

**Medication Administration – Decision to Administer**

(Required by Standards for Licensed Family Day Homes 22 VAC 40-111-60 B 8)

Provider's Name (please print): <b>Artmesa Banzon</b>	Name of Family Day Home: <b>Banzon Family Childcare</b>
--	--

I have made the following decision regarding the administration of medications to a child in my family day home:

- I (or other caregivers) **WILL NOT** administer any medications – prescription or non-prescription medication.
- I (or other caregivers) **WILL** administer **ONLY** prescription medication.
- I (or other caregivers) **WILL** administer **ONLY** EpiPens and prescription topical creams and ointments.
- I (or other caregivers) **WILL** administer **ONLY** non-prescription medication.
- I (or other caregivers) **WILL** administer **BOTH** prescription and non-prescription medication.
- I (or other caregivers) **WILL** administer **ONLY** non-prescription topical skin products such as sunscreen, diaper ointment and lotion, oral teething medicine, and insect repellent.

**Authorized Caregivers to Administer Prescription and Non-Prescription Medications**

Only a caregiver who has a current Medication Administration Training (MAT) certificate or has appropriate licensure to administer prescription medications and is listed as a medication administrator in this document will be permitted to administer prescription medications and non-prescription medication (except non-prescription topical skin products such as sunscreen, diaper ointment and lotion, oral teething medicine, and insect repellent) in my family day home.

Medication administrators will administer prescription medications in accordance with the physician's or other prescriber's instructions and in accordance with the standards of practice in the MAT training.

Medication administrators will administer non-prescription medications at the dose, duration, and method of administration specified on the manufacturer's label for the age or weight of the child.

I understand that any individual listed in this section as a medication administrator is approved to administer prescription medications using the following routes: topical, oral, inhaled, eye, and ear, medication patches and epinephrine using an auto-injector device.

I understand that if a child in my family day home requires prescription medication to be administered rectally, vaginally, by injection or by another route not listed above, I will follow the procedures outlined in the MAT training for children with special health care needs.
