## Introduction

This document contains a list of California plant taxa that have been officially classified as Endangered, Threatened, or Rare by the California Fish & Game Commission (FGC; state listed) or by the U.S. Secretary of the Interior or the U.S. Secretary of Commerce (federally listed). This list also includes taxa that are official Candidates for state or federal listing, or have been officially Proposed for federal listing, as well as taxa that were once listed but have since been delisted.

State listing is pursuant to the Native Plant Protection Act of 1977 (Fish and Game Code Chapter 10 §§1900-1913) and the California Endangered Species Act of 1984 (CESA; California Code of Regulations, Title 14, Chapter 6, §§783.0-787.9; Fish and Game Code Chapter 1.5, §§2050-2115.5). The official California listing of Endangered, Threatened, and Rare plants is contained in the California Code of Regulations, [Title 14, §670.2](#).

Federal listing is pursuant to the Federal Endangered Species Act of 1973, as amended (16 USC §§1531-1544; 50 CFR §§17.1-17.108). The federal agencies responsible for listing are the United States Fish and Wildlife Service (USFWS) and the National Marine Fisheries Service (NMFS). The official federal listing of Endangered and Threatened plants is published in the Federal Register, [50 CFR §17.12](#).

Common and scientific names are shown as they are in current usage, typically based on the NatureServe Natural Heritage Network, unless otherwise noted. If current nomenclature differs from that in state and federal listing documents, the nomenclature at the time of listing is provided in the notes. Synonyms are included when state, federal, and/or CNDB usage differs; name changes and other clarifying points are also noted. Where state and federal listings apply to different ranges, subspecies, or populations, each taxon will be listed separately, and statuses that apply to only a

portion of the taxon, or that also encompass other taxa, will be shown in parentheses. Where state and federal listings differ in name, but represent the same biological unit, the common name will be listed using the California state listing; the federal name will be listed in the notes.

The “List Date” for final federal listing is the date the listing became effective. This is typically *not* the date of publication of the rule in the Federal Register; it is usually about 30 days after publication, but may be longer.

If a plant was previously listed and no longer has any listing status, the entry text is shown in grey. For taxa having more than one status entry, the current status is in bold and underlined. All dates are in the “YYYYMMDD” format.

## Additional Resources

The [California Fish and Game Commission](#) publishes notices related to changes to Title 14 of the California Code of Regulations.

Title 14 of the California Code of Regulations can be accessed through the [Office of Administrative Law](#).

The [U.S. Fish and Wildlife Service](#) is responsible for protecting Endangered and Threatened species, and conserving candidate species and at-risk species so that ESA listing is not necessary.

The National Marine Fisheries Service (a.k.a. NOAA Fisheries) [Office of Protected Resources](#) is responsible for protecting marine mammals and Endangered and Threatened marine life.
