

Competency 003:

-The entry-level principal knows how to collaboratively develop and implement high-quality instruction.

-As the grade level content lead, I've worked with administration in developing well thought out, and rigorous lessons through all the DISD Power Meetings. During the first part of the look forward meeting, I have worked through lessons with our math AP to choose problems that are most beneficial for our students. Then in the second part, I have modeled the way the lesson should best be taught. Giving and receiving feedback along the way from campus leaders, and the math team.

-I have attended every district SWAG (six weeks at a glance). This is an opportunity for teachers from across the district to get together and present best practices when teaching the content for the upcoming 6 weeks.

-I also had the opportunity to help plan, prepare, and present in front of many Dallas ISD 6th grade math teachers during the SWAG event.

As a member of the campus SEL Steering Committee, I played a role in:

-the implementation of a daily mindful minute

-Weekly in class SEL lessons

-The development of an after-school mindfulness program with our 6th grade students
