

Market Update with E to P Operating Principal, Pete Economos

Join us on Zoom EVERY WEEK as we break down the market. We answer the questions, "What do the numbers look like?" and "Why do they look like that?" We discuss sales absorption, monthly supply of inventory, \$/sqft and supply and demand.

Every other week, we bring in top producing agents to talk about what they are doing that is working so well and how others can replicate their methods. You won't want to miss these value-packed conversations!
