

Why Animal Chiropractic?

Animal Chiropractic has been proven to be a wonderful method of improving pain and providing wellness care in animals.

A Certified Animal Chiropractor is trained in assessing the spine for subluxations (i.e. joints that aren't moving properly). Once a subluxation is found, a specific correction will be delivered to correct the problem.

Chiropractic is a drug free approach to caring for your pet and often times, they LOVE coming for treatments!

Learn How Dr. Julianne Donato-Mason

Certified Animal Chiropractor
can enhance your furbaby's health!

About Dr. Donato-Mason

Hi there! I'm Dr. Donato-Mason and I have been helping furbabies feel and function better since 2019.

As a furmom myself, I know the pain of seeing your beloved furbaby suffer. My girl, Storm is the whole reason I ventured down this road.

Through regular adjustments, I am able to keep my girl functioning with minimal discomfort. Nothing brings me more joy than seeing the same results for other furbabies.

Help me help you keep your furbaby happy, healthy and pain free!

What Others Are Saying:

“

Your care made a big difference in my dog's life. She was in so much pain because of arthritis in her hips and neck and you knew exactly how to fix it. Thank you!

-Framboise

Thanks Dr. Donato! We are one step closer to perfect health!

-Zena

My dog Jimmy is feeling great after his first visit and I am confident he will continue to improve!

-Jimmy
