International Power Seminar on Quantum Computing & Security in the World of AI

Date: 22 February 2024

Time: 14:00 - 16:00 P.M

Hosted by: Alagappa Chettiar Government College of Engineering and Technology

Organized by: ICT Academy

The International Power Seminar on Quantum Computing & Security in the World of AI was an insightful and engaging session featuring global experts Dr. Kathrin Kind from Norway and Bharat Raju V V from the Netherlands. The event was designed to enhance the knowledge of students, faculty, and professionals from government and aided colleges in Tamil Nadu regarding the latest advancements in AI and quantum computing.

Key Highlights:

Quantum Computing Applications: Dr. Kathrin Kind provided an in-depth explanation of quantum computing principles and their real-world applications, particularly in AI and cybersecurity.

Security Challenges in AI: Bharat Raju V V discussed the critical security threats emerging in AI-driven applications and how quantum technologies could both pose risks and offer solutions.

Interactive Discussions: The seminar allowed participants to engage with the speakers through Q&A sessions, which clarified complex concepts and promoted deeper understanding.

Industry Insights: The speakers provided valuable insights into the future landscape of quantum computing and AI, emphasizing the need for interdisciplinary learning.

Overall, the seminar was highly beneficial for students and professionals keen on exploring quantum computing and AI security. The discussions provided valuable insights into emerging technologies and their impact on cyber security. Future seminars could incorporate more interactive elements to enhance learning experiences.
