

Dalia, the reincarnation of Ningishzidda, is encoded in this Dr. John Dee alias publication. Will be posing an update soon within the next few weeks or so!

DOCUMENTS FROM THE TEMPLE ARCHIVES OF TELLOH

V ← Slope angle of the "V" in Haverford perfectly clips the ink blot / spot / dot / point, then passes through a John Dee encrypted signature "EDI" (which exchanges into "JDE" = "John Dee" code).

EDI = EDJ = John Dee Code ← EDITED BY

The (-113.11°) slope angle is palindromic

GEORGE AARON BARTON & aligns with "A" in "Aaron."

Professor in Bryn Mawr College

Momentum established that this line

is definitely an enciphered slope. I moved to Tampa Florida in 2019, and by 2020 I bought my home in one of the 45 subdivisions of Carrollwood Village.

← Bryn Mawr is my home's subdivision.

PART I.

Like Paul Atreides in Dune, Dr. John Dee is

limitlessly prescient. Bryn Mawr College is present by Dee's intentional design and is not coincidental serendipity. Details create unimpeachable ciphers.

(-113.11°) angle is HEADLEY BROTHERS also perfectly palindromic & 14, BISHOPSGATE STREET WITHOUT connects London, E. C.

Letters: V+A alongside their intrinsic slope angles.

Stacked on top of one another, V & A demonstrate repeated palindromism in their near-mirror image shapes. Bryn Mawr College is missing an "n," but Dee's slope cipher clips N; Thus is silently present.
