

Arun Shroff

Director of Technology & Innovation

Arun Shroff is an entrepreneur, business leader, technology and AI expert, advisor and speaker who has founded and grown multiple companies in USA and India.

Arun brings extensive experience and expertise in evaluating emerging technology investments in Artificial Intelligence, Robotics, Augmented/Virtual Reality, Blockchain, Cybersecurity, Health and Telemedicine, as well as in market strategy, business plan preparation, and financing syndication preparation.

Arun is a frequent speaker and invited expert on digital technology and Artificial Intelligence at events and conferences globally including at the ITU, UN, and WHO where he is an active contributor and topic lead in the Focus Group on AI for Health.

Arun is a founder of XTend.AI, a startup using AI to solve global challenges in health such as diabetic retinopathy, cancer and heart disease, particularly in the developing and underserved areas of the world, by bridging critical gaps in the shortage of specialists and resources.

Arun is also a co-founder and Director at MedIndia.net, a leading digital health publisher and application provider, reaching several million visitors each month, and a founder and Director of FrontPoint Systems, a global web solutions provider and applications developer.

In addition, Arun advises and volunteers with many non-profits, including MOHAN USA and MOHAN Foundation, promoting ethical organ donation, and IIMPACT, an NGO providing free primary education to girls in India's villages.

Arun has a B.Tech from IIT Madras, an MBA from IIM, Ahmedabad, and M.S. in Computer Science from Penn State University, and certifications in Machine Learning & Deep Learning from Stanford and Coursera.
