

All Purpose Sealer

MANUFACTURER

AlphaGyp, LLC
8920 Point 6 Circle Houston, Texas 77095
Web: alphagyp.com
Email: customersupport@alphagyp.com

PRODUCT DESCRIPTION

AlphaGyp All Purpose Sealer is designed to be applied to AlphaGyp underlayments before the installation of floor-covering adhesives, improving the bond between the underlayment and adhesive. A single coat of AlphaGyp All Purpose Sealer is recommended, and it can be applied either by the floor-covering installer or an authorized AlphaGyp applicator. Please note that the recommendations from the floor-covering and adhesive manufacturers take precedence over these guidelines. AlphaGyp All Purpose Sealer is a concentrated formula and must be diluted before use.

APPLICATIONS

- Multi-family
- Hospitality; Hotel/ Motel
- Commercial Retail/ Office

LIMITATIONS

- Not suitable for exterior applications.
- Not intended for use as a wear surface.
- Do not install on floors that are excessively dusty.
- Avoid installation in areas with continuous exposure to moisture.
- Do not install in below-grade areas unless a confirmed moisture mitigation system is in place.
- Product best stored between 40°F and 90°F.

INSTALLATION

- AlphaGyp's All Purpose Sealer can be diluted with water. Mix 1 part AlphaGyp All Purpose Sealer with 4 parts potable water (1:4 ratio). Use a low speed mixer and a Jiffy mixing paddle to combine. Avoid mixing at high speeds to reduce air intrusion.
- Theoretical coverage for AlphaGyp's All Purpose Sealer is about 300sf/ prepared gallon.
- AlphaGyp's All Purpose Sealer installation shall be in an enclosed building where temperatures do not drop or surpass 50°F to 110°F for 48hrs.
- The underlayment must be cleaned. Excess dust, dirt, paint or any other contaminants must be removed prior to sealer application.
- AlphaGyp's All Purpose Sealer can be applied using a medium nap roller, soft bristle brush or using a pump up sprayer.
- Apply sealer in a uniform method to avoid voids that may compromise sealer performance.
- Avoid allowing the sealer to puddle. If necessary, back-roll to ensure even coverage.

WARNING

May cause an allergic skin reaction. Avoid inhaling mist or vapor. Use only in a well-ventilated area. Wear protective gloves, clothing, and eye protection during use. If contact with skin occurs, wash thoroughly with plenty of water. If skin irritation or rash develops, or if ingested, seek medical attention. In case of eye contact, rinse quickly with water for 15 minutes.

KEEP OUT OF REACH OF CHILDREN
