

LETTER TO OUR CUSTOMERS

At Avanti Power Components, our focus has always been on you — the people who keep turbines, generators, and heavy industrial equipment running day in and day out. We know firsthand how critical these machines are, and how costly downtime can be. That's why our commitment to you is simple: when you need us, we'll deliver.

We understand that every part matters. Whether it's an OEM replacement, a reverse-engineered solution, or a custom-built component, our job is to make sure you get exactly what you need — built to spec, delivered on time, and ready to perform. We take pride in sourcing and supplying components that meet the highest standards of quality and reliability, because we know your equipment doesn't just need to work — it needs to last and be done quickly.

We promise you this:

- We will always treat your urgency as our own.
- We will stand behind every component we supply.
- We will continue to be a partner you can count on, not just a vendor.

Avanti Power Components exists to support you, your operation, and your success. We want you to know that when you choose us, you're not just getting a part — you're getting a team that cares about keeping your equipment running strong.

Thank you for trusting us.

James Orsetti
