

Competency 008:

-The entry-level principal knows how to focus on improving student outcomes through organizational collaboration, resiliency, and change management.

-As the teacher representative on our Site Based Decision Making committee, I have been able to work with members of our community, as well as the parents of our students to make changes in our school that are with the benefit of our students in mind. In SBDM we've changed dress code policies, and cell phone policies with student achievement in mind. In doing this, we've worked towards creating a place where all students are comfortable and have similar opportunities to learn. In the artifact on the next page, I've included part of a survey that I created for our students to gauge their interest in school uniform options that would help them feel more comfortable, and proud in their learning environment.

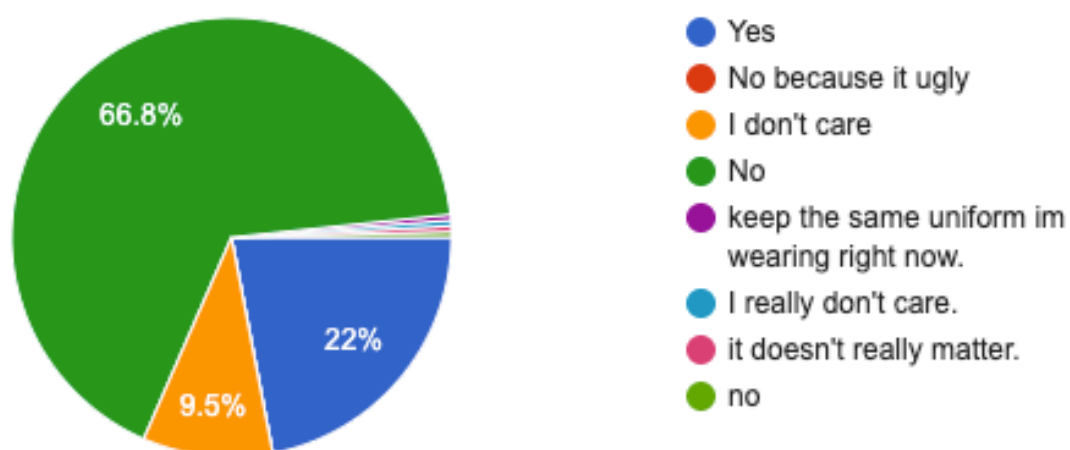

-During the Corona Virus pandemic of 2020, I've worked on our campus in multiple capacities. I've helped with food distribution. I oversaw laptop distribution for students who did not have laptops available. I've also been a resource for teachers who do not have experience with online learning.

2019-2020 School Uniform Questionnaire

241 responses

Would you like for plaid (shown below) to be included in the dress code for next year?

241 responses

Would you like for shirt dresses to be an option for next school year?
