detectable size: 200 * 200 pixels (plates 100 * 100 pixels) ;

Function

Function	Description
Face Capture	Recognize face features in video and pictures, output the smallest best face image
Humanoid Capture	Recognize the humanoid target and human features, and cut out the humanoid picture.
Vehicle (License Plate) Capture	Identify the vehicle and license plate features, and capture the vehicle or license plate picture
Environment Monitor	Identify environmental anomalies, such as abnormal motion detection and intrusion identification, and output alarm messages
Video Quality Diagnosis	It automatically detects abnormal problems such as no signal, snowflake screen, occlusion and blurring in the real-time video picture, and outputs alarm messages.

Typcal Network

Scenarios

ZNV video structured edge gateway can support a variety of intelligent video service scenarios and provide intelligent functions such as face capture, vehicle capture, license plate capture, environmental anomaly warning, video quality diagnosis for front-end view acquisition devices, fully mining the value of front-end view data, and providing more flexible service options for edge side video intelligence. Provide customers with highly available video structuring capabilities and data analysis capabilities.

Police

- Person/Vehicle Snap
- Vehicle Plate
- Old Camera Access
- Decoupled with Video and Algorithm

Smart Store

- Customer Precision Positioning
- Counting
- No-entry Warning for Critical Areas

Smart Community

- Stranger/Vehicle Management
- Abnormal Behavior Monitoring
- Old Camera Access

Smart City

- Person/Vehicle Snap
- City Management
- Old Camera Access
- Decoupled with Video and Algorithm

Smart Factory

- Person/Vehicle Snap
- Counting
- No-entry Warning for Critical Areas
- Old Camera Access

Smart Business

- Customer Flow Statistics
- Area Anti-theft
- Old Camera Access

Highlights

Wide Compatibility

Connect to mainstream vendors' camera, support access to older devices, and support access to multiple protocols such as SDK, Onvif/RTSP, and GB28181 from mainstream vendors.

Flexibility and Efficiency

Built-in self-developed high-precision algorithm, can choose algorithm set freely, using standard interface, docking and start immediately once power on.

Deployment Freely

With lightweight design, small size and diverse functions, the product can be configured and deployed on demand according to different service scenarios, reducing the cost of intelligent video systems.

Challenges

Challenges

As the most important backup power source, the battery management is facing more and more challenges, such as: Short-lived battery, no history battery data & analysis, can't find bad cell in time, no alerts of remaining battery capacity, battery stolen.

Positive Plate Corrosion

The negative electrode produces water, reduces the acidity, and the positive reaction produces H^+ , accelerating the corrosion of the positive grid.

Negative Sulfation

Lead sulfate causes the negative electrode to remain in a non-fully charged state for a long time, resulting in a decrease in battery capacity even battery failure.

01 Dendritic Crystals

The overdischarge or long-term discharge state results in the formation of dendritic crystals through the membrane. Solder lead particles on the plate cause short circuit.

02

03 Loss Water

The rate at which the gas is generated at the time of charging is greater than the rate of the gas re-chemical reaction, resulting in a portion of the gas escaping and loss of water.

04

05 Thermal Runaway

The heat of battery generated in the float and overcharge state will increase, when the cooling can not be achieved with the balance, the battery will accelerate to dry, resulting in increased internal pressure even cause the battery to melt or explode.

ZNV

Difficulty of Battery management and maintenance

Only "electrolyte water loss" situation does not require maintenance, other failures still exist.

Sealed valve design is a one-time structure, with "non-maintainable" features.

It is complicated to judge the quality of the battery.

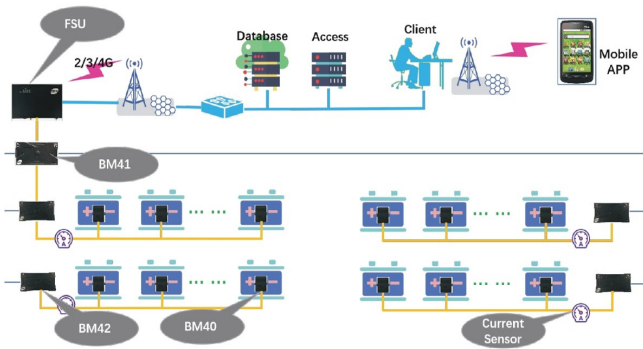

Short board effect: a damaged battery will cause the failure of the entire battery pack.

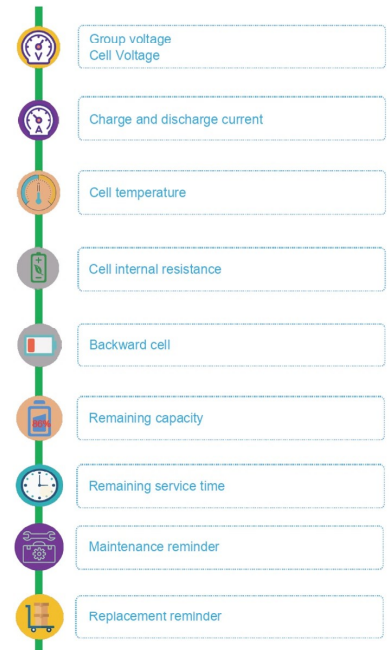

Manual maintenance not only requires a lot of manpower and time, but also it is difficult to achieve the desired results.

Architecture

- 1) The battery management interface unit BM41 converts the UART bus into an RS485 serial port and communicates with the FSU;
- 2) The battery management unit BM40 is responsible for collecting battery cell voltage, temperature, and internal resistance information;
- 3) The battery current detection unit BM42 is responsible for collecting battery pack current and ambient temperature information;
- 4) Support MODBUS protocol, each UART bus supports up to 130 devices.

Function Panel Description

Specifications

Item	GP288-UN
Battery Type	Sealed Lead Acid Solar Battery
Rated power [W]	250W
Nominal Capacity [wh]	288wh
Nominal Voltage [V]	12V
Input Voltage Range [V]	12V - 15.2V
Charging Interface	DC5.5 × 2.1
Charging Method	Solar Charging; Standard Charger Charging
Max. Input Current [A]	Max. 5A
Nominal Output Voltage [V]	220V - 240V
Nominal Output Frequency [Hz]	50Hz / 60Hz
Product Weight [kg]	≈9kg
Product Dimension [mm]	236×168×180 mm
Charging Temperature [°C]	0 °C - 40 °C
Discharging Temperature [°C]	-10 °C - 40 °C

IP Products

Camera Series

Semi-dome

Bullet Camera

Speed Dome Camera

Bullet Camera

4/5/8MP

- High-performance 1/3" Progressive Scan CMOS
- High quality imaging with 5MP resolution
- Support H.264/H.265/JPEG/AVI Compression
- Saturation/Brightness/Contrast /Sharpness, Mirror, 3D NR , White Balance, FLK(Flicker Control),Occlusion Detection,HLC
- Compliant with ONVIF protocol
- Main Stream: 5MP@30fps / 4MP@30fps / 1080P@30fps / 720P@30fps
- Auto switch for day/night surveillance
- 18X or 36X optical zoom for HD PTZ

NVR Value Series

- H.265/H.264 video compression standard
- Support 4/8/16ch video inputs
- Support 4/8/16ch PoE inputs
- Support HDMI and VGA outputs
- Support 1 SATA hard disk (up to 8T)

NVR Pro Series

- H.265/H.264 video compression standard
- Support 16/32/64ch video inputs
- Support 16ch PoE inputs
- Support HDMI and VGA outputs
- Support 2/4/8 SATA hard disk (up to 8T)
