#### The One-Minute Preceptor Five Microskills Method

#### 1. Get a commitment

- Examples:
- > What do you think is going on with this patient?
- > What investigations do you feel are indicated?
- What do you think needs to be accomplished on this visit?

## 2. Probe for supporting evidence

Examples:

- What are the major findings that lead to your conclusion?
- > What else did you consider?
- > What made you choose that particular treatment

### 3. Teach general rules

- Keep it brief and focused on identified issues
- Avoid anecdotes and idiosyncratic preferences

### 4. Reinforce what was done right

Be specific

# 5. Correct errors

- Consider appropriate time and place
- Start with learner self-evaluation
- Be specific
- Consider language "not best" rather than "bad"
