Cash Pay Lab Test Price Comparison

Know your options before you get lab work done

Why does this matter? Hospital labs charge cash-pay patients **5 to 30 times more** than what insurers actually pay. Independent labs like Quest and NorDx are often dramatically cheaper. We prepared this guide so you can make an informed choice about where to have your labs drawn. **Ask us** — we can send your lab order to whichever facility works best for you.

Hospital Labs (typically higher cost) Independent / National Labs (typically lower cost)

Savings Example: A routine annual wellness panel (CMP + CBC + Lipid + TSH + A1c) costs **\$583 - \$1,263** at local hospitals vs. **\$212 - \$463** at Quest, or as low as **\$64 - \$108** at NorDx (estimated). That's potential savings of **\$500+** on one set of labs.

CMMC prices = CompareMaine avg payment (may differ from actual cash). NorDx = estimated range; call 207-396-7830 for exact quotes.

Hospital prices (red columns): Bridgton Hospital from MRF file (25% cash discount applied); Memorial Hospital NH & Maine Medical Center from MaineHealth MRF files (no cash discount — cash = gross charge); CMMC Lewiston from CompareMaine.org average total payments.

NorDx: MaineHealth's independent reference lab. Nearest non-hospital location to Fryeburg is **NorDx Windham** (584 Roosevelt Trail, ~50 min). NorDx offers a **20% cash-at-time-of-service discount**. Prices shown are estimates based on CMS Clinical Lab Fee Schedule. Call **207-396-7830** for exact pricing.

Closer draw sites (hospital-based): Bridgton Hospital Lab (~15 min), Stephens Memorial Lab in Norway (~50 min). Hospital-based labs charge hospital rates even though NorDx processes the samples.

Quest: National reference lab self-pay/cash prices. Quest has draw sites accessible from the Fryeburg area. Prices from published consumer pricing (Feb 2026).

N/A = test not listed in that facility's price file (often sent out to a reference lab).

How to use this guide: Tell us where you'd like your labs drawn and we will send the order there. If you have insurance, your cost may differ based on your plan and deductible. This guide is most useful for **uninsured or high-deductible** patients paying out of pocket.
