

### Contact Us

Message us on WhatsApp or email to book a free consultation and learn more about our services

### Free Consultation (45-60 minutes)

During our meeting, we will discuss your concerns and the specific situation of the learner, along with the information of our services.

### Assessment

We identify learners' strengths and weaknesses through ability testing, direct observation during play, and interviewing caregivers to understand the learner in areas such as cognition, play skills, social skills, and communication etc.

### Intervention

Based on the learner's interests and needs, we develop an individualized education plan to optimize the learning experience, including environmental changes and coaching parents. We deliver interventions in two ways: by an IBT or RBT with consultant supervision, or directly by a BCBA or BCaBA.

### Progress and Monitor

Based on the data collected, we will update the individualized education plan, according to learner's pace and needs and with guardians' feedback. We will provide progress update regularly.
