Faith-Based 80/20 Durable Portfolio Model

Model Overview

Kisher Capital's Faith-Based 80/20 Durable Portfolio Model employs equity, fixed income, and liquid alternative funds.

The model targets **aggressive growth** through capital appreciation while incorporating downside protection through diversification and disciplined risk management. Allocations are strategically determined using long-term rewarded factors and top-down market analysis. We select funds whose managers apply biblically responsible investment screenings.

DYNAMIC MANAGEMENT

Active funds are included to reach for higher risk-adjusted performance. These funds use disciplined fundamental and technical approaches to investment analysis.

FAITH-BASED INVESTING

Our selected funds use manager-applied screens to remove investments inconsistent with biblically responsible investing.

RISK-BALANCED STRATEGY

The model is structured to maintain an 80/20 allocation between equities and fixed income, respectively.

MODEL COMPONENTS

Equity:

Broad market exposure with moderate factor and active tilts.

Fixed Income:

High-quality holdings chosen for duration control and credit quality.

Liquid Alternatives:

Selected to cushion against equity and fixed income market stress.
