Online Ordering & Tracking System

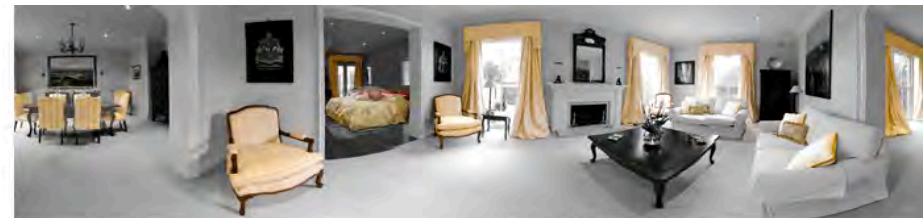

- Place orders online 24/7
- All orders are barcoded
- You can see each stage of the production process
- Each process is scanned on start and completion
- Get live information and expected delivery dates
- Email confirmation of order and sent delivery
- Online calculator
- Keeping you in control of your order

Fishers Online - orders.curtainsorblinds.co.uk

We are now making the whole system of ordering and tracking your products fully automated. Place your order online and be fully updated at each stage of your products completion. From the time we take delivery of your fabric to the delivery of your order and all stages in between.

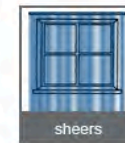

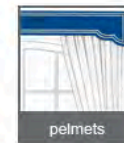

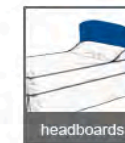

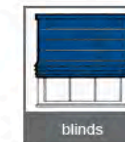

We've included a simple fabric calculator which will help you in ordering the exact width required for your designs, turn on and off email notifications plus much more.

Fishers have one of the most sophisticated in-house tracking systems in place with each item being bar coded and scanned at each of the key stages of production. This information is fed to our live server, which then communicates with our clients to inform them of where their item is within the workroom. This then delivers expected delivery dates so that you can keep your clients abreast of their order.
