A great power bank!

The part looks extremely high quality and well made. It just looks great.

I fully charged my Blackberry Key2 with it 5x. I charged the power bank from 4 to 100 percent in 57 minutes using the supplied power charging cable.

The PB is of course also suitable for on-the-go, it may be a bit heavy for your jacket pocket, but great in a backpack or briefcase.

The included leather or faux leather case is nice, but it probably serves more representative purposes as it does not completely protect the PB.

A total of 5 stars due to the charging performance and high-quality workmanship as well as the extensive range of accessories.

The device is super fast.

It's fully recharged in about 2.5 to 3 hours... total insanity.. great.. it could only have more milliamps.. but no problem for my iPad Pro 12.9 and iPhone 10 on one charge.. and the Apple Watch will charge it right away... top I think

★★★★★ **Wireless and charge indicator... top**

Reviewed in Germany DE on 24 April 2021

Very high-quality workmanship, I'm thrilled. High price is really justified. Charging mobile phones via wireless works better than the Mophie charger.

Especially great is the display with the remaining load height of the powerbank... I always missed that with old powerbanks. Topp product!
