# Sydney's new connection hub

Sydney Metro is Australia's biggest public transport project. In 2024, Sydney will have 31 metro railway stations and a 66 kilometre standalone metro railway system. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

As part of the Sydney Metro City & Southwest project, an underground station will be constructed at Pitt Street, in Sydney's CBD. This includes a proposed design for an over station development, consisting of two separate buildings above the northern and southern station entries.

## Pitt Street south building

Above the southern entry of the Pitt Street Station, near the corner of Pitt and Bathurst streets, the Pitt Street south building will incorporate 234 premium rental apartments.

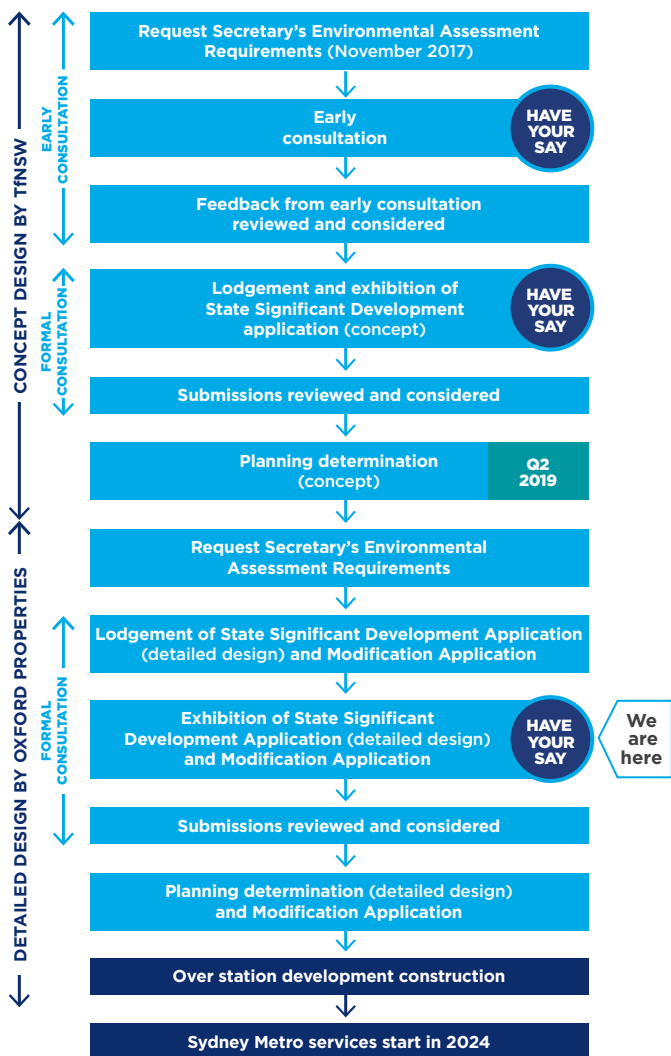

Designed by local architects Bates Smart, it will provide dedicated resident amenities and hospitality space within the building and is targeting a 5-star Green Star sustainability rating and 30% BASIX energy rating.

The Pitt Street south building is being developed by Oxford Properties Group and constructed by CPB Contractors.

# Planning process

## How to provide feedback on the project

You can make a formal submission during the public exhibition period on the Department of Planning, Industry and Environment's website.

For enquiries, please contact the Department of Planning, Industry and Environment.

Phone: **1300 305 695**

Website: **[www.planningportal.nsw.gov.au/major-projects/projects/on-exhibition](http://www.planningportal.nsw.gov.au/major-projects/projects/on-exhibition)**

# Have questions or want to know more?

Community information sessions for the Pitt Street south building will be held via online webinars due to coronavirus restrictions currently in place. For your chance to find out more about the project or ask questions of the project team, please register for your preferred session at [sydneymetro.info/integrated-station-development](https://sydneymetro.info/integrated-station-development).
