

Turn health care data into bottom-line savings

Management Report

This easy-to-read report benchmarks your data against national norms from Truven Health Analytics and Kaiser Family Foundations, and breaks down comparisons by region, industry and company size. Explore data comparisons such as:

- Total Health Plan Costs
- Inpatient and Outpatient Claims
- Emergency Room and Office Visit Utilization and Cost
- Claims by Major Diagnostic Categories
- Wellness
- And many more

Prescription Management Report

We also offer a prescription drug analysis report, to help us assess whether your costs are appropriate and where problem areas may exist. Among the categories analyzed are:

- Paid Summary
- Total Member Cost Share
- Mail Service Utilization
- Brand Name vs. Generic Utilization
- And more

Multiproject Reporting

The Multiproject Reporting function allows us to compare up to four different data sets. We can track data trends from year to year or compare between multiple divisions or locations to isolate disparities. We've found this useful for strategic long-term planning and evaluation.

Turn health care data into bottom-line savings

Ad Hoc Analysis

This sophisticated analysis feature allows us to get to the source of problem areas, to help you implement targeted solutions to lower costs. Find health and Rx plan answers such as:

- Who is going to the doctor? Are they using in-network or out-of-network?
- Who is using the ER most, employees, spouses or dependents? Why is usage so high?
- Who is utilizing mail-order vs. traditional pharmacy?
- What is the cost differential?
- How often are generics being utilized when available?

Alternative Plan Modeling

After identifying cost drivers, you may want to tweak your plan design. The modeling feature helps us try out plan design alternatives to see how changes would impact both your budget and your employees.

Try out different copay or deductible amounts, for instance, or model an entirely new plan, such as an HSA-style plan.

Disease Profiler

Using reliable data from Truven Health Analytics, the Disease Profiler can show average costs of claims by disease category. With this tool, we can help you:

- Predict future costs and budget
- Negotiate more accurate rates with stop-loss carriers
- Design and implement a disease management program
