Heavy-Duty Double Locking Fire Exit Doors

The Frame

- 4 x heavy duty lift-off hinges per leaf, these offer great security and make installation a lot easier
- Expandable frame mechanism that achieves sizes between 1780 - 1840 x 2075(w)
- Full weather seal to all sides of the frame
- 3 x fixings points down each side of frame for ease of installation
- Removable/adjustable threshold
- 2mm thick pre-lacquered cold-rolled steel frame
- Will arrive in a kit format that allows for easy transportation when installing

Door Leaf

- 2 x 1mm pre-lacquered, cold-rolled steel sheets per leaf
- 15mm anti-jemmy lip to all edges
- Powder coated to RAL 7045 (telegrey 1)
- 50mm thick door leaf
- 2 x steel strengthening structural supports running through the leaf
- Our doors are filled with a fibre glass material
- Inactive leaf has shoot bolts top and bottom

Fire Exit Style

- Can have either both leafs as an active fire exit or just one
- Can be fitted with external locking/access
- Up to a 5 point latching double crash bar system
- Optional extras - friction stays, powder coating, vision windows

Locking Style

- Multipoint locking system pre-installed into door
- 2 x anti-jemmy hinge bolts
- Drill and impact proof locking system
- Optional extras - door closers, powder coating, vision windows, louvered panels
