PRODUCT DESCRIPTION

Our Water-Based Primer with Low VOC is a high-performance solution designed to enhance the bond between numerous substrates with AlphaGyp's floor underlayment. Formulated with environmentally friendly, low-VOC technology, this primer promotes superior adhesion while minimizing the environmental impact. It is easy to apply, dries quickly, and ensures a strong, durable bond that improves the overall performance and longevity of your flooring system. Primer usage is specific to areas that receive underlayment directly on substrate, not needed in sound mat areas.

APPLICATIONS

- Multi-family
- Hospitality; Hotel/ Motel Commercial
- Retail/ Office

CHARACTERISTICS AND SPECIFICATIONS

- Low VOC
- White-Milkish Liquid
- Enhances bond to substrate
- Re-emulsifiable
- Can be diluted up to 4:1 for higher yield

INSTALLATION

- Before installation, ensure the substrate is dry, clean, and free of dust, dirt, and any bond breakers.
- Apply using a long-handle roller, soft-bristle broom, brush, or spray for best results.
- Make sure to achieve complete and even coverage. Allow the primer to become tacky or fully dry, typically within 1 hour.
- Coverage rates may vary depending on the surface porosity, but generally, you can expect a coverage of 270-320 sq. ft. per gallon.
- Primer can be diluted with water. Mix 1 part AlphaGyp Primer with up to 4 parts potable water (1:4 ratio). Use a low speed mixer and a Jiffy mixing paddle to combine. Avoid mixing at high speeds, as this may cause foam to form in the product.
- AlphaGyp's Primer installation shall be in an enclosed building where temperatures do not drop or surpass 50°F to 110°F for 48hrs.

LIMITATIONS

- Not suitable for exterior applications.
- Shelf life is 9 months from the date of manufacture.
- Do not use if the product has been frozen.

WARNING/ SAFETY PRECAUTIONS

May cause an allergic skin reaction. Avoid inhaling mist or vapor. Use only in a well-ventilated area. Wear protective gloves, clothing, and eye protection during use. If contact with skin occurs, wash thoroughly with plenty of water. If skin irritation or rash develops, or if ingested, seek medical attention. In case of eye contact, rinse quickly with water for 15 minutes.

KEEP OUT OF REACH OF CHILDREN
