FIRST LOOK AT IP PBX & Communicator **6.0**

IP PBX

Emergency Call
Have others informed of all Emergency numbers dialed

Routes per Tenant
The Special Services' numbers are now distinguished from Extensions' numbers

Central Phone Book
A centralized list of contacts

Wake-Up Calls
Schedule Wake-Up Calls

Touchless Provisioning
Provision phones automatically

Call Forwarding
Set different rules for Internal and External calls respectively

Hubspot CRM
It is possible to have IP PBX integrated with HubSpot CRM

Communicator

Chat
Chat features: Chat history, group creation and adding of participants are integrated into the Chat window

Chat groups: Remain a part of the groups you're in even after closing/logging out of the application

Search bar: Search through messages and conversations with ease

Sync Presence
Communicator 6.0 provides unified presence synced across all of your devices

File Sharing
Communicator allows file sharing in both regular and group chats

Meeting
Communicator Meeting is a Communicator Module that allows any user to set up meetings without the hassle of switching applications

With access to all of your Communicator contacts you can start collaborating with a single click

Communicator Meeting allows you to meet with multiple users simultaneously, while offering **Video conferencing** (in grid and speaker view), **Audio conferencing**, **Screen sharing** (specific application or whole screen sharing), **Remote control** when screen sharing, **Group chat**
