

Nutland Chronicles

SEASON 1
EPISODE 2

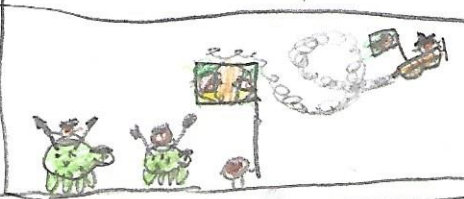

Knuts, 294th May Fruityuary 4th...

General Black Knight,
Commander Squirella,
Today, I am pleased to tell you...

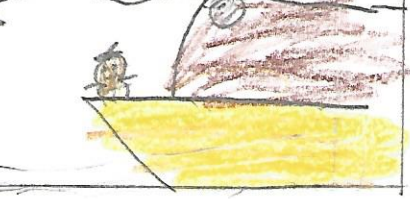

The 920th Anniversary
of the Nutch Imperial
Armed Forces...

You have officially been
PROMOTED!

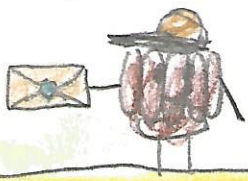

Emperor Butter
watches the parades from
the palace balcony

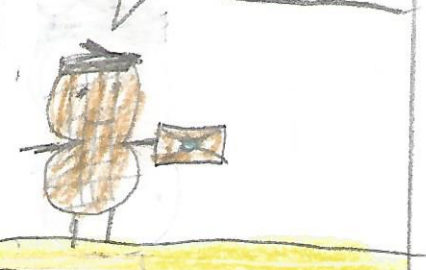

But we're already
the highest rank
pos-... Thank
you your
nuttinness

Letter from Berryland
your Nuttinness.

Thank you. I will
read it sometime later.

Sometime Later...

0 First Street
Knuts, Knutxia
NSD00 DAA
Nutch Empire

Dear Sir,

We are sorry to inform you that the nation
of the Nutch Empire is generating very
high levels of carbon dioxide, a greenhouse
gas, through means of burning coal. For the
sake of the environment and foods everywhere,
we demand that you switch to a more eco-
friendly energy source, or we shall place
crippling sanctions on your nation. You have
48 hours to comply.

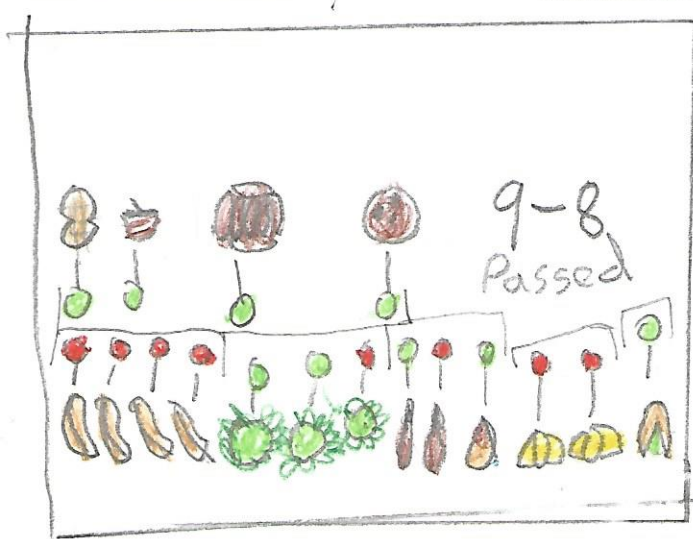

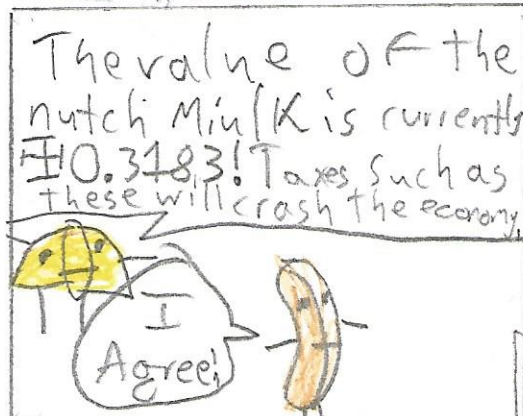

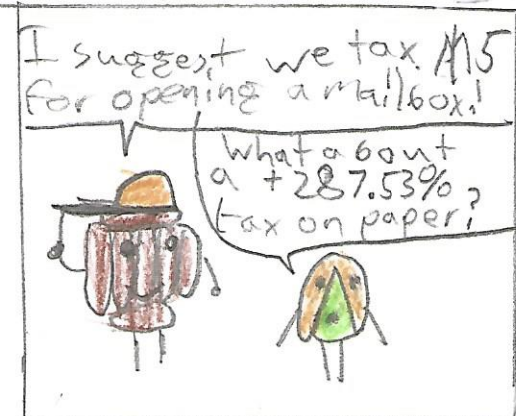

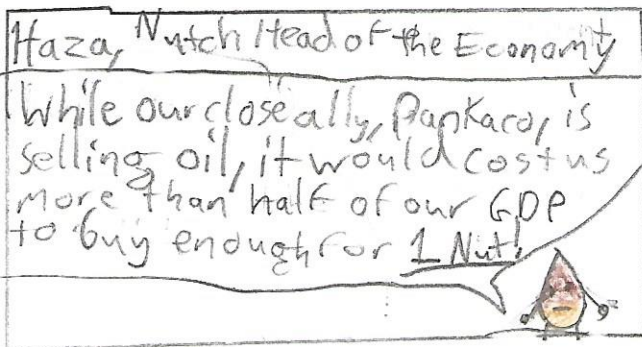

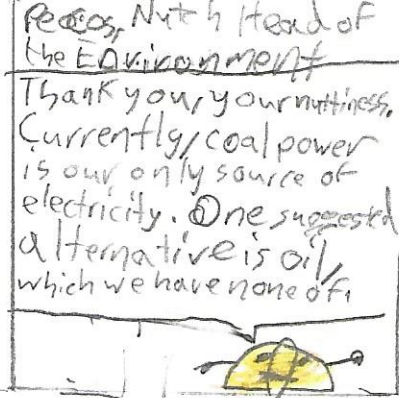

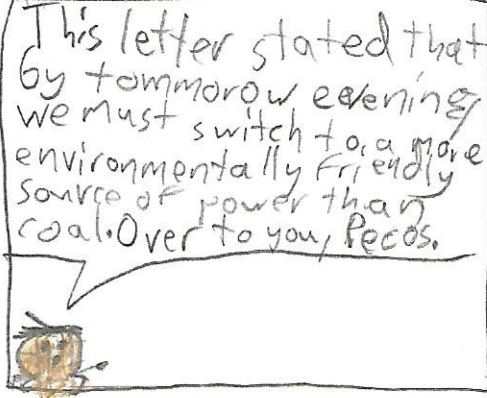

Yours Sincerely,
United Berry & Cherry Congress

It's a demand that
Threatens our
Economy! Contact
the Heads of the
Environment and
Economy!

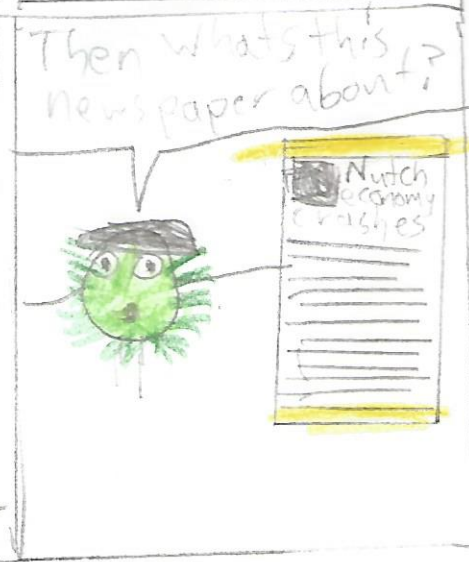

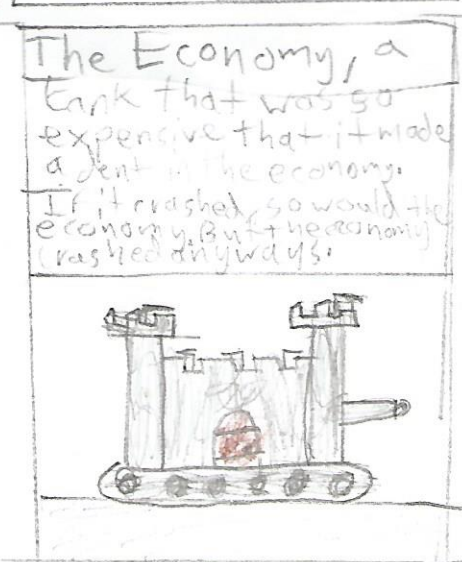

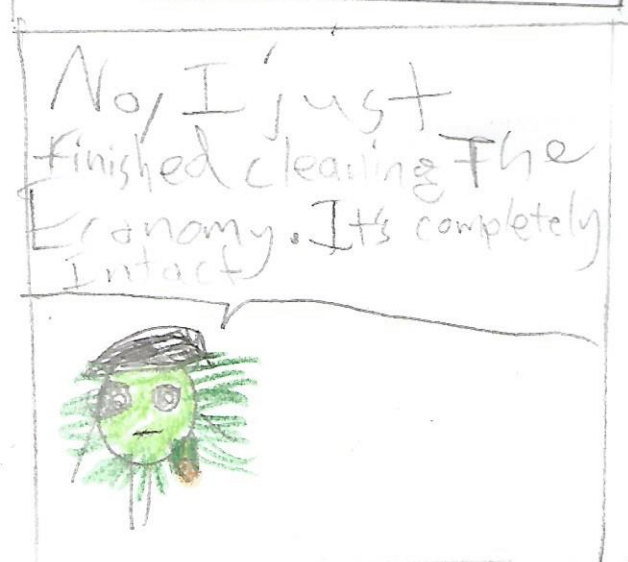

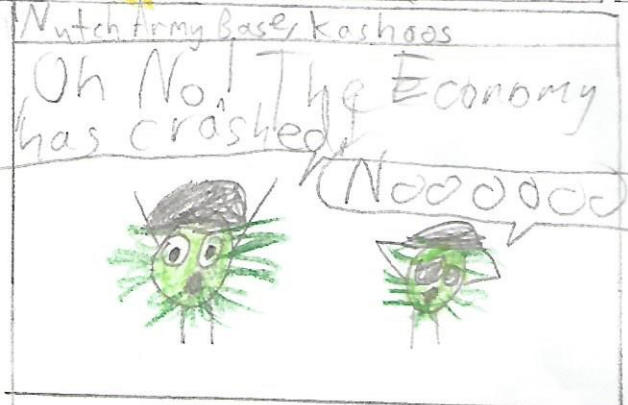

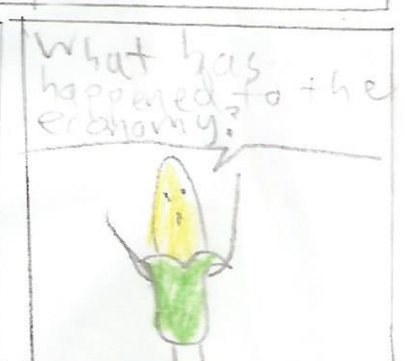

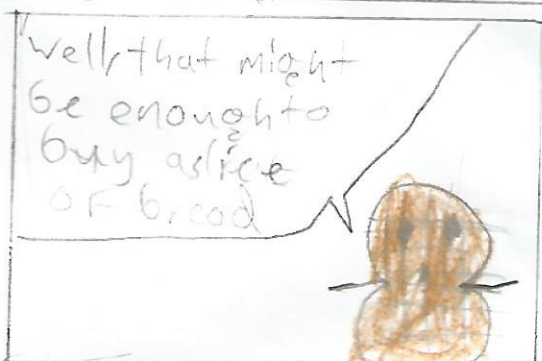

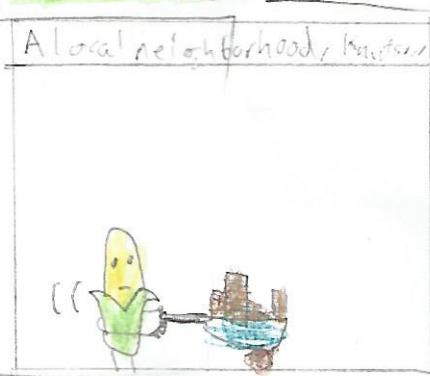

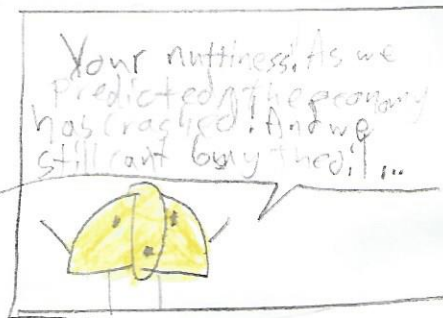

Nutch Parliament

I hereby call
this session to order!

Two Weeks Later...

It's about the economy of the country.

Oh, OK.

It was very nice of Pankaco to donate a ship to us. We now have an army.

Another Letter from Berryland, your Nuttiness.

Kashoo's Castle, 294 May, Frutuary 20th

N.N.S. Boat

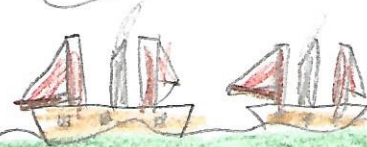

They've increased Sanctions Again!

Wait. Since when do we have that many boats?

We don't. Those are retired Berry Ships.

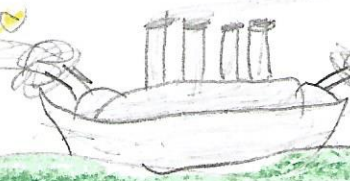

And that's a modern Berry Ship, the S.S. Barriferous

N.N.S. Boat (Entire Nutch Navy)

Retired Berry Ship Similar to N.N.S. Boat

S.S. Barriferous

It's a warning. They're showing that they could obliterate our entire Navy within seconds.

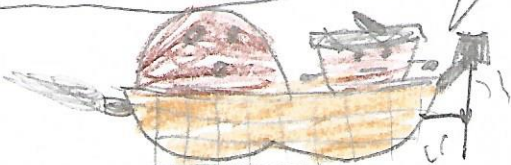

Telegram Commander Squirrelle - Tell her to send some of our old tanks near Berryland - and then blow them up!

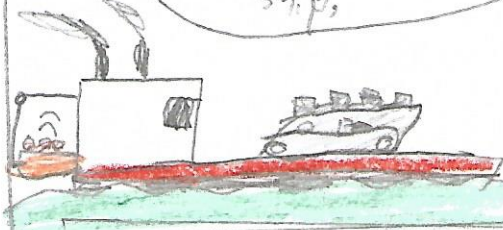

Yes, your nuttiness.

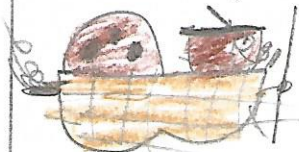

Commander Sanjirella to
Barge Commander: Position
barges about 73yo away
from Berryland.

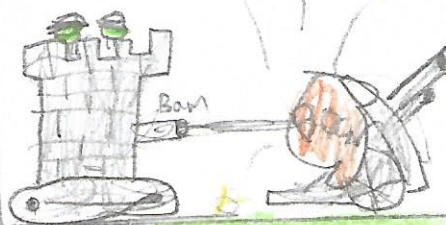

Barge Positioned,
Abandoning
Ship.

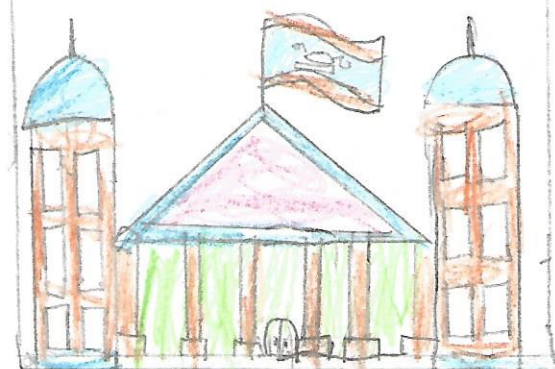

Attack!

send a barge
near hutland
and blow it up!

Citrus Kingdom Parliament

Berryland and Nutland have gone too far, we need to do something or otherwise they might start a war!

I move we ask pasta to invite Berry and Nutch delegates to a meeting!

I second that motion
So do I!
I third the motion!
Poooo!

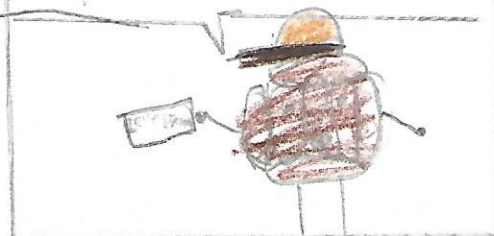

Me too!
I agree,
You can't third a motion but I support this motion as well.

The vote is unanimous!

King Lasastar Royal Scribbles Desk, Gluttonia, Pasta

Yes your Majesty
Tell the Citrus Kingdom our parliament unanimously agreed!

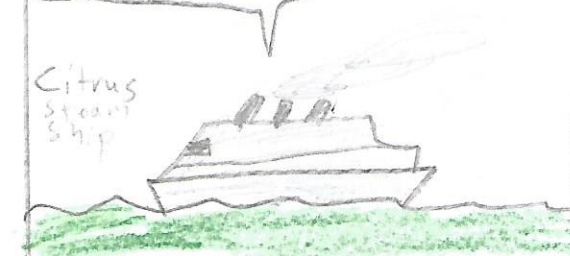

Your Nittiness!
The citrus kingdom And Pasta have decided we meet with Berryland.

Prunus, Nutch Secretary of State

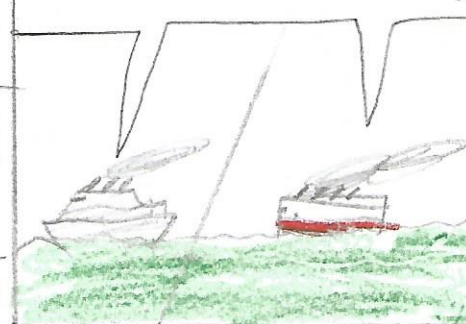

The Maps says to turn north in about 6 clys.
Ok!

we should turn south in 500km.

6 hours Later...

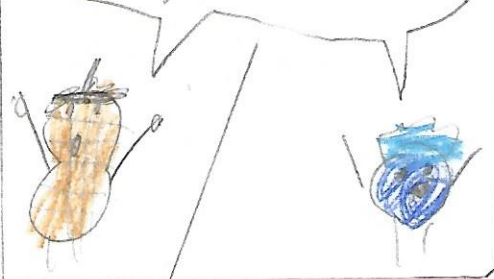

WHERE ARE WE?

Your Majesty! The Nutch, Citrus and Berry delegates are lost. And so is all of the search parties.

Every body's lost!

3 days Later...

There! The last of the missing diplomats rescued!

Thank you so much
for rescuing our diplomats,
Major Cipolla!

No problem, Emperor Butter!
That will be $\text{£}5,000,000,000,99$
please.

There, that should
teach you not to-

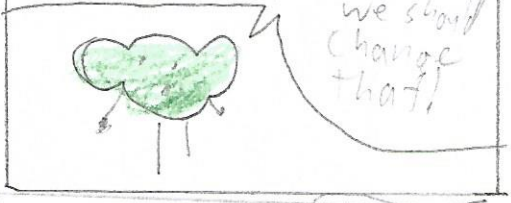

This is all your
fault!

You were the ones who
got lost.

Wait a minute...
He's right, we
all use different
measurement systems.
We should
change that!

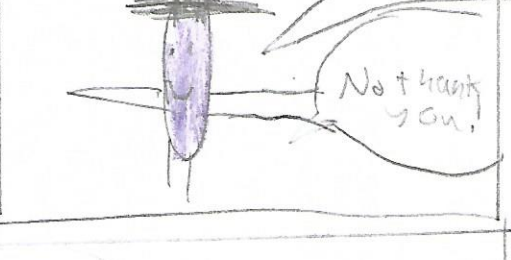

I say, we gather
world leaders in
a meeting to create
a standardized system!

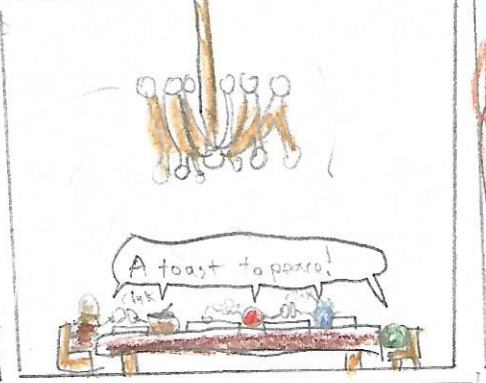

I agree, but first
we need to have the
original meaning!

I can take you there
in five minutes for
just $\text{£}6,000,000,64$!

3 hours Later

Sorry, just having
a bit of trouble with the
cooking oil.

My mistake. But why
did you pour so much?

What kind of unit is an
exoxet?!? It clearly
says, "add 1 cloil"
one CENTILITER!

According to my reference
table, 1 exo $\approx$ 49cl.

See? This is why we need Standardized units of Measurement!

President Cycurbita has allowed us to hold the meeting in Gourd City in one week!

One week Later

World Leaders Gather in Gourd City, Antumnia

The Mayoneez United Tribes did not respond to the invitation. The Cheese European Empire convinced the MBW that the meeting was unnecessary and they will therefore be sorry.

I would like for us to gather a list of measurement forms for us to standardized. IF 50% agree on a unit, then that unit is mandatory.

- Systems:

- Metric: (84.6%)
- Customary (15.4%)
- Knutic (7.7%)

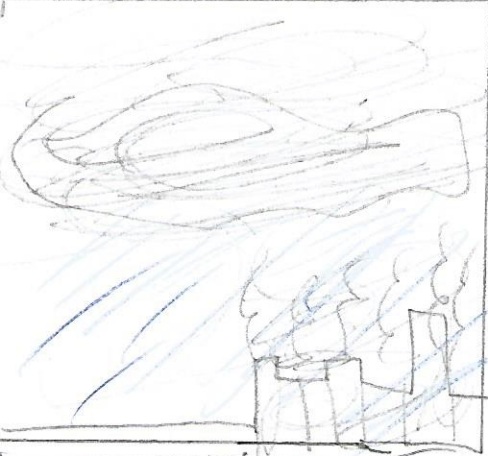

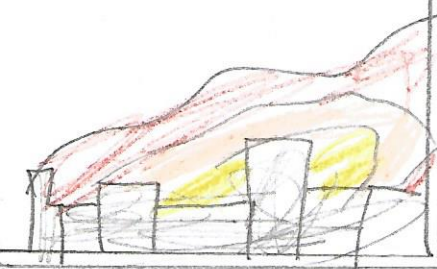

Not affected:

- Coffee Cup Diameter
- Currency
- Date/Time
- Length of Pencil
- Railroad Gauge
- for non-neighboring countries

Units: Meter Kilogram Liter Newton Kelvin
m/s kph Veloter Watt Ampere
Luxmen Pi Degree Second
Mole Candella Radian Joule

Meanwhile outside

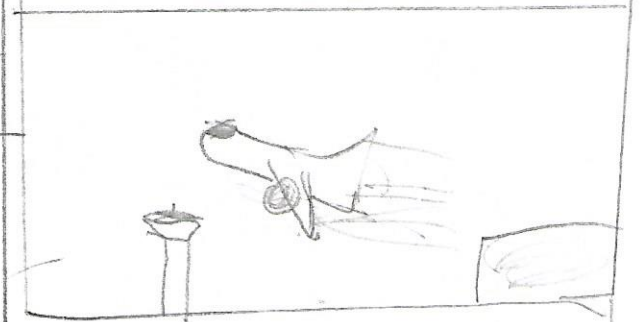

Ground City is on fire
Quickly sign and let's get
out of here

Wow, how convenient.
A loud put out
the fire the instant
that the treaty
was signed.

And so, world leaders, from all
over the globe went on their way

They went on with ruling, thinking the treaty was economy-saving. But in

Map not to scale

The natch economy is gone and 3 countries are in debt of another
£5,000,000,000,99 to SORP.

THE END
