At **Wisdom**, our clients and associates are our most-valuable asset and thus, we believe in building strategic and long-term engagements with them

PLUMBING SERVICES

Essentially plumbing design consists of drawings for the water supply network, seepage network, sewage system structure and drawings for the stormwater network. At PillarPlus, our exclusive automation software creates MEP designs and precise bill of quantities (BOQ) complying with all rules and measures as per the National Building Codes (NBC), 2016

Drainage piping

Accurate drainage layouts and design to ensure free flow to water throughout the building

is an essential aspect of modern living, ensuring that water flows efficiently and safely through our homes and buildings. From the humble pipes hidden behind walls to the intricate systems of water heaters, showers, and faucets, plumbing plays a crucial role in our daily comfort and health. Skilled plumbers work diligently to install, maintain, and repair these systems, often going unnoticed until a problem arises. Their expertise keeps our water clean, our waste managed, and our homes running smoothly, allowing us to focus on what truly matters in our lives.

Water Supply

Water collection, treatment and distribution systems as per the building needs

Bill of Quantities

Detailed plumbing BOQ stating the quality and quantity of pipes, fixtures, water faucets, etc. required at optimum cost

Schematics

Water schematics diagram for easy monitoring and access to the water outlets and pipes

Site Supervision

We have a trained team of experts to provide quantitative site supervision, project assessments and best advice as per client's need.

HVAC SYSTEMS

Heating, Ventilation and Air Conditioning (HVAC) systems are essentially designed to control the internal environment of the building on a sustainable basis.

Refrigeration (R) systems refrigerate to produce chilled water that is piped to air handling units where it is used to cool the air that ventilates the building.

our exclusive automation software creates MEP designs and precise bill of quantities (BOQ) complying with all rules and measures as per the National Building Codes (NBC), 2016.

Our offerings in HVAC & R includes:

- | | |
|---------------------------|---------------------------------------|

Painting/POP

art has always been a medium through which individuals express their deepest emotions and unique perspectives. Whether it's the vibrant strokes of an abstract piece or the meticulously detailed realism of a portrait, each painting tells a story that transcends words. Pop art, in particular, brought a revolution to the art world with its bold colors, playful themes, and incorporation of popular culture.

Interior

design is an art form that marries functionality with aesthetics. It involves creating spaces that are both beautiful and practical, tailored to the needs and preferences of those who inhabit them. From the choice of color palettes to the selection of furniture and accessories, every element plays a crucial role in defining the character of a room. Natural light, textures,

We have trained consultants and licensed contractors who have in-depth knowledge in this field and undertake industrial and commercial civil work projects. Clients highly acclaim our service and can avail the offered service at cost effective prices.

Owing to our rich industry experience, we are engaged in offering Commercial Building Service to our precious clients. The offered service is provided based on the radius and condition of the project and can be incorporated by rephrasing. Our service is rendered in complete compliance with the international quality standards. The offered service is reliable, saves maintenance cost and at the same time is highly efficient
