

# ANIMAL HEALTH CONSIDERATIONS FOR EXHIBITORS

These notes are provided to all exhibitors as guidelines for the health and well being of animals entered at the Darwell Fair. Although testing is not mandatory for many animal diseases exhibitors should consider themselves responsible for bringing healthy animals.

Some considerations for your livestock should include:

**Equine** – Horses should be vaccinated with a 5 way shot (tetanus, EEE, WEE) as well as Flo/Rhino. Vaccinations should be done within 6 months before the exhibition. Consider de-worming your horse within 3 months before the fair. If your horse has been sick within the previous 10 – 14 days before the fair or had any lymph nodes swelling contact your veterinarian to check the animal before the fair.

**Cattle** – Cattle should come to the fair free of lice, warbles and ringworm. All of these conditions can be contagious and should be treated before shows to the point where there is no visual evidence of the disease. Cattle should be free of respiratory disease and should show no evidence of lameness from foot rot, corns, etc. Vaccination for cattle diseases such as IBR, BVD, P13 and haemophilus are optional and the exhibitors' veterinarian should be consulted on the treatment and prevention of the above conditions. Cattle should be treated for internal and external parasites at least 7 – 10 days before the fair with a broad-spectrum agent such as Ivomec injectable or pour-on. All cattle must also have CCIA Tag.

The key is to bring healthy stock only. If all exhibitors bring only healthy stock we all benefit by avoiding taking problems home. The above lists are by no means complete, but by observing for common problems we all do our part to make this an enjoyable and disease-free fair.
