

## Gate Valve Series

Gate valves are our main products, with wide range of size, pressure rating and materials selection to be chosen from. Two kinds of casting are used, lost wax investment casting for low pressure small sizes, and sand casting for higher pressure and larger sizes

According to the sealing surface configuration can be divided into wedge gate-type valve and parallel gate valve, wedge gate-type valve can be divided into: single-gate type, gate-type double plate and elastic; parallel gate-type valve can be divided into single-gate type and double plate. Position by the valve stem threads are divided into clear shot valve and the dark bar gate two. This type valve in the pipe should normally be installed horizontally

We supplies: Cast steel Gate valve, Forged steel Gate Valve, Flanged end Gate Valve, Pressure Seal Gate Valve...etc

Main material of the products are A105,LF2, WCB, C5,WC6, WC9,LCB,LCC, CF8(304), CF8M(316), CF3M(316L), CF3(304L) etc.
